Combined Subject Index

Abrasion
On the Wear of a Cobalt-Based Superalloy in Zinc Baths. 2387-2396A

Abrasion resistance
Microstructure and Sliding Wear Behavior of Tungsten Reinforced W-Ni-Si Metal-Silicide In-Situ Composites. 2005-2015A

Absorption (energy)
Static and dynamic energy absorption of Al foams produced by the sintering and dissolution process. 69-74B

Absorption (material)
Fabrication of Ultrahigh Nitrogen Austenitic Steels by Nitrogen Gas Absorption into Solid Solution. 2591-2599A

Acicular structure
Effect of microstructure on hydrogen embrittlement of weld-simulated HSLA-80 and HSLA-100 steels. 1297-1309A
Analysis of Different Acicular Ferrite Microstructures in Low-Carbon Steels by Electron Backscattered Diffraction. Study of Their Toughness Behavior. 2505-2516A

Activated sintering
Titanium-Titanium Boride (Ti-TiB) Functionally Graded Materials through Reaction Sintering: Synthesis, Microstructure, and Properties. 1993-2003A

Activation
The Thermal Behavior of Mechanically Activated Galena by Thermogravimetry Analysis. 793-797A

Activation energy
Leaching of sulfidized chalcopyrite with H_2SO_4-NaCl-O_2. 153-159B
Kinetics and Mechanism of Carbothermic Reduction of Magnesia. 433-437B
Reduction Kinetics of Fe_2MoO_4 Fine Powder by Hydrogen in a Fluidized Bed. 661-667B

Activity (chemical)
Mathematical model of COREX melter gasifier: Part I. Steady-state model. 103-114B
Communication: Activities of Phosphorus in Copper-Nickel Liquid Alloys Saturated with Solid Copper-Nickel Solid Solutions at 1573 K. 741-744B

Adhesion
Processing and Characterization of Plasma-Sprayed Ceramic Coatings on Steel Substrate: Part II. On Coating Performance. 1919-1930A

Adhesive wear
Microstructure and Sliding Wear Behavior of Tungsten Reinforced W-Ni-Si Metal-Silicide In-Situ Composites. 2005-2015A

Adsorption
Communication: The use of secondary ion mass spectrometry for investigating oxygen in pyrometallurgical reactions. 355-358B
Active Solute Effects on Surface Ripples in Electron-Beam Welding Solidification. 421-432B
From Viscosity and Surface Tension to Marangoni Flow in Melts. 517-523B

Aerospace
Precipitation and recrystallization behavior of beta titanium alloys during continuous heat treatment. 147-158A
Internal hydrogen embrittlement of ultrahigh-strength AERMET 100 steel. 327-344A
Influence of intense plastic straining on grain refinement, precipitation, and mechanical properties of Al-Cu-Li-based alloys. 1153-1161A

Aerospace engines, Materials selection
Study of Microstructure and Solute Partitioning in a Cast Ti-48Al-2Cr-2Nb Alloy by Quenching during Directional Solidification Technique. 2139-2148A

Agglomerates
Observation of Calcium Aluminate Inclusions at Interfaces between Ca-Treated, Al-Killed Steels and Slags. 533-538B

Agglomeration
Response of semi-solid Sn-15 pct Pb to rapid shear-rate changes. 409-417A
Nanocrystalline Ni coatings strengthened with ultrafine particles. 673-683A

Aggregates
Observation of Calcium Aluminate Inclusions at Interfaces between Ca-Treated, Al-Killed Steels and Slags. 533-538B

Aging
Improvement in fracture toughness of Ti-4.5Al-3V-2Mo-2Fe through microstructural optimization. 267-275A
Effect of Aging Conditions on the Leaching of Mechanically Activated Pyrite and Sphalerite. 639-645B
On the Precipitation-Hardening Behavior of the Al-Mg-Si-Cu Alloy AA6111. 751-763A
The long-term aging embrittlement of Fe-12Cr steels below 773 K. 927-934A
Aging response of the young's modulus and mechanical properties of Ti-29Nb-13Ta-4.6Zr for biomedical applications. 1007-1012A
Precipitation of Heusler phase (Ni_2TiAl) from B2-TiNi in Ni-Ti-Al and Ni-Ti-Al-x (x = Hf, Zr) Alloys. 1221-1234A
Effect of service-simulated aging on the microstructure and properties of casing casting steel (1CrMoV) vis-a-vis remnant life assessment. 1265-1274A
Communication: Effects of Cooling Rate on Aging at 475 °C of an Oxide-Dispersion-Strengthened Ferritic Steel. 2681-2683A
Precipitation Strengthening of the Aluminum Alloy AA6111. 2913-2924A

Aging (artificial)
On the Influence of Si-Ge Additions on the Aging Response. 735-742A
Static Strain Aging Phenomena in Cold-Rolled Dual-Phase Steels. 781-792A
The Influence of Precipitation on the Work-Hardening Behavior of the Aluminum Alloys AA6111 and AA7030. 2473-2481A
The Effect of Cold Work on the Precipitation of Ω and θ' in a Ternary Al-Cu-Mg Alloy. 2757-2769A

Aircraft components
Mechanical properties of 2014Al/SiC composites with oxidized SiC particles. 1361-1369A

Aircraft components, Crystal lattices
Measurement of the lattice misfit of the nickel-base superalloy SC16 by high-energy synchrotron radiation. 193-197A

Airfoils, Oxidation
A Review of Very-High-Temperature Nb-Silicide-Based Composites. 2043-2052A

Alloy steels, Microstructure
Solidification, Segregation, and Banding in Carbon and Alloy Steels. 781-792B

Aluminates, Impurities
Observation of Calcium Aluminate Inclusions at Interfaces between Ca-Treated, Al-Killed Steels and Slags. 533-538B

Aluminides, Composite materials
Investigation of a Directionally Solidified NiAl/Cr(Mo) Composite Alloyed with Hf. 2663-2670A

Aluminides, Crystal lattices
An Energy Approach to the Formation of Twins in TiAl. 2827-2836A

Aluminides, Mechanical properties
Development and Elemental Powder Metallurgy of a Y-Containing Two-Phase TiAl Alloy. 2077-2087A
Microstructural Effects on the Tensile Properties and Deformation Behavior of a Ti-48Al Gamma Titanium Aluminide. 2113-2127A
High-Temperature Deformation Behavior of a Gamma TiAl Alloy- Microstructural Evolution and Mechanisms. 2165-2176A
Mechanical and Physical Properties of High Velocity Oxy-Fuel-Sprayed Iron Aluminide Coatings. 2223-2231A
Effect of Carbon Addition on the Strength and-Creep Resistance of FeAl Alloys. 2233-2246A
Measurement and Modeling of Creep in Open-Cell NiAl Foams. 2353-2363A

Aluminides, Microstructure
Modeling of the Atomic Ordering Processes in Fe_3Al Intermetallics by the Monte Carlo Simulation Method Combined with Electronic Theory of Alloys. 721-734A
Microstructure evolution in three-dimensional inhomogeneous elastic media. 1421-1431A
Theory of Interface Properties for Carbide Precipitates in TiAl. 2097-2101A
Creep Behavior of TiAl Alloys with Enhanced High-Temperature Capability. 2149-2164A
Microstructure Stability during Creep Deformation of Hard-Oriented Polysynthetically Twinned Crystal of TiAl Alloy. 2191-2198A
A Method for Measuring Microstructural-Scale Strains Using a Scanning Electron Microscope: Applications to γ-Titanium Aluminides. 2301-2313A

Aluminides, Oxidation
Fundamental Considerations for the Development of Oxidation-Resistant Alloys and Coatings Based on γ-TiAl. 2247-2251A
Effect of Ion Implantation on the Oxidation Resistance of TiAl. 2253-2261A
Some Water Vapor Effects during the Oxidation of Alloys that are α-Al_2O_3 Formers. 2609-2619A

Aluminides, Phase transformations
Influence of Alloying Elements on the Kinetic of Massive Transformation in Gamma Titanium Aluminides. 2053-2066A
Influence of Oxygen on Phase Transformations in a Ti-48 At. Pct Al Alloy. 2067-2075A
Effects of Ternary Additions on the Thermoelastic Martensitic Transformation of NiAl. 2089-2095A

Aluminides, Phases (state of matter)
Communication: Discussion of "Synthesis of Ultrafine Particles of Intermetallic Compounds by the Vapor-Phase Magnesium Reduction of Chloride Mixtures: Part I. Titanium Aluminides". 738-740B
Communication: Authors' Reply. 741B
Microstructural Characterization of a Platinum-Modified Diffusion Aluminide Bond Coat for Thermal Barrier Coatings. 2289-2299A
Characterization of Microstructure in Laser-Surface-Alloyed Layers of Aluminum on Nickel. 2621-2631A

Aluminides, Powder technology
In-Situ Reactive Processing of Nickel Aluminides by Laser-Engineered Net Shaping. 2633-2641A

Aluminides, Structural hardening
Work-Hardening and Recovery Mechanisms in Gamma-Based Titanium Aluminides. 2103-2111A
Precipitation Strengthening in K5-Series γ-TiAl Alloyed with Silicon and Carbon. 2129-2138A

Aluminides, Synthesis
Numerical Study of the Second Ignition for Combustion Synthesizing Ni-Al Compounds. 1969-1978A

Aluminides, Welding
Computation and Validation of Weld Pool Dimensions and Temperature Profiles for Gamma TiAl. 2273-2279A
Aluminothermic reactions
Improvement of Desulfurization Efficiency of Molten Iron with Magnesium Vapor Produced In Situ by Aluminothermic Reduction of Magnesium Oxide. 619-629B
Aluminous refractories, Surface properties
Studies of the wetting characteristics of liquid iron on dense alumina by the x-ray sessile drop technique. 193-199B
Aluminum, Alloying elements
Oxidation Behavior and Transmission Electron Microscope Characterization of Ti-44Al-xNb-2(Ta,Zr) Alloys. 2263-2271A
Aluminum, Binary systems
Thermodynamic Investigation of the A2/B2 Region of the Fe-Al System by Knudsen Effusion Mass Spectrometry. 2409-2419A
Aluminum, Composite materials
Reactive synthesis of in-situ $ZrAl_3$-Al_2O_3-Al composites. 1357-1360A
Numerical modeling of the damping capacity of Al/SiC(p). 1387-1391A
Aluminum, Impurities
Solution-Chemistry Analysis of Ammonium Bicarbonate Consumption in Rare Earth-Element Precipitation. 611-617B
Aluminum, Microstructure
On the analysis of grain size in bulk nanocrystalline materials via x-ray diffraction. 1349-1355A
Aluminum, Ternary systems
Phase equilibria of the ternary Al-Cu-Ni system and interfacial reactions of related systems at 800°C. 199-209A
Iron Intermetallic Phases in the Al Corner of the Al-Si-Fe System. 807-825A
Aluminum base alloys, Alloy development
The Use of Solid Electrolytes in the Determination of Activities and the Development of Sensors. 589-594B
Deep filtration of molten aluminum using ceramic foam filters and ceramic particles with active coatings. 1183-1191A
Aluminum base alloys, Binary systems
A solutal interaction mechanism for the columnar-to-equiaxed transition in alloy solidification. 1657-1674A
Communication: Discussion of "Eutectic Solidification of Al-Si Alloys". 2688-2690A
Communication: Authors' Reply. 2690-2693A
Aluminum base alloys, Casting
Asymptotic approximation and numerical simulation of electromagnetic casting. 83-91B
Modeling of Ingot Development during the Start-Up Phase of Direct Chill Casting. 727-734B
Superheat Treatment of Al-7Si-0.55Mg Melt and Its Influences on the Solidification Structures and the Mechanical Properties. 799-806A
The Importance of Viscoplastic Strain Rate in the Formation of Center Cracks during the Start-Up Phase of Direct-Chill Cast Aluminum Extrusion Ingots. 1941-1952A
Solidification of Chill-Cast Al-Zn-Mg Alloys to be Used as Sacrificial Anodes. 2991-2997A
Aluminum base alloys, Composite materials
Emerging technologies in extraction and processing of metals. 137-152B
Kinetics of In-Situ Formation of AlN in Al Alloy Melts by Bubbling Ammonia Gas. 793-804B
Mechanical properties of 2014Al/SiC composites with oxidized SiC particles. 1361-1369A
Application of electromagnetic separation of phases in alloy melt to produce in-situ surface and functionally gradient composites. 1719-1725A
Aluminum base alloys, Crystal growth
A new analytical approach to predict spacing selection in lamellar and rod eutectic systems. 383-394A
Simulation of Macroscopic Solidification with an Incorporated One-Dimensional Microsegregation Model Coupled to Thermodynamic Software. 411-419B
Communication: The coarsening of dispersed Al_3Ti in aluminum-based matrices. 419-421A
Precipitation of aluminum in the silicon phase contained in w319 and 356 aluminum alloys. 523-529A
Resistance to shape refinement of precipitates in Al-(Si,Ge) alloys during thermal cycling. 543-551A
Heat flow parameters affecting dendrite spacings during unsteady-state solidification of Sn-Pb and Al-Cu alloys. 995-1006A
Influence of intense plastic straining on grain refinement, precipitation, and mechanical properties of Al-Cu-Li-based alloys. 1153-1161A
Grain refinement of Al-7Si alloys and the efficiency assessment by recognition of cooling curves. 1175-1182A
The Spatial Distribution of Nucleation Sites and its Effect on Recrystallization Kinetics in Commercial Aluminum Alloys. 2705-2715A
Aluminum base alloys, Crystal lattices
Structure and stability of a new ternary hexagonal phase in Al_3Ti-based Al-Ti-V alloys. 491-501A
A Constitutive Description for Aluminum-0.1 Pct Magnesium Alloy under Hot Working Conditions. 2837-2846A
Aluminum base alloys, Diffusion
Mathematical Modeling of Aluminum Evaporation During Electron-Beam Cold-Hearth Melting of Ti-6Al-4V Ingots. 447-454B
Aluminum base alloys, Directional solidification
The effect of Marangoni convection on fibrous monotectic growth. 449-457A
Aluminum base alloys, Electrical properties
A model for the electrical conductivity of peak-aged and over-aged Al-Zn-Mg-Cu alloys. 899-911A
Aluminum base alloys, Extraction
Emerging technologies in extraction and processing of metals. 137-152B
Aluminum base alloys, Mechanical properties
Demonstration of an endurance limit in cast 319 aluminum. 33-41A
A microstructure-based fatigue-crack-initiation model. 43-57A
Relationship between tensile and shear strengths of the mushy zone in solidifying aluminum alloys. 105-113A
Influence of composition, Sr modification, and annealing treatment on the structure and properties of cast Al-4 pct Mg alloys. 115-129A
A constitutive description of an aluminum-0.32 pct iron under hot-deformation conditions. 319-326A
Mechanical properties of an ultrafine-grained Al-7.5 Pct Mg alloy. 603-613A
Microstructural effects on moisture-induced embrittlement of isothermally forged TiAl-based intermetallic alloys. 645-655A
Deformation, residual stress, and constitutive relations for quenched W319 aluminum. 1483-1491A
The Effect of Solidification Time and Heat Treatment on the Fatigue Properties of a Cast 319 Aluminum Alloy. 1807-1820A
Scatter in Fatigue Life Due to Effects of Porosity in Cast A356-T6 Aluminum-Silicon Alloys. 1879-1890A
Stress-State Dependence of Cavitation and Flow Behavior in Superplastic Aluminum Alloys. 2449-2463A
A Planar Simple Shear Test and Flow Behavior in a Superplastic Al-Mg Alloy. 2465-2471A
Microstructure and Fatigue Properties of Hydroformed Aluminum Alloys 6063 and 5754. 2549-2557A
On the Origin of Strain Softening during Deformation of Aluminum in Torsion to Large Strains. 2727-2736A
Creep of Aluminum-Based Closed-Cell Foams. 2809-2817A
Microstructural Effects on the Tensile and Fracture Behavior of Aluminum Casting Alloys A356/357. 2887-2899A
Aluminum base alloys, Metal working
Effect of material damage on forming limits of voided anisotropic sheet metals. 1283-1290A
Rapid compression of aluminum alloys and its relationship to thixoformability. 1545-1554A
Aluminum base alloys, Microstructure
Growth of solutal dendrites: a cellular automaton model and its quantitative capabilities. 367-382A
On the Influence of Si-Ge Additions on the Aging Response. 735-742A
On the Precipitation-Hardening Behavior of the Al-Mg-Si-Cu Alloy AA6111. 751-763A
Texture and grain-boundary evolutions of continuous cast and direct chill cast AA 5052 aluminum alloy during cold rolling. 951-966A
The nucleation of Fe-rich phases on oxide films in Al-11.5Si-0.4Mg cast alloys. 1409-1420A
Microstructural evolution and deformation of cryomilled nanocrystalline Al-Ti-Cu alloy. 1473-1481A
The effect of grain refining on macrosegregation and dendrite arm spacing of direct chill cast AA5182. 1513-1523A
Microstructure and fatigue characteristics of direct chill cast and electromagnetic cast 2024 Al alloy ingots. 1537-1543A
Effect of initial texture on texture evolution in 1050 Al alloys under simple shear. 1675-1681A
Nanostructure in an Al-Mg-Sc Alloy Processed by Low-Energy Ball Milling at Cryogenic Temperature. 1985-1992A
Communication: Recrystallization Textures of Continuous Cast AA 3015 Alloy: Development of the P Orientation {111}<566>. 2029-2032A
Recrystallization of an AlMgSi Alloy after Different Modes of Hot Deformation. 2717-2726A
Microstructure Development during Hot Deformation of Aluminum to Large Strains. 2737-2744A
Roles of Microalloying Elements on the Cluster Formation in the Initial Stage of Phase Decomposition of Al-Based Alloys. 2745-2755A
The Effect of Cold Work on the Precipitation of Ω and θ' in a Ternary Al-Cu-Mg Alloy. 2757-2769A
Damage by Eutectic Particle Cracking in Aluminum Casting Alloys A356/357. 2901-2912A
Aluminum base alloys, Phases (state of matter)
A study of microsegregation in Al-Cu using a novel single-pan scanning calorimeter. 441-447A
Modeling of Marangoni-Induced Droplet Motion and Melt Convection during Solidification of Hypermonotectic Alloys. 3009-3019A
Aluminum base alloys, Physical properties
Permeability measurements of the flow of interdendritic liquid in equiaxed aluminum-silicon alloys. 25-28B
Communication: Discussion of "The Solubility of Sodium in Liquid Aluminum". 744-746B
Communication: Authors' Reply. 746-748B
Aluminum base alloys, Powder technology
Static and dynamic energy absorption of Al foams produced by the sintering and dissolution process. 69-74B
Communication: Effect of porosity on the electrical properties of Fe-based specimens fabricated by powder metallurgy. 126-129B
Effects of process-control agents on mechanical alloying of nanostructured aluminum alloys. 159-170A
Behavior of oxide film at the interface between particles in sintered Al powders by pulse electric-current sintering. 699-703A
Spark Plasma Sintering of Al-Si-Cu-Fe Quasi-Crystalline Powder. 841-849A
Aluminum base alloys, Soldering
Analysis of the mechanism of die soldering in aluminum die casting. 139-146A
Aluminum base alloys, Structural hardening
Work-softening behavior of the ultrafine-grained Al alloy processed by high-strain-rate, dissimilar-channel angular press-

ing. 625-632A
The Influence of Precipitation on the Work-Hardening Behavior of the Aluminum Alloys AA6111 and AA7030. 2473-2481A
Precipitation Strengthening of the Aluminum Alloy AA6111. 2913-2924A

Aluminum base alloys, Surface properties
Evolution of strain-induced microstructure and texture in commercial aluminum sheet under balanced biaxial stretching. 657-671A

Aluminum base alloys, Synthesis
Synthesis mechanism of an Al-Ti-C grain refiner master alloy prepared by a new method. 1727-1733A

Aluminum base alloys, Welding
Auger electron spectroscopy analysis at the ultrasonically welded interface between alumina and aluminum. 1107-1111A

Aluminum compounds, Metallography
Communication: Focused ion beam milling: A practical method for preparing cast Al-Si alloy samples for transmission electron microscopy. 705-707A

Aluminum compounds, Microstructure
Precipitation of Heusler phase (Ni_2TiAl) from B2-TiNi in Ni-Ti-Al and Ni-Ti-Al-x (x = Hf, Zr) Alloys. 1221-1234A

Aluminum compounds, Rolling
Properties of TiAl sheet pack-rolled at temperatures below 1000°C. 1329-1339A

Aluminum killed steels, Crystal growth
Crystal growth in liquid steel during secondary metallurgy. 161-171B

Aluminum killed steels, Microstructure
Delta-Ferrite Recovery Structures in Low-Carbon Steels. 495-501B

Aluminum killed steels, Physical properties
Marangoni Flow at the Gas/Melt Interface of Steel. 483-493B

Aluminum nitride, Composite materials
Kinetics of In-Situ Formation of AlN in Al Alloy Melts by Bubbling Ammonia Gas. 793-804B

Aluminum nitride, Crystal growth
Nanocrystalline Ni coatings strengthened with ultrafine particles. 673-683A

Aluminum oxide
Some Water Vapor Effects during the Oxidation of Alloys that are α-Al_2O_3 Formers. 2609-2619A

Aluminum oxide, Coatings
Processing and Characterization of Plasma-Sprayed Ceramic Coatings on Steel Substrate: Part I. On Coating Characteristics. 1909-1918A
Processing and Characterization of Plasma-Sprayed Ceramic Coatings on Steel Substrate: Part II. On Coating Performance. 1919-1930A

Aluminum oxide, Composite materials
Reactive synthesis of in-situ $ZrAl_3$-Al_2O_3-Al composites. 1357-1360A

Aluminum oxide, Impurities
Deep filtration of molten aluminum using ceramic foam filters and ceramic particles with active coatings. 1183-1191A

Aluminum oxide, Welding
Auger electron spectroscopy analysis at the ultrasonically welded interface between alumina and aluminum. 1107-1111A

Ammonia
Kinetics of In-Situ Formation of AlN in Al Alloy Melts by Bubbling Ammonia Gas. 793-804B

Amorphous structure
A Thermodynamic Study of Liquid Fe-Si-B Alloys; an Influence of Ternary Associates on a Liquid → Glass Transition. 887-898B

Anisotropy
Properties of TiAl sheet pack-rolled at temperatures below 1000°C. 1329-1339A
Effect of initial texture on texture evolution in 1050 Al alloys under simple shear. 1675-1681A

Annealing
Annealing behavior of submicrocrystalline oxide-bearing iron produced by mechanical alloying. 131-138A
Mechanisms of globularization of Ti-6Al-4V during static heat treatment. 691-698A
Static Strain Aging Phenomena in Cold-Rolled Dual-Phase Steels. 781-792A
Communication: Phase Transition in Galvanneal Coatings. 879-881A
Strengthening by high densities of nanometer-size precipitates: oxides in Ni. 935-949A
Grain growth in a low-loss cold-rolled motor-lamination steel. 1321-1327A
Recrystallization of a cold-rolled low-carbon steel by cold-plasma-discharge rapid annealing. 1341-1348A

Anodes
Cathodic Deposition of Copper in the Presence of Aqueous Sulfurous Acid, Bivalent Aquacobalt Ion, or Both using a Stainless Steel Cathode and a Graphite Anode. 813-819B

Antimony, Alloying elements
A Mushy-Zone Rayleigh Number to Describe Interdendritic Convection during Directional Solidification of Hypoeutectic Pb-Sb and Pb-Sn Alloys. 2365-2376A

Antimony, Impurities
Antimony-Induced Embrittlement of [011] Symmetric Tilt Boundaries in Copper Bicrystals. 773-779A

Antimony, Reactions (chemical)
The Rate of Antimony Elimination from Molten Copper by the Use of Na_2CO_3 Slag. 869-879B

Arc welding
Nitrogen absorption by iron and stainless steels during CO_2 laser welding. 75-82B

Arsenates
Arsenate Capacities of Copper Smelting Slags. 565-571B

Atomizing
Droplet solidification and gas-droplet thermal coupling in the atomization of a Cu-6Sn alloy. 243-253B

Austenite
Constrained phase-transformation of a TiNi shape-memory alloy. 219-223A
Solidification, Segregation, and Banding in Carbon and Alloy Steels. 781-792B
The microstructure of an Fe-Mn-Si-Cr-Ni stainless steel shape memory alloy. 1029-1042A
The relationship between chromium nitride and secondary austenite precipitation in duplex stainless steels. 1575-1597A
Peritectic Reaction and Solidification in Iron-Nickel Alloys. 1931-1940A
Electron Microscopy Study on the Grain-Boundary Precipitation during Aging of Fe-10Ni-5Mn Steel. 2421-2428A
Analysis of Different Acicular Ferrite Microstructures in Low-Carbon Steels by Electron Backscattered Diffraction. Study of Their Toughness Behavior. 2505-2516A

Austenitic stainless steels, Corrosion
Corrosion of Co-Cr-W Alloy in Liquid Zinc. 881-886B
Mechanical measurements of passive film fracture on an austenitic stainless steel. 1291-1296A
The Effects of Cold Working on Sensitization and Intergranular Corrosion Behavior of AISI 304 Stainless Steel. 2441-2447A

Austenitic stainless steels, Crystal growth
Hot working and recrystallization of as-cast 316L. 1683-1703A

Austenitic stainless steels, Mechanical properties
The effect of the strain path on the work hardening of austenitic and ferritic stainless steels in axisymmetric drawing. 589-601A
Postnecking elastoplastic characterization: degree of approximation in the Bridgman method and properties of the flow-stress/true-stress ratio. 615-624A
The long-term aging embrittlement of Fe-12Cr steels below 773 K. 927-934A
Grain-Size Effects on Tensile Behavior of Nickel and AISI 316L Stainless Steel. 2329-2340A
Effect of Prior Oxidation on the Creep Behavior of NiAl-Hardened Austenitic Steel. 2579-2590A
Fabrication of Ultrahigh Nitrogen Austenitic Steels by Nitrogen Gas Absorption into Solid Solution. 2591-2599A

Austenitic stainless steels, Melting
X-Ray-Based Measurement of Composition during Electron Beam Melting of AISI 316 Stainless Steel: Part I. Experimental Setup and Processing of Spectra. 851-861A
X-Ray-Based Measurement of Composition during Electron Beam Melting of AISI 316 Stainless Steel: Part II. Evaporative Processes and Simulation. 863-877A

Austenitic stainless steels, Microstructure
Hot Working and Recrystallization of As-Cast 317L. 3021-3041A

Austenitic stainless steels, Welding
The microstructure and fracture behavior of the dissimilar alloy 690-SUS 304L joint with various Nb addition. 1097-1105A
Mechanism and Optimization of Oxide Fluxes for Deep Penetration in Gas Tungsten Arc Welding. 1901-1907A

Automotive components
Mechanical properties of 2014Al/SiC composites with oxidized SiC particles. 1361-1369A

Automotive components, Mechanical properties
Influence of composition, Sr modification, and annealing treatment on the structure and properties of cast Al-4 pct Mg alloys. 115-129A

Automotive components, Powder technology
Communication: Effect of porosity on the electrical properties of Fe-based specimens fabricated by powder metallurgy. 126-129B

Automotive components, Structural hardening
Precipitation Strengthening of the Aluminum Alloy AA6111. 2913-2924A

Automotive components, Surface properties
Evolution of strain-induced microstructure and texture in commercial aluminum sheet under balanced biaxial stretching. 657-671A

Automotive engines, Mechanical properties
Demonstration of an endurance limit in cast 319 aluminum. 33-41A

Automotive industry
Precipitation and recrystallization behavior of beta titanium alloys during continuous heat treatment. 147-158A

Axial stress
A neutron diffraction and modeling study of uniaxial deformation in polycrystalline beryllium. 1439-1449A
Elasto-Plastic Load Transfer in Bulk Metallic Glass Composites Containing Ductile Particles. 1787-1797A
Stress-State Dependence of Cavitation and Flow Behavior in Superplastic Aluminum Alloys. 2449-2463A

Bainite
An analysis of retained austenite in austempered ductile iron. 211-217A
Effect of deformation schedule on the microstructure and mechanical properties of a thermomechanically processed C-Mn-Si transformation-induced plasticity steel. 1599-1609A

Ball milling
The Thermal Behavior of Mechanically Activated Galena by Thermogravimetry Analysis. 793-797A
Mechanically induced solid-state devitrifications of $Zr_{70}Pd_{20}Ni_{10}$ glassy alloy powders. 893-898A
Nanostructure in an Al-Mg-Sc Alloy Processed by Low-Energy

Ball Milling at Cryogenic Temperature. 1985-1992A

Banded structure
Solidification, Segregation, and Banding in Carbon and Alloy Steels. 781-792B

Base metal, Mechanical properties
The role of the slope out region on fatigue crack initiation in electron beam welded waspaloy. 1637-1645A

Base metal, Microstructure
Basal plane texture and flow pattern in friction stir weld of a magnesium alloy. 987-994A

Basic converters
Kinetics and Mechanism of Carbothermic Reduction of Magnesia. 433-437B

BCC metals, Microstructure
Thermodynamics of Stress-induced Interstitial Redistribution in Body-Centered Cubic Metals. 2819-2825A

Beams (structural), Materials selection
Communication: Spray deposited metal-carbon fiber reinforced polymer hybrid structures. 421-424A

Bearing steels, Crystal lattices
Communication: Discussion of 'Lattice orientation relationship between the M_2C carbide and the ferrite matrix in the M50NiL bearing steel'. 1735A
Communication: Author's reply. 1735-1736A

Bend tests
Analysis of fracture toughness in the transition-temperature region of an Mn-Mo-Ni low-alloy steel. 1275-1281A

Bending
Improving the Fracture Toughness of Constituent Phases and Nb-Based In Situ Composites by a Computational Alloy Design Approach. 1833-1849A
Measurement and Modeling of Creep in Open-Cell NiAl Foams. 2353-2363A

Bending fatigue
Crack Initiation and Propagation in 50.9 At. pct Ni-Ti Pseudoelastic Shape-Memory Wires in Bending-Rotation Fatigue. 2847-2860A

Beryllium, Crystal lattices
A neutron diffraction and modeling study of uniaxial deformation in polycrystalline beryllium. 1439-1449A

Bicarbonates
Solution-Chemistry Analysis of Ammonium Bicarbonate Consumption in Rare Earth-Element Precipitation. 611-617B

Bicrystals, Mechanical properties
Antimony-Induced Embrittlement of [011] Symmetric Tilt Boundaries in Copper Bicrystals. 773-779A

Binary systems, Crystal growth
Communication: Discussion of "Eutectic Solidification of Al-Si Alloys". 2688-2690A
Communication: Authors' Reply. 2690-2693A

Binary systems, Microstructure
A solutal interaction mechanism for the columnar-to-equiaxed transition in alloy solidification. 1657-1674A

Binary systems, Phases (state of matter)
An atomistic study of solid/liquid interfaces and phase equilibrium in binary systems. 435-439A
Phase Equilibria and Thermodynamic Properties of the Cu_2O-CaO- Na_2O System in Equilibrium with Copper. 631-638B
Determination of Standard Gibbs Energies of Formation of $Fe_2Mo_3O_{12}$, $Fe_2Mo_3O_8$, Fe_2MoO_4, and $FeMoO_4$ of the Fe-Mo-O Ternary System and μ Phase of the Fe-Mo Binary System by Electromotive Force Measurement Using a Y_2O_3-Stabilized ZrO_2 Solid Electrolyte. 653-659B
The Dy-Zn Phase Diagram. 743-750A
The Thermodynamics of Tetrataenite and Awaruite: A Review of the Fe-Ni Phase Diagram. 1759-1769A
Peritectic Reaction and Solidification in Iron-Nickel Alloys. 1931-1940A
Thermodynamic Investigation of the A2/B2 Region of the Fe-Al System by Knudsen Effusion Mass Spectrometry. 2409-2419A
Structural Properties and Stability of Metastable Phases in the Zr-Nb System: Part II. Aging of Bcc (β) Alloys and Assessment of β-Zr. 2771-2779A

Biocompatibility
Aging response of the young's modulus and mechanical properties of Ti-29Nb-13Ta-4.6Zr for biomedical applications. 1007-1012A

Biomedical materials, Mechanical properties
Aging response of the young's modulus and mechanical properties of Ti-29Nb-13Ta-4.6Zr for biomedical applications. 1007-1012A

Blast furnace practice
A cold model study of raceway hysteresis. 183-191B

Blast furnace slags, Physical properties
Viscosity of Blast Furnace Type Slags. 509-516B

Blast furnaces
Mathematical model of COREX melter gasifier: Part II. Dynamic model. 115-119B
The Effect of the CaO/SiO_2 Ratio on the Phase Equilibria in the ZnO-"Fe_2O_3"-($PbO + CaO + SiO_2$) System in Air: CaO/SiO_2 = 0.1, $PbO/(CaO + SiO_2)$ = 6.2, and CaO/SiO_2 =0.6, $PbO/(CaO + SiO_2)$ = 4.3. 369-382B
Experimental Study of Phase Equilibria in the PbO-ZnO"Fe_2O_3"-($CaO + SiO_2$) System in Air for the Lead and Zinc Blast Furnace Sinters (CaO/SiO_2 Weight Ratio of 0.933 and $PbO/(CaO + SiO_2)$ Ratios of 2.0 and 3.2). 383-397B
Influence of Ash on Interfacial Reactions between Coke and Liquid Iron. 573-580B

Body centered cubic lattice
Structural Properties and Stability of Metastable Phases in the Zr-Nb System: Part II. Aging of Bcc (β) Alloys and Assessment of β-Zr. 2771-2779A

Boiling water reactors, Mechanical properties
Hydride embrittlement and irradiation effects on the hoop mechanical properties of pressurized water reactor (PWR) and boiling-water reactor (BWR) ZIRCALOY cladding tubes: Part I. Hydride embrittlement in stress-relieved, annealed, and recrystallized ZIRCALOYs at 20°C and 300°C. 553-566A
Hydride embrittlement and irradiation effects on the hoop mechanical properties of pressurized water reactor (PWR) and boiling-water reactor (BWR) ZIRCALOY cladding tubes: Part II. Morphology of hydrides investigated at different magnifications and their interaction with the processes of plastic deformation. 567-578A
Hydride embrittlement and irradiation effects on the hoop mechanical properties of pressurized water reactor (PWR) and boiling-water reactor (BWR) ZIRCALOY cladding tubes: Part III. Mechanical behavior of hydride in stress-relieved annealed and recrystallized ZIRCALOYs at 20°C and 300°C. 579-588A

Bonding strength
Mechanical properties of 2014Al/SiC composites with oxidized SiC particles. 1361-1369A

Borides, Alloying additive
Improvement of hardness and wear resistance of (TiC,TiB)/Ti-6Al-4V surface-alloyed materials fabricated by high-energy electron-beam irradiation. 1461-1471A

Borides, Composite materials
Synthesis of ductile titanium-titanium boride (Ti-TiB) composites with a beta-titanium matrix: the nature of TiB formation and composite properties. 1371-1385A
Titanium-Titanium Boride (Ti-TiB) Functionally Graded Materials through Reaction Sintering: Synthesis, Microstructure, and Properties. 1993-2003A

Bottom casting
Heat Transfer and Solidification Model of Continuous Slab Casting: CON1D. 685-705B

Brazing alloys
Reaction Layers and Mechanisms for a Ti-Activated Braze on Sapphire. 2963-2972A

Bridging
Bridging mechanisms in a Tiβ21s/SCS-6 composite: in-situ scanning electron microscopy study. 1193-1202A

Brinell hardness
Superheat Treatment of Al-7Si-0.55Mg Melt and Its Influences on the Solidification Structures and the Mechanical Properties. 799-806A

Brittle fracture
Internal hydrogen embrittlement of ultrahigh-strength AERMET 100 steel. 327-344A

Brittleness
Diffusion bonding of Si_3N_4-TiN composite with nickel-based interlayers. 1627-1636A
Mechanical and Physical Properties of High Velocity Oxy-Fuel-Sprayed Iron Aluminide Coatings. 2223-2231A
In-Situ Reactive Processing of Nickel Aluminides by Laser-Engineered Net Shaping. 2633-2641A

Bronzes, Powder technology
Droplet solidification and gas-droplet thermal coupling in the atomization of a Cu-6Sn alloy. 243-253B

Bubbles
Nucleation of bubbles on a solidification front-experiment and analysis. 321-332B
Bubble Bursting Phenomenon in Gas/Metal/Slag Systems. 525-532B

Bubbling
Kinetics of In-Situ Formation of AlN in Al Alloy Melts by Bubbling Ammonia Gas. 793-804B

Buckling
Measurement and Modeling of Creep in Open-Cell NiAl Foams. 2353-2363A

Bulk modulus
Elastic Constants of Face-Centered Cubic and $L1_2$ Ni-Si Alloys: Composition and Temperature Dependence. 1863-1868A

Buoyancy
Studies on Transport Phenomena during Directional Solidification of a Noneutectic Binary Solution Cooled from the Top. 899-909B
Evaluation of a Rayleigh-number-based freckle criterion for Pb-Sn alloys and Ni-base superalloys. 1525-1536A

Bursting
Bubble Bursting Phenomenon in Gas/Metal/Slag Systems. 525-532B

Butt welding
The microstructure and fracture behavior of the dissimilar alloy 690-SUS 304L joint with various Nb addition. 1097-1105A

Byproducts
Calciothermic reduction of titanium oxide in molten $CaCl_2$. 277-285B

Calcines, Reduction (chemical)
Hydrogen Reduction of Oxidized Nickel Concentrates. 805-811B

Calcium chloride
Calciothermic reduction of titanium oxide in molten $CaCl_2$. 277-285B
Calciothermic reduction of titanium oxide and in-situ electrolysis in molten $CaCl_2$. 287-295B

Calcium compounds, Physical properties
Viscosity of Blast Furnace Type Slags. 509-516B

Calcium compounds, Reactions (chemical)
Occlusion and ion exchange in the molten (lithium chloride + potassium chloride + alkaline-earth chloride) salt + zeolite 4A system with alkaline-earth chlorides of calcium and strontium and in the molten (lithium chloride + potassium chloride + actinide chloride) salt + zeolite 4A system with the actinide chloride of uranium. 201-208B
Capillarity
A model for the electrical conductivity of peak-aged and over-aged Al-Zn-Mg-Cu alloys. 899-911A
Capillary pressure
Marangoni convection driven by thermocapillary and solutocapillary forces in the Fe-O alloy pool during the solidification or remelting process. 37-49B
Carbides
Effect of service-simulated aging on the microstructure and properties of casing casting steel (1CrMoV) vis-a-vis remnant life assessment. 1265-1274A
Coarsening kinetics of multicomponent MC-type carbides in high-strength low-alloy steels. 1565-1573A
Carbon, Alloying additive
Effect of Carbon Addition on the Strength and-Creep Resistance of FeAl Alloys. 2233-2246A
Carbon fibers, Composite materials
Communication: Spray deposited metal-carbon fiber reinforced polymer hybrid structures. 421-424A
Carbon steels, Coating
Processing and Characterization of Plasma-Sprayed Ceramic Coatings on Steel Substrate: Part II. On Coating Performance. 1919-1930A
Carbon steels, Corrosion
Microscale investigations of the metal-dusting corrosion mechanism on mild steel. 345-354A
Carbon steels, Mechanical properties
Correlation of microstructure with hardness and wear resistance of VC/steel surface-alloyed materials fabricated by high-energy electron-beam irradiation. 59-69A
Carbon steels, Microstructure
Solidification, Segregation, and Banding in Carbon and Alloy Steels. 781-792B
Carbon steels, Welding
Numerical analysis of metal transfer in gas metal arc welding. 345-353B
Carbonitriding
Communication: Discussion of 'precipitation behavior and its effect on strengthening of an HSLA-Nb/Ti steel. 1013-1017A
Communication: Authors' reply. 1017-1019A
Carbothermic reactions
Kinetics and Mechanism of Carbothermic Reduction of Magnesia. 433-437B
Cast iron, Welding
Susceptibility of Iron Castings to Heat Absorption from an Electric Arc and to Hardened-Layer Shaping. 2973-2984A
Casting alloys, Microstructure
Texture and grain-boundary evolutions of continuous cast and direct chill cast AA 5052 aluminum alloy during cold rolling. 951-966A
Damage by Eutectic Particle Cracking in Aluminum Casting Alloys A356/357. 2901-2912A
Casting defects
Investigation of the Performance of an Expandable Polystyrene Injector for Use in the Lost-Foam Casting Process. 843-851B
Castings, Microstructure
Iron Intermetallic Phases in the Al Corner of the Al-Si-Fe System. 807-825A
Cathodes
Cathodic Deposition of Copper in the Presence of Aqueous Sulfurous Acid, Bivalent Aquacobalt Ion, or Both using a Stainless Steel Cathode and a Graphite Anode. 813-819B
Cavitation
Communication: The Effect of Stress State on Cavity Initiation during Hot Working of Ti-6Al-4V. 2397-2400A
Stress-State Dependence of Cavitation and Flow Behavior in Superplastic Aluminum Alloys. 2449-2463A
Cellular structure
Growth of solutal dendrites: a cellular automaton model and its quantitative capabilities. 367-382A
Cellular-to-dendritic transition during the directional solidification of binary alloys. 395-401A
Cementite
Microscale investigations of the metal-dusting corrosion mechanism on mild steel. 345-354A
Ceramic powders, Oxidation
Mechanical properties of 2014Al/SiC composites with oxidized SiC particles. 1361-1369A
Chalcopyrite, Beneficiation
Sulfidation of chalcopyrite with elemental sulfur. 15-23B
Kinetics of the sulfidation of chalcopyrite with gaseous sulfur. 61-68B
Chalcopyrite, Reactions (chemical)
Leaching of sulfidized chalcopyrite with H_2SO_4-NaCl-O_2. 153-159B
Chemical bonds
Auger electron spectroscopy analysis at the ultrasonically welded interface between alumina and aluminum. 1107-1111A
Chemical composition
An analysis of retained austenite in austempered ductile iron. 211-217A
Effect of a Catalyst on Heterogeneous Nucleation in Pure Fe and Fe-Ni Alloys. 539-547B
On the Influence of Si-Ge Additions on the Aging Response. 735-742A
X-Ray-Based Measurement of Composition during Electron Beam Melting of AISI 316 Stainless Steel: Part I. Experimental Setup and Processing of Spectra. 851-861A
X-Ray-Based Measurement of Composition during Electron Beam Melting of AISI 316 Stainless Steel: Part II. Evaporative Processes and Simulation. 863-877A
Chill casting
Solidification of Chill-Cast Al-Zn-Mg Alloys to be Used as Sacrificial Anodes. 2991-2997A
Chromite, Reactions (chemical)
The Effect of Salt-Phase Composition on the Rate of Soda-Ash Roasting of Chromite Ores. 555-563B
Chromium, Alloying additive
Improving the Fracture Toughness of Constituent Phases and Nb-Based In Situ Composites by a Computational Alloy Design Approach. 1833-1849A
Chromium, Alloying elements
Hot working and recrystallization of as-cast 316L. 1683-1703A
Chromium base alloys, Composite materials
Investigation of a Directionally Solidified NiAl/Cr(Mo) Composite Alloyed with Hf. 2663-2670A
Chromium base alloys, Microstructure
Effect of rolling temperature on the deformation and recrystallization textures of warm-rolled steels. 1163-1174A
Chromium molybdenum steels, Mechanical properties
A Novel Inclusion Inspection Method Employing 20 kHz Fatigue Testing. 2517-2526A
Chromium molybdenum steels, Microstructure
Coarsening kinetics of multicomponent MC-type carbides in high-strength low-alloy steels. 1565-1573A
Chromium molybdenum vanadium steels, Composite materials
Composition Control in the Direct Laser-Deposition Process. 439-445B
Chromium molybdenum vanadium steels, Mechanical properties
Effect of service-simulated aging on the microstructure and properties of casing casting steel (1CrMoV) vis-a-vis remnant life assessment. 1265-1274A
Chromium steels, Mechanical properties
Effect of quenching, tempering, and cold rolling on creep deformation behavior of a tempered martensitic 9Cr-1W steel. 913-925A
Cleavage
Effects of test temperature and grain size on the Charpy impact toughness and dynamic toughness (K_{ID}) of polycrystalline niobium. 967-976A
Effects of tensile prestrain on the notch toughness of low-alloy steel. 1055-1068A
Analysis of fracture toughness in the transition-temperature region of an Mn-Mo-Ni low-alloy steel. 1275-1281A
Effect of Carbon Addition on the Strength and-Creep Resistance of FeAl Alloys. 2233-2246A
Fatigue Crack Growth Mechanisms in Ti6242 Lamellar Microstructures: Influence of Loading Frequency and Temperature. 2565-2577A
Communication: Effects of Cooling Rate on Aging at 475 °C of an Oxide-Dispersion-Strengthened Ferritic Steel. 2681-2683A
Toughness and Strength Characteristics of Nb-W-Si Ternary Alloys Prepared by Arc Melting. 2861-2871A
Clustering
Observation of Calcium Aluminate Inclusions at Interfaces between Ca-Treated, Al-Killed Steels and Slags. 533-538B
The Spatial Distribution of Nucleation Sites and its Effect on Recrystallization Kinetics in Commercial Aluminum Alloys. 2705-2715A
Roles of Microalloying Elements on the Cluster Formation in the Initial Stage of Phase Decomposition of Al-Based Alloys. 2745-2755A
Clusters
Titanium-Titanium Boride (Ti-TiB) Functionally Graded Materials through Reaction Sintering: Synthesis, Microstructure, and Properties. 1993-2003A
Coal, Composite materials
Estimation and modeling of parameters for direct reduction in iron ore/coal composites: Part I. Physical parameters. 93-102B
Estimation and modeling of parameters for direct reduction in iron ore/coal composites: part II. Kinetic parameters. 255-266B
Coal gasification
Estimation and modeling of parameters for direct reduction in iron ore/coal composites: part II. Kinetic parameters. 255-266B
Coalescing
Last-stage solidification of alloys: theoretical model of dendrite-arm and grain coalescence. 467-479A
Coarsening
Permeability measurements of the flow of interdendritic liquid in equiaxed aluminum-silicon alloys. 25-28B
Annealing behavior of submicrocrystalline oxide-bearing iron produced by mechanical alloying. 131-138A
Communication: The coarsening of dispersed Al_3Ti in aluminum-based matrices. 419-421A
The morphological evolution of dendritic microstructures during coarsening. 481-489A
Resistance to shape refinement of precipitates in Al-(Si,Ge) alloys during thermal cycling. 543-551A
A model for the electrical conductivity of peak-aged and over-aged Al-Zn-Mg-Cu alloys. 899-911A
Precipitation of Heusler phase (Ni_2TiAl) from B2-TiNi in Ni-Ti-Al and Ni-Ti-Al-x (x = Hf, Zr) Alloys. 1221-1234A

Microstructure evolution in three-dimensional inhomogeneous elastic media. 1421-1431A
Coarsening kinetics of multicomponent MC-type carbides in high-strength low-alloy steels. 1565-1573A
Creep Behavior of TiAl Alloys with Enhanced High-Temperature Capability. 2149-2164A
Microstructure Stability during Creep Deformation of Hard-Oriented Polysynthetically Twinned Crystal of TiAl Alloy. 2191-2198A
The Effect of Cold Work on the Precipitation of Ω and θ' in a Ternary Al-Cu-Mg Alloy. 2757-2769A

Cobalt, Reduction (chemical)
Communication: Nickel, copper, and cobalt slag losses during converting. 121-125B
Hydrogen Reduction of Oxidized Nickel Concentrates. 805-811B

Cobalt, Thermal properties
Thermal Conductivities of Molten Iron, Cobalt, and Nickel by Laser Flash Method. 2801-2807A

Cobalt base alloys, Corrosion
Corrosion of Co-Cr-W Alloy in Liquid Zinc. 881-886B

Cobalt base alloys, Mechanical properties
A microstructure-based fatigue-crack-initiation model. 43-57A
High-temperature low-cycle fatigue behavior of K40S cobalt-base superalloy. 979-986A
On the Wear of a Cobalt-Based Superalloy in Zinc Baths. 2387-2396A

Cobalt base alloys, Microstructure
Communication: Further discussion on the free growth behavior in the solidification of undercooled eutectic melts. 1393-1396A
Grain-Boundary Character Distribution in Recrystallized $L1_2$ Ordered Intermetallic Alloys. 2429-2439A
Nucleation-Controlled Microstructures and Anomalous Eutectic Formation in Undercooled Co-Sn and Ni-Si Eutectic Melts. 2999-3008A

Cobalt base alloys, Thermal properties
Communication: Thermal Conductivity of Cobalt-Base Alloys. 2026-2028A

Cobalt compounds, Microstructure
Grain-Boundary Character Distribution in Recrystallized $L1_2$ Ordered Intermetallic Alloys. 2429-2439A

Cold rolling
Effect of quenching, tempering, and cold rolling on creep deformation behavior of a tempered martensitic 9Cr-1W steel. 913-925A
Effect of temper rolling on texture formation in a low loss cold-rolled magnetic lamination steel. 1311-1319A
The Effects of Cold Working on Sensitization and Intergranular Corrosion Behavior of AISI 304 Stainless Steel. 2441-2447A

Cold welding
Effects of process-control agents on mechanical alloying of nanostructured aluminum alloys. 159-170A

Cold working
Precipitation and recrystallization behavior of beta titanium alloys during continuous heat treatment. 147-158A

Columnar structure
Morphological stability of copper-silver multilayer thin films at elevated temperatures. 1043-1054A
The microstructure and fracture behavior of the dissimilar alloy 690-SUS 304L joint with various Nb addition. 1097-1105A
A solutal interaction mechanism for the columnar-to-equiaxed transition in alloy solidification. 1657-1674A
Hot working and recrystallization of as-cast 316L. 1683-1703A

Combustion
Computational fluid-dynamics simulation of postcombustion in the electric-arc furnace. 333-343B
Numerical Study of the Second Ignition for Combustion Synthesizing Ni-Al Compounds. 1969-1978A

Comminution
The Thermal Behavior of Mechanically Activated Galena by Thermogravimetry Analysis. 793-797A

Compressing
Rapid compression of aluminum alloys and its relationship to thixoformability. 1545-1554A
Communication: Strength differential measurements in IN 718: effects of superimposed. 1736-1739A
The Role of Nitrogen on the Deformation Response of Hadfield Steel Single Crystals. 1821-1831A
Recrystallization of an AlMgSi Alloy after Different Modes of Hot Deformation. 2717-2726A

Compression tests
A Taylor Model Based Description of the Proof Stress of Magnesium AZ31 during Hot Working. 1799-1806A
Deformation Mechanisms in Ti-6Al-4V/TiC Composites. 1869-1877A
High-Temperature Deformation Behavior of a Gamma TiAl Alloy- Microstructural Evolution and Mechanisms. 2165-2176A

Compressive properties
Mechanical properties of iron processed by severe plastic deformation. 71-83A
A Composite Model for the Grain-Size Dependence of Yield Stress of Nanograined Materials. 765-772A
Measurement and Modeling of Creep in Open-Cell NiAl Foams. 2353-2363A
Large Strain Mechanical Behavior of 1018 Cold-Rolled Steel over a Wide Range of Strain Rates. 2873-2885A

Compressive strength
Mechanical properties of as-cast and directionally solidified Nb-Mo-W-Ti-Si in-situ composites at high temperatures. 85-94A
Compressive Strength and Creep Properties of Ir-Nb-Zr Alloys between 1473 and 2073 K. 2207-2215A
Toughness and Strength Characteristics of Nb-W-Si Ternary Alloys Prepared by Arc Melting. 2861-2871A

Computer aided design
In-Situ Reactive Processing of Nickel Aluminides by Laser-Engineered Net Shaping. 2633-2641A

Computer simulation
A transient simulation and dynamic spray cooling control model for continuous steel casting. 297-306B
Computational fluid-dynamics simulation of postcombustion in the electric-arc furnace. 333-343B
Simulation of Macroscopic Solidification with an Incorporated One-Dimensional Microsegregation Model Coupled to Thermodynamic Software. 411-419B
The Prediction and Representation of Phase Equilibria and Physicochemical Properties in Complex Slag Systems. 595-603B
Thermal Analysis of Twin-Channel Induction Furnaces. 679-684B
Heat Transfer and Solidification Model of Continuous Slab Casting: CON1D. 685-705B
X-Ray-Based Measurement of Composition during Electron Beam Melting of AISI 316 Stainless Steel: Part II. Evaporative Processes and Simulation. 863-877A
Studies on Transport Phenomena during Directional Solidification of a Noneutectic Binary Solution Cooled from the Top. 899-909B
Grain growth in a low-loss cold-rolled motor-lamination steel. 1321-1327A
Numerical modeling of the damping capacity of Al/SiC(p). 1387-1391A
Deformation, residual stress, and constitutive relations for quenched W319 aluminum. 1483-1491A
The Importance of Viscoplastic Strain Rate in the Formation of Center Cracks during the Start-Up Phase of Direct-Chill Cast Aluminum Extrusion Ingots. 1941-1952A
Communication: The Effect of Stress State on Cavity Initiation during Hot Working of Ti-6Al-4V. 2397-2400A
Thermophysical Properties of Roll-Compacted Nickel Sheet for High-Density Infrared Sheet Fabrication. 3043-3054A

Consolidation
Dehydrogenation of Nanocrystalline TiH_2 and Consequent Consolidation to Form Dense Ti. 2793-2799A

Contact angle
Studies of the wetting characteristics of liquid iron on dense alumina by the x-ray sessile drop technique. 193-199B
The Contact Angle between Liquid Iron and a Single Crystal, Alumina Substrate at 1873 K: Effects of Oxygen and Droplet Size. 503-508B
Investigation of the Reactions between Oxygen-Containing Iron and SiO_2 Substrate by X -Ray Sessile-Drop Technique. 647-652B

Continuous annealing
Aspects of Orientation-Dependent Grain Growth in Extra-Low Carbon and Interstitial-Free Steels during Continuous Annealing. 827-839A
Recrystallization of a cold-rolled low-carbon steel by cold-plasma-discharge rapid annealing. 1341-1348A

Continuous casting
A transient simulation and dynamic spray cooling control model for continuous steel casting. 297-306B
Modeling of the Solidification Process in a Continuous Casting Installation for Steel Slabs. 455-473B
Heat Transfer and Solidification Model of Continuous Slab Casting: CON1D. 685-705B
Modeling Transient Slag-Layer Phenomena in the Shell/mold Gap in Continuous Casting of Steel. 707-725B

Convection
Marangoni convection driven by thermocapillary and solutocapillary forces in the Fe-O alloy pool during the solidification or remelting process. 37-49B
Studies on Transport Phenomena during Directional Solidification of a Noneutectic Binary Solution Cooled from the Top. 899-909B
A Mushy-Zone Rayleigh Number to Describe Interdendritic Convection during Directional Solidification of Hypoeutectic Pb-Sb and Pb-Sn Alloys. 2365-2376A

Cooling
Improvement in fracture toughness of Ti-4.5Al-3V-2Mo-2Fe through microstructural optimization. 267-275A
On the application of the additivity rule in pearlitic transformation in low alloy steels. 1259-1264A

Cooling curves
Grain refinement of Al-7Si alloys and the efficiency assessment by recognition of cooling curves. 1175-1182A
A solutal interaction mechanism for the columnar-to-equiaxed transition in alloy solidification. 1657-1674A

Cooling rate
Superheat Treatment of Al-7Si-0.55Mg Melt and Its Influences on the Solidification Structures and the Mechanical Properties. 799-806A
Iron Intermetallic Phases in the Al Corner of the Al-Si-Fe System. 807-825A
Effect of microstructure on hydrogen embrittlement of weld-simulated HSLA-80 and HSLA-100 steels. 1297-1309A
Recrystallization of a cold-rolled low-carbon steel by cold-plasma-discharge rapid annealing. 1341-1348A
The role of tin in the hot-ductility deterioration of a low-carbon steel. 1611-1616A
Effect of Cooling Rate on the As-Quenched Microstructure and Mechanical Properties of HSLA-100 Steel Plates. 2493-2504A

Copper, Coatings
Cathodic Deposition of Copper in the Presence of Aqueous Sulfurous Acid, Bivalent Aquacobalt Ion, or Both using a Stainless Steel Cathode and a Graphite Anode. 813-819B

Copper, Composite materials
Composition Control in the Direct Laser-Deposition Process. 439-445B
Morphological stability of copper-silver multilayer thin films at

elevated temperatures. 1043-1054A

Copper, Extraction
Emerging technologies in extraction and processing of metals. 137-152B
Leaching of sulfidized chalcopyrite with H_2SO_4-NaCl-O_2. 153-159B
The Interdisciplinary Nature of Hydrometallurgy. 757-767B

Copper, Mechanical properties
A Composite Model for the Grain-Size Dependence of Yield Stress of Nanograined Materials. 765-772A
Antimony-Induced Embrittlement of [011] Symmetric Tilt Boundaries in Copper Bicrystals. 773-779A

Copper, Microstructure
The evolution of annealing textures in 90 pct drawn copper wire. 531-541A

Copper, Oxidation
Communication: The use of secondary ion mass spectrometry for investigating oxygen in pyrometallurgical reactions. 355-358B

Copper, Powder technology
Effect of Surface Oxide Films on the Properties of Pulse Electric-Current Sintered Metal Powders. 2655-2661A

Copper, Reduction (chemical)
Communication: Nickel, copper, and cobalt slag losses during converting. 121-125B
Arsenate Capacities of Copper Smelting Slags. 565-571B
Hydrogen Reduction of Oxidized Nickel Concentrates. 805-811B
The Rate of Antimony Elimination from Molten Copper by the Use of Na_2CO_3 Slag. 869-879B

Copper, Ternary systems
Phase equilibria of the ternary Al-Cu-Ni system and interfacial reactions of related systems at 800°C. 199-209A
Isothermal Section of the Ternary Sn-Cu-Ni System and Interfacial Reactions in the Sn-Cu/Ni Couples at 800 °C. 2281-2287A

Copper base alloys, Crystal growth
The morphological evolution of dendritic microstructures during coarsening. 481-489A

Copper base alloys, Crystal lattices
Phase transformations in a Cu-14.2Al-7.8Ni alloy. 503-509A

Copper base alloys, Microstructure
Orientation dependence of dislocation structures in cyclically deformed Cu-16 At. Pct Al alloy single crystals. 307-318A

Copper base alloys, Reactions (chemical)
Communication: Activities of Phosphorus in Copper-Nickel Liquid Alloys Saturated with Solid Copper-Nickel Solid Solutions at 1573 K. 741-744B

Copper compounds, Phases (state of matter)
Phase Equilibria and Thermodynamic Properties of the Cu_2O-CaO- Na_2O System in Equilibrium with Copper. 631-638B

Copper compounds, Physical properties
From Viscosity and Surface Tension to Marangoni Flow in Melts. 517-523B

Copper mattes
Communication: Nickel, copper, and cobalt slag losses during converting. 121-125B
Arsenate Capacities of Copper Smelting Slags. 565-571B

Core loss
Effect of temper rolling on texture formation in a low loss cold-rolled magnetic lamination steel. 1311-1319A

Corrosion mechanisms
Microscale investigations of the metal-dusting corrosion mechanism on mild steel. 345-354A
Investigation of the Reactions between Oxygen-Containing Iron and SiO_2 Substrate by X -Ray Sessile-Drop Technique. 647-652B

Corrosion products
Microscale investigations of the metal-dusting corrosion mechanism on mild steel. 345-354A

Corrosion rate
Corrosion of Co-Cr-W Alloy in Liquid Zinc. 881-886B

Corrosion resistance
Corrosion of Co-Cr-W Alloy in Liquid Zinc. 881-886B
Mechanical measurements of passive film fracture on an austenitic stainless steel. 1291-1296A
Effect of n addition on tensile and corrosion behaviors of CD4MCU cast duplex stainless steels. 1617-1625A
Creep Behavior of TiAl Alloys with Enhanced High-Temperature Capability. 2149-2164A

Corrosive wear
On the Wear of a Cobalt-Based Superalloy in Zinc Baths. 2387-2396A

Corundum
Crystal growth in liquid steel during secondary metallurgy. 161-171B

Covellite, Beneficiation
Kinetics of the sulfidation of chalcopyrite with gaseous sulfur. 61-68B

Crack closure
Fatigue Crack Growth in a Particulate TiB_2-Reinforced Powder Metallurgy Iron-Based Composite. 2017-2024A

Crack initiation
A microstructure-based fatigue-crack-initiation model. 43-57A
Morphological healing evolution of intragranular penny-shaped microcracks by surface diffusion: Part II. Experiments. 287-294A
Multiple cracking of tantalum by hydrogenation. 685-690A
High-temperature low-cycle fatigue behavior of K40S cobalt-base superalloy. 979-986A
Mechanical measurements of passive film fracture on an austenitic stainless steel. 1291-1296A
The low-cycle fatigue and fatigue-crack-growth behavior of HAYNES HR-120 alloy. 1451-1460A
The role of the slope out region on fatigue crack initiation in electron beam welded waspaloy. 1637-1645A
The Effect of Solidification Time and Heat Treatment on the Fatigue Properties of a Cast 319 Aluminum Alloy. 1807-1820A
Scatter in Fatigue Life Due to Effects of Porosity in Cast A356-T6 Aluminum-Silicon Alloys. 1879-1890A
Microstructural Effects on the Tensile Properties and Deformation Behavior of a Ti-48Al Gamma Titanium Aluminide. 2113-2127A
Effect of Precyclic Loading on Stress-Corrosion-Cracking Initiation in An X-65 Pipeline Steel Exposed to Near-Neutral pH Soil Environment. 2601-2608A
Crack Initiation and Propagation in 50.9 At. pct Ni-Ti Pseudoelastic Shape-Memory Wires in Bending-Rotation Fatigue. 2847-2860A
Density Changes of Iron during Morphological Healing Evolution of Internal Fatigue Microcracks. 2925-2933A

Crack opening displacement
Bridging mechanisms in a Tiβ21s/SCS-6 composite: in-situ scanning electron microscopy study. 1193-1202A
An Investigation of Contact Deformation, Fracture, and Fatigue Behavior in Bulk Metallic Glasses. 1851-1861A

Crack propagation
Demonstration of an endurance limit in cast 319 aluminum. 33-41A
On the fracture and fatigue properties of Mo-Mo_3Si-Mo_5SiB_2 refractory intermetallic alloys at ambient to elevated temperatures (25°C to 1300°C). 225-239A
Morphological healing evolution of intragranular penny-shaped microcracks by surface diffusion: Part II. Experiments. 287-294A
The influence of microstructure and strain rate on the compressive deformation behavior of Ti-6Al-4V. 295-306A
Multiple cracking of tantalum by hydrogenation. 685-690A
High-temperature low-cycle fatigue behavior of K40S cobalt-base superalloy. 979-986A
Strength of SCS-6 fibers in a Tiβ21s/SCS-6 composite before and after fatigue. 1203-1213A
Analysis of fracture toughness in the transition-temperature region of an Mn-Mo-Ni low-alloy steel. 1275-1281A
Mechanical measurements of passive film fracture on an austenitic stainless steel. 1291-1296A
The low-cycle fatigue and fatigue-crack-growth behavior of HAYNES HR-120 alloy. 1451-1460A
Microstructural evolution and deformation of cryomilled nanocrystalline Al-Ti-Cu alloy. 1473-1481A
Effects of oxidation on the fatigue crack growth resistance and the interfacial properties of a Ti-MMC laminate composite. 1705-1717A
The Effect of Solidification Time and Heat Treatment on the Fatigue Properties of a Cast 319 Aluminum Alloy. 1807-1820A
An Investigation of Contact Deformation, Fracture, and Fatigue Behavior in Bulk Metallic Glasses. 1851-1861A
Scatter in Fatigue Life Due to Effects of Porosity in Cast A356-T6 Aluminum-Silicon Alloys. 1879-1890A
Fatigue Crack Growth in a Particulate TiB_2-Reinforced Powder Metallurgy Iron-Based Composite. 2017-2024A
Microstructure and Fatigue Properties of Hydroformed Aluminum Alloys 6063 and 5754. 2549-2557A
Fatigue Crack Growth Mechanisms in Ti6242 Lamellar Microstructures: Influence of Loading Frequency and Temperature. 2565-2577A
Effect of Precyclic Loading on Stress-Corrosion-Cracking Initiation in An X-65 Pipeline Steel Exposed to Near-Neutral pH Soil Environment. 2601-2608A
Crack Initiation and Propagation in 50.9 At. pct Ni-Ti Pseudoelastic Shape-Memory Wires in Bending-Rotation Fatigue. 2847-2860A
Toughness and Strength Characteristics of Nb-W-Si Ternary Alloys Prepared by Arc Melting. 2861-2871A
Density Changes of Iron during Morphological Healing Evolution of Internal Fatigue Microcracks. 2925-2933A

Cracking (fracturing)
The nucleation of Fe-rich phases on oxide films in Al-11.5Si-0.4Mg cast alloys. 1409-1420A
Damage by Eutectic Particle Cracking in Aluminum Casting Alloys A356/357. 2901-2912A

Creep (materials)
Effect of service-simulated aging on the microstructure and properties of casing casting steel (1CrMoV) vis-a-vis remnant life assessment. 1265-1274A
A Review of Very-High-Temperature Nb-Silicide-Based Composites. 2043-2052A
Effect of Carbon Addition on the Strength and-Creep Resistance of FeAl Alloys. 2233-2246A
Prediction of Limit Strains in Superplastic Materials. 2559-2564A
Fabrication and Creep Properties of Superalloy-Zirconia Composites. 2643-2653A

Creep life
Effect of service-simulated aging on the microstructure and properties of casing casting steel (1CrMoV) vis-a-vis remnant life assessment. 1265-1274A
Creep Behaviors of an Ir-23Nb Alloy at Ultra-high Temperatures. 2217-2221A

Creep rate
Mechanical properties of as-cast and directionally solidified Nb-Mo-W-Ti-Si in-situ composites at high temperatures. 85-94A
Effect of quenching, tempering, and cold rolling on creep deformation behavior of a tempered martensitic 9Cr-1W steel. 913-925A
Effect of service-simulated aging on the microstructure and properties of casing casting steel (1CrMoV) vis-a-vis remnant life assessment. 1265-1274A
Microstructure Stability during Creep Deformation of Hard-Oriented Polysynthetically Twinned Crystal of TiAl Alloy. 2191-2198A
Measurement and Modeling of Creep in Open-Cell NiAl Foams. 2353-2363A
Effect of Prior Oxidation on the Creep Behavior of NiAl-Hard-

ened Austenitic Steel. 2579-2590A

Creep strength
Tensile properties and creep behavior of a new Ti-Al-Nb intermetallic alloy with an O + α_2 microstructure. 633-643A
Precipitation Strengthening in K5-Series γ-TiAl Alloyed with Silicon and Carbon. 2129-2138A
Creep Behavior of TiAl Alloys with Enhanced High-Temperature Capability. 2149-2164A
Microstructure Stability during Creep Deformation of Hard-Oriented Polysynthetically Twinned Crystal of TiAl Alloy. 2191-2198A
Compressive Strength and Creep Properties of Ir-Nb-Zr Alloys between 1473 and 2073 K. 2207-2215A
Creep Behaviors of an Ir-23Nb Alloy at Ultra-high Temperatures. 2217-2221A
Effect of Prior Oxidation on the Creep Behavior of NiAl-Hardened Austenitic Steel. 2579-2590A
Creep of Aluminum-Based Closed-Cell Foams. 2809-2817A

Creep tests
Primary Creep Behavior of Ti-48Al-2W as a Function of Stress and Lamellar Morphology. 2177-2190A
Compressive Strength and Creep Properties of Ir-Nb-Zr Alloys between 1473 and 2073 K. 2207-2215A
Creep of Aluminum-Based Closed-Cell Foams. 2809-2817A

Critical temperature
Analysis of the mechanism of die soldering in aluminum die casting. 139-146A
Precipitation of Heusler phase (Ni_2TiAl) from B2-TiNi in Ni-Ti-Al and Ni-Ti-Al-x (x = Hf, Zr) Alloys. 1221-1234A
Thermodynamic Calculations for Nb-Containing High-Speed Steels and White Cast-Iron Alloys. 1749-1758A
Effects of Ternary Additions on the Thermoelastic Martensitic Transformation of NiAl. 2089-2095A

Cryolite, Reactions (chemical)
Solubility of alumina in cryolite melts: measurements and modeling at 1300 K. 235-242B

Crystal defects
Measurement of the lattice misfit of the nickel-base superalloy SC16 by high-energy synchrotron radiation. 193-197A
The Thermal Behavior of Mechanically Activated Galena by Thermogravimetry Analysis. 793-797A
Effect of hydrogen charging on dislocation behavior in Ni-Cr and Ni_2Cr alloys. 1249-1257A

Crystal structure
Crystal growth in liquid steel during secondary metallurgy. 161-171B
Orientation dependence of dislocation structures in cyclically deformed Cu-16 At. Pct Al alloy single crystals. 307-318A
Communication: Effects of grain size and pressing speed on the deformation mode of commercially pure Ti during equal channel angular pressing. 1555-1558A
The Role of Nitrogen on the Deformation Response of Hadfield Steel Single Crystals. 1821-1831A
Communication: Recrystallization Textures of Continuous Cast AA 3015 Alloy: Development of the P Orientation {111}<566>. 2029-2032A
Precipitation Strengthening of the Aluminum Alloy AA6111. 2913-2924A

Crystallography
Communication: Focused ion beam milling: A practical method for preparing cast Al-Si alloy samples for transmission electron microscopy. 705-707A
Martensite Crystallography - the Apparent Controversy between the Infinitesimal Deformation Approach and the Phenomenological Theory of Martensitic Transformations. 1783-1786A
Improving the Fracture Toughness of Constituent Phases and Nb-Based In Situ Composites by a Computational Alloy Design Approach. 1833-1849A

Cube texture
Texture and grain-boundary evolutions of continuous cast and direct chill cast AA 5052 aluminum alloy during cold rolling. 951-966A
Effect of initial texture on texture evolution in 1050 Al alloys under simple shear. 1675-1681A
Communication: Recrystallization Textures of Continuous Cast AA 3015 Alloy: Development of the P Orientation {111}<566>. 2029-2032A
Grain-Boundary Character Distribution in Recrystallized $L1_2$ Ordered Intermetallic Alloys. 2429-2439A

Cubic lattice
Measurement and Modeling of Creep in Open-Cell NiAl Foams. 2353-2363A

Current density
Numerical analysis of metal transfer in gas metal arc welding. 345-353B
Cathodic Deposition of Copper in the Presence of Aqueous Sulfurous Acid, Bivalent Aquacobalt Ion, or Both using a Stainless Steel Cathode and a Graphite Anode. 813-819B

Current efficiency
Cathodic Deposition of Copper in the Presence of Aqueous Sulfurous Acid, Bivalent Aquacobalt Ion, or Both using a Stainless Steel Cathode and a Graphite Anode. 813-819B

Curvature
Mechanical and Physical Properties of High Velocity Oxy-Fuel-Sprayed Iron Aluminide Coatings. 2223-2231A

Cyclic loads
Effect of Precyclic Loading on Stress-Corrosion-Cracking Initiation in An X-65 Pipeline Steel Exposed to Near-Neutral pH Soil Environment. 2601-2608A

Damage
Hydride embrittlement and irradiation effects on the hoop mechanical properties of pressurized water reactor (PWR) and boiling-water reactor (BWR) ZIRCALOY cladding tubes: Part I. Hydride embrittlement in stress-relieved, annealed, and recrystallized ZIRCALOYs at 20°C and 300°C. 553-566A
Hydride embrittlement and irradiation effects on the hoop mechanical properties of pressurized water reactor (PWR) and boiling-water reactor (BWR) ZIRCALOY cladding tubes: Part II. Morphology of hydrides investigated at different magnifications and their interaction with the processes of plastic deformation. 567-578A
Hydride embrittlement and irradiation effects on the hoop mechanical properties of pressurized water reactor (PWR) and boiling-water reactor (BWR) ZIRCALOY cladding tubes: Part III. Mechanical behavior of hydride in stress-relieved annealed and recrystallized ZIRCALOYs at 20°C and 300°C. 579-588A
Deformation Mechanisms in Ti-6Al-4V/TiC Composites. 1869-1877A
Communication: The Effect of Stress State on Cavity Initiation during Hot Working of Ti-6Al-4V. 2397-2400A
Damage by Eutectic Particle Cracking in Aluminum Casting Alloys A356/357. 2901-2912A

Damping capacity
Numerical modeling of the damping capacity of Al/SiC(p). 1387-1391A

Debonding
X-ray photoelectron spectroscopy and scanning auger microprobe studies on oxidation-induced embrittlement mechanism of liquid-phase-sintered 95W-Ni-Fe alloy. 355-359A
Bridging mechanisms in a Tiβ21s/SCS-6 composite: in-situ scanning electron microscopy study. 1193-1202A
Toughness and Strength Characteristics of Nb-W-Si Ternary Alloys Prepared by Arc Melting. 2861-2871A

Decarburizing
Desiliconization and Decarburization Behavior of Molten Fe-C-Si(-S) Alloy with CO_2 and O_2. 861-867B

Decomposition
The Thermal Behavior of Mechanically Activated Galena by Thermogravimetry Analysis. 793-797A

Defects
Stabilization of Thermosolutal Convective Instabilities in Ni-Based Single-Crystal Superalloys: Carbide Precipitation and Rayleigh Numbers. 1953-1967A

Deformation
Influence of thermomechanical treatments on the microstructure and mechanical properties of HSLA-100 steel plates. 241-253A
The influence of microstructure and strain rate on the compressive deformation behavior of Ti-6Al-4V. 295-306A
A constitutive description of an aluminum-0.32 pct iron under hot-deformation conditions. 319-326A
Effects of indium on the mechanical properties of ternary Sn-In-Ag solders. 361-365A
Observation of cold-rolling texture and partially recrystallized texture in polycrystalline 3 pct Si-Fe by high-resolution electron backscattered diffraction. 403-408A
The effect of the strain path on the work hardening of austenitic and ferritic stainless steels in axisymmetric drawing. 589-601A
Mechanisms of globularization of Ti-6Al-4V during static heat treatment. 691-698A
Mechanically induced solid-state devitrifications of $Zr_{70}Pd_{20}Ni_{10}$ glassy alloy powders. 893-898A
Effect of quenching, tempering, and cold rolling on creep deformation behavior of a tempered martensitic 9Cr-1W steel. 913-925A
Texture and grain-boundary evolutions of continuous cast and direct chill cast AA 5052 aluminum alloy during cold rolling. 951-966A
Effect of rolling temperature on the deformation and recrystallization textures of warm-rolled steels. 1163-1174A
A neutron diffraction and modeling study of uniaxial deformation in polycrystalline beryllium. 1439-1449A
Deformation, residual stress, and constitutive relations for quenched W319 aluminum. 1483-1491A
Effect of deformation schedule on the microstructure and mechanical properties of a thermomechanically processed C-Mn-Si transformation-induced plasticity steel. 1599-1609A
An Investigation of Contact Deformation, Fracture, and Fatigue Behavior in Bulk Metallic Glasses. 1851-1861A
Development and Elemental Powder Metallurgy of a Y-Containing Two-Phase TiAl Alloy. 2077-2087A
Precipitation Strengthening in K5-Series γ-TiAl Alloyed with Silicon and Carbon. 2129-2138A
A Method for Measuring Microstructural-Scale Strains Using a Scanning Electron Microscope: Applications to γ-Titanium Aluminides. 2301-2313A
Microstructure Development during Hot Deformation of Aluminum to Large Strains. 2737-2744A

Deformation mechanisms
Relationship between tensile and shear strengths of the mushy zone in solidifying aluminum alloys. 105-113A
A Composite Model for the Grain-Size Dependence of Yield Stress of Nanograined Materials. 765-772A
Effect of hydrogen charging on dislocation behavior in Ni-Cr and Ni_2Cr alloys. 1249-1257A
Deformation Mechanisms in Ti-6Al-4V/TiC Composites. 1869-1877A
High-Temperature Deformation Behavior of a Gamma TiAl Alloy- Microstructural Evolution and Mechanisms. 2165-2176A
Mutual Effects of Hydrogenation and Deformation in Ti-Nb Alloys. 2199-2206A
Compressive Strength and Creep Properties of Ir-Nb-Zr Alloys between 1473 and 2073 K. 2207-2215A
The Effect of Severe Marforming on Shape Memory Characteristics of a Ti-Rich NiTi Alloy Processed Using Equal Channel Angular Extrusion. 2527-2539A

Degradation
Effects of TiC composite coating on electrode degradation in microresistance welding of nickel-plated steel.

Communication: Thermal Conductivity of Cobalt-Base Alloys. 2026-2028A
Creep Behavior of TiAl Alloys with Enhanced High-Temperature Capability. 2149-2164A
Fundamental Considerations for the Development of Oxidation-Resistant Alloys and Coatings Based on γ-TiAl. 2247-2251A

Dehydrogenation
Dehydrogenation of Nanocrystalline TiH_2 and Consequent Consolidation to Form Dense Ti. 2793-2799A

Dendritic structure
Growth of solutal dendrites: a cellular automaton model and its quantitative capabilities. 367-382A
Cellular-to-dendritic transition during the directional solidification of binary alloys. 395-401A
Simulation of Macroscopic Solidification with an Incorporated One-Dimensional Microsegregation Model Coupled to Thermodynamic Software. 411-419B
Dendritic growth with fluid flow in pure materials. 459-466A
Last-stage solidification of alloys: theoretical model of dendrite-arm and grain coalescence. 467-479A
The morphological evolution of dendritic microstructures during coarsening. 481-489A
Heat flow parameters affecting dendrite spacings during unsteady-state solidification of Sn-Pb and Al-Cu alloys. 995-1006A
The microstructure and fracture behavior of the dissimilar alloy 690-SUS 304L joint with various Nb addition. 1097-1105A
The effect of grain refining on macrosegregation and dendrite arm spacing of direct chill cast AA5182. 1513-1523A
A solutal interaction mechanism for the columnar-to-equiaxed transition in alloy solidification. 1657-1674A
Investigation of Dendrite-Boundary Microchemistry in Alloy 182 using Auger Electron Spectroscopy Analysis. 1891-1899A
Study of Microstructure and Solute Partitioning in a Cast Ti-48Al-2Cr-2Nb Alloy by Quenching during Directional Solidification Technique. 2139-2148A
A Mushy-Zone Rayleigh Number to Describe Interdendritic Convection during Directional Solidification of Hypoeutectic Pb-Sb and Pb-Sn Alloys. 2365-2376A
Communication: On the Atomistic Theory of Solidification. 2683-2688A
Microstructural Effects on the Tensile and Fracture Behavior of Aluminum Casting Alloys A356/357. 2887-2899A
Effect of Crucible Diameter Reduction on the Convection, Macrosegregation, and Dendritic Morphology during Directional Solidification of Pb-2.2 Wt Pct Sb Alloy. 2985-2990A
Hot Working and Recrystallization of As-Cast 317L. 3021-3041A

Densification
Titanium-Titanium Boride (Ti-TiB) Functionally Graded Materials through Reaction Sintering: Synthesis, Microstructure, and Properties. 1993-2003A
Dehydrogenation of Nanocrystalline TiH_2 and Consequent Consolidation to Form Dense Ti. 2793-2799A

Density
Thermal Conductivities of Molten Iron, Cobalt, and Nickel by Laser Flash Method. 2801-2807A
Density Changes of Iron during Morphological Healing Evolution of Internal Fatigue Microcracks. 2925-2933A
Thermophysical Properties of Roll-Compacted Nickel Sheet for High-Density Infrared Sheet Fabrication. 3043-3054A

Dental alloys, Thermal properties
Finite-element analysis of effects of the laser-processed bimaterial component size on stresses and distortion. 1133-1145A

Depletion
Effect of sulfides on gold dissolution in ammoniacal thiosulfate medium. 5-13B

Depolarization
Cathodic Deposition of Copper in the Presence of Aqueous Sulfurous Acid, Bivalent Aquacobalt Ion, or Both using a Stainless Steel Cathode and a Graphite Anode. 813-819B

Desensitization
The Effects of Cold Working on Sensitization and Intergranular Corrosion Behavior of AISI 304 Stainless Steel. 2441-2447A

Desiliconizing
Desiliconization and Decarburization Behavior of Molten Fe-C-Si(-S) Alloy with CO_2 and O_2. 861-867B

Desorption
Mutual Effects of Hydrogenation and Deformation in Ti-Nb Alloys. 2199-2206A

Desulfurizing
Improvement of Desulfurization Efficiency of Molten Iron with Magnesium Vapor Produced In Situ by Aluminothermic Reduction of Magnesium Oxide. 619-629B

Deterioration
The role of tin in the hot-ductility deterioration of a low-carbon steel. 1611-1616A

Devitrification
Mechanically induced solid-state devitrifications of $Zr_{70}Pd_{20}Ni_{10}$ glassy alloy powders. 893-898A

Diamond pyramid hardness
Mechanical properties of as-cast and directionally solidified Nb-Mo-W-Ti-Si in-situ composites at high temperatures. 85-94A
Effect of service-simulated aging on the microstructure and properties of casing casting steel (1CrMoV) vis-a-vis remnant life assessment. 1265-1274A
Titanium-Titanium Boride (Ti-TiB) Functionally Graded Materials through Reaction Sintering: Synthesis, Microstructure, and Properties. 1993-2003A

Die castings, Soldering
Analysis of the mechanism of die soldering in aluminum die casting. 139-146A

Die steels, Composite materials
Composition Control in the Direct Laser-Deposition Process. 439-445B

Differential scanning calorimetry
A study of microsegregation in Al-Cu using a novel single-pan scanning calorimeter. 441-447A

Diffusion welding
Diffusion bonding of Si_3N_4-TiN composite with nickel-based interlayers. 1627-1636A

Diffusivity
Communication: The Entropy Factor in Liquid Diffusion. 882-883A
A Mushy-Zone Rayleigh Number to Describe Interdendritic Convection during Directional Solidification of Hypoeutectic Pb-Sb and Pb-Sn Alloys. 2365-2376A
Microstructure Evolution during Alpha-Beta Heat Treatment of Ti-6Al-4V. 2377-2386A

Direct chill casting
Modeling of Ingot Development during the Start-Up Phase of Direct Chill Casting. 727-734B
Texture and grain-boundary evolutions of continuous cast and direct chill cast AA 5052 aluminum alloy during cold rolling. 951-966A
The effect of grain refining on macrosegregation and dendrite arm spacing of direct chill cast AA5182. 1513-1523A
Microstructure and fatigue characteristics of direct chill cast and electromagnetic cast 2024 Al alloy ingots. 1537-1543A
The Importance of Viscoplastic Strain Rate in the Formation of Center Cracks during the Start-Up Phase of Direct-Chill Cast Aluminum Extrusion Ingots. 1941-1952A

Direct reduced iron, Reduction (chemical)
Mathematical model of COREX melter gasifier: Part I. Steady-state model. 103-114B

Direct reduction
Estimation and modeling of parameters for direct reduction in iron ore/coal composites: Part I. Physical parameters. 93-102B
Mathematical model of COREX melter gasifier: Part I. Steady-state model. 103-114B
Estimation and modeling of parameters for direct reduction in iron ore/coal composites: part II. Kinetic parameters. 255-266B
Calciothermic reduction of titanium oxide and in-situ electrolysis in molten $CaCl_2$. 287-295B

Directional solidification
Studies on Transport Phenomena during Directional Solidification of a Noneutectic Binary Solution Cooled from the Top. 899-909B
Communication: Further discussion on the free growth behavior in the solidification of undercooled eutectic melts. 1393-1396A

Directionally solidified eutectics
The effect of Marangoni convection on fibrous monotectic growth. 449-457A
The morphological evolution of dendritic microstructures during coarsening. 481-489A

Directionally solidified eutectics, Crystal growth
A new analytical approach to predict spacing selection in lamellar and rod eutectic systems. 383-394A

Directionally solidified eutectics, Mechanical properties
Mechanical properties of as-cast and directionally solidified Nb-Mo-W-Ti-Si in-situ composites at high temperatures. 85-94A

Disintegration
Microscale investigations of the metal-dusting corrosion mechanism on mild steel. 345-354A

Dislocation density
Hot working and recrystallization of as-cast 316L. 1683-1703A
Mechanical and Physical Properties of High Velocity Oxy-Fuel-Sprayed Iron Aluminide Coatings. 2223-2231A

Dislocation loops
Effect of hydrogen charging on dislocation behavior in Ni-Cr and Ni_2Cr alloys. 1249-1257A

Dislocation mobility
Primary Creep Behavior of Ti-48Al-2W as a Function of Stress and Lamellar Morphology. 2177-2190A
Relationships of Fracture Toughness and Dislocation Mobility in Intermetallics. 2315-2328A

Dislocations
Orientation dependence of dislocation structures in cyclically deformed Cu-16 At. Pct Al alloy single crystals. 307-318A
Delta-Ferrite Recovery Structures in Low-Carbon Steels. 495-501B
Mechanisms of globularization of Ti-6Al-4V during static heat treatment. 691-698A
Communication: Mechanical milling-induced deformation twinning in fcc materials with high stacking fault energy. 707-712A
Coarsening kinetics of multicomponent MC-type carbides in high-strength low-alloy steels. 1565-1573A
The Role of Nitrogen on the Deformation Response of Hadfield Steel Single Crystals. 1821-1831A
Work-Hardening and Recovery Mechanisms in Gamma-Based Titanium Aluminides. 2103-2111A
Creep Behavior of TiAl Alloys with Enhanced High-Temperature Capability. 2149-2164A
Primary Creep Behavior of Ti-48Al-2W as a Function of Stress and Lamellar Morphology. 2177-2190A
Relationships of Fracture Toughness and Dislocation Mobility in Intermetallics. 2315-2328A
Grain-Size Effects on Tensile Behavior of Nickel and AISI 316L Stainless Steel. 2329-2340A
The Effect of Severe Marforming on Shape Memory Characteristics of a Ti-Rich NiTi Alloy Processed Using Equal Channel Angular Extrusion. 2527-2539A
A Constitutive Description for Aluminum-0.1 Pct Magnesium

Alloy under Hot Working Conditions. 2837-2846A
Toughness and Strength Characteristics of Nb-W-Si Ternary Alloys Prepared by Arc Melting. 2861-2871A
Hot Working and Recrystallization of As-Cast 317L. 3021-3041A

Dispersion
Nanocrystalline Ni coatings strengthened with ultrafine particles. 673-683A

Dispersion hardening
Damage by Eutectic Particle Cracking in Aluminum Casting Alloys A356/357. 2901-2912A

Dispersions
Communication: The coarsening of dispersed Al_3Ti in aluminum-based matrices. 419-421A
Investigation of Microstructural Changes in INCONEL 706 at High Temperatures by In-Situ Small-Angle Neutron Scattering. 2781-2792A

Dissimilar materials, Mechanical properties
Fabrication and Creep Properties of Superalloy-Zirconia Composites. 2643-2653A

Dissimilar metals, Welding
The microstructure and fracture behavior of the dissimilar alloy 690-SUS 304L joint with various Nb addition. 1097-1105A

Dissolution
Effect of sulfides on gold dissolution in ammoniacal thiosulfate medium. 5-13B
Morphology and kinetics of discontinuous precipitation and dissolution in an Fe-8.5Al-27Mn-1.0Si-0.92C alloy. 25-31A
Static and dynamic energy absorption of Al foams produced by the sintering and dissolution process. 69-74B
Communication: Nonisothermal growth and dissolution of inclusions in liquid steels. 267-269B
Communication: The coarsening of dispersed Al_3Ti in aluminum-based matrices. 419-421A
Resistance to shape refinement of precipitates in Al-(Si,Ge) alloys during thermal cycling. 543-551A
The Effect of Salt-Phase Composition on the Rate of Soda-Ash Roasting of Chromite Ores. 555-563B
Communication: A Surface Reaction Kinetic Model to Compare the Reductive Leaching of Iron from Goethite, Magnetite, and Limonitic Nickel Laterite Ores by Acidic Sulfur Dioxide. 735-738B
Corrosion of Co-Cr-W Alloy in Liquid Zinc. 881-886B
Deep filtration of molten aluminum using ceramic foam filters and ceramic particles with active coatings. 1183-1191A
Reactive synthesis of in-situ $ZrAl_3$-Al_2O_3-Al composites. 1357-1360A
Microstructure Stability during Creep Deformation of Hard-Oriented Polysynthetically Twinned Crystal of TiAl Alloy. 2191-2198A
Effect of Precyclic Loading on Stress-Corrosion-Cracking Initiation in An X-65 Pipeline Steel Exposed to Near-Neutral pH Soil Environment. 2601-2608A

Distortion
Finite-element analysis of effects of the laser-processed bimaterial component size on stresses and distortion. 1133-1145A
Coherent γ'-precipitates at singular and rough grain boundaries in a model Ni-base superalloy. 1433-1437A

Drawability
Effect of initial texture on texture evolution in 1050 Al alloys under simple shear. 1675-1681A

Ductile brittle transition
Hydride embrittlement and irradiation effects on the hoop mechanical properties of pressurized water reactor (PWR) and boiling-water reactor (BWR) ZIRCALOY cladding tubes: Part I. Hydride embrittlement in stress-relieved, annealed, and recrystallized ZIRCALOYs at 20°C and 300°C. 553-566A
Effects of test temperature and grain size on the Charpy impact toughness and dynamic toughness (K_{ID}) of polycrystalline niobium. 967-976A
Analysis of fracture toughness in the transition-temperature region of an Mn-Mo-Ni low-alloy steel. 1275-1281A
Properties of TiAl sheet pack-rolled at temperatures below 1000°C. 1329-1339A
Synergetic Effect of Hardness and Phosphorus Grain-Boundary Segregation on the Ductile-to-Brittle Transition Temperature of 17-4 PH Steel. 2483-2491A
Communication: Effects of Cooling Rate on Aging at 475 °C of an Oxide-Dispersion-Strengthened Ferritic Steel. 2681-2683A
Microstructural Effects on the Tensile and Fracture Behavior of Aluminum Casting Alloys A356/357. 2887-2899A

Ductility
Mechanical properties of as-cast and directionally solidified Nb-Mo-W-Ti-Si in-situ composites at high temperatures. 85-94A
Influence of composition, Sr modification, and annealing treatment on the structure and properties of cast Al-4 pct Mg alloys. 115-129A
Mechanical properties of an ultrafine-grained Al-7.5 Pct Mg alloy. 603-613A
Aging response of the young's modulus and mechanical properties of Ti-29Nb-13Ta-4.6Zr for biomedical applications. 1007-1012A
Effect of material damage on forming limits of voided anisotropic sheet metals. 1283-1290A
Effect of microstructure on hydrogen embrittlement of weld-simulated HSLA-80 and HSLA-100 steels. 1297-1309A
Microstructural evolution and deformation of cryomilled nanocrystalline Al-Ti-Cu alloy. 1473-1481A
The role of tin in the hot-ductility deterioration of a low-carbon steel. 1611-1616A
Microstructural Effects on the Tensile Properties and Deformation Behavior of a Ti-48Al Gamma Titanium Aluminide. 2113-2127A
Primary Creep Behavior of Ti-48Al-2W as a Function of Stress and Lamellar Morphology. 2177-2190A
Effect of Carbon Addition on the Strength and-Creep Resistance of FeAl Alloys. 2233-2246A
Relationships of Fracture Toughness and Dislocation Mobility in Intermetallics. 2315-2328A
Microstructure and Fatigue Properties of Hydroformed Aluminum Alloys 6063 and 5754. 2549-2557A
Prediction of Limit Strains in Superplastic Materials. 2559-2564A
Effect of Prior Oxidation on the Creep Behavior of NiAl-Hardened Austenitic Steel. 2579-2590A
Fabrication of Ultrahigh Nitrogen Austenitic Steels by Nitrogen Gas Absorption into Solid Solution. 2591-2599A
Microstructural Effects on the Tensile and Fracture Behavior of Aluminum Casting Alloys A356/357. 2887-2899A

Duplex stainless steels, Casting
The critical amount of nitrogen on the formation of nitrogen gas pores during solidification of 25Cr-7Ni duplex stainless steels. 313-320B

Duplex stainless steels, Corrosion
Effect of n addition on tensile and corrosion behaviors of CD4MCU cast duplex stainless steels. 1617-1625A

Duplex stainless steels, Crystal growth
The relationship between chromium nitride and secondary austenite precipitation in duplex stainless steels. 1575-1597A

Duplex stainless steels, Mechanical properties
Effect of nitrogen content on the environmentally-assisted cracking susceptibility of duplex stainless steels. 95-103A

Duplex stainless steels, Structural hardening
Static Strain Aging Phenomena in Cold-Rolled Dual-Phase Steels. 781-792A

Duplex stainless steels, Welding
Nitrogen absorption by iron and stainless steels during CO_2 laser welding. 75-82B

Dust, Recycling
Dusts, Scale, Slags, Sludges...Not Wastes, But Sources of Profits. 769-779B

Dynamic recrystallization
Hot working and recrystallization of as-cast 316L. 1683-1703A
High-Temperature Deformation Behavior of a Gamma TiAl Alloy- Microstructural Evolution and Mechanisms. 2165-2176A
Hot Working and Recrystallization of As-Cast 317L. 3021-3041A

Dysprosium, Binary systems
The Dy-Zn Phase Diagram. 743-750A

Elastic constants
Elastic Constants of Face-Centered Cubic and $L1_2$ Ni-Si Alloys: Composition and Temperature Dependence. 1863-1868A
Thermodynamics of Stress-induced Interstitial Redistribution in Body-Centered Cubic Metals. 2819-2825A

Elasticity
Relaxation mechanisms in Fe-Al-C alloys. 255-266A
Active Solute Effects on Surface Ripples in Electron-Beam Welding Solidification. 421-432B
Microstructure evolution in three-dimensional inhomogeneous elastic media. 1421-1431A
Elasto-Plastic Load Transfer in Bulk Metallic Glass Composites Containing Ductile Particles. 1787-1797A
Titanium-Titanium Boride (Ti-TiB) Functionally Graded Materials through Reaction Sintering: Synthesis, Microstructure, and Properties. 1993-2003A

Electric arc furnaces
Computational fluid-dynamics simulation of postcombustion in the electric-arc furnace. 333-343B

Electric arc melting
Toughness and Strength Characteristics of Nb-W-Si Ternary Alloys Prepared by Arc Melting. 2861-2871A

Electric induction furnaces, Physical properties
Thermal Analysis of Twin-Channel Induction Furnaces. 679-684B

Electric power generation
Measurement of the lattice misfit of the nickel-base superalloy SC16 by high-energy synchrotron radiation. 193-197A
Effect of service-simulated aging on the microstructure and properties of casing casting steel (1CrMoV) vis-a-vis remnant life assessment. 1265-1274A

Electrodeposition
Cathodic Deposition of Copper in the Presence of Aqueous Sulfurous Acid, Bivalent Aquacobalt Ion, or Both using a Stainless Steel Cathode and a Graphite Anode. 813-819B

Electrodes, Corrosion
Effects of TiC composite coating on electrode degradation in microresistance welding of nickel-plated steel. 1501-1511A

Electrolysis
Calciothermic reduction of titanium oxide and in-situ electrolysis in molten $CaCl_2$. 287-295B

Electrolytes
The Use of Solid Electrolytes in the Determination of Activities and the Development of Sensors. 589-594B

Electromagnetism
Asymptotic approximation and numerical simulation of electromagnetic casting. 83-91B

Electron beam melting
Mathematical Modeling of Aluminum Evaporation During Electron-Beam Cold-Hearth Melting of Ti-6Al-4V Ingots. 447-454B
X-Ray-Based Measurement of Composition during Electron Beam Melting of AISI 316 Stainless Steel: Part I. Experimental Setup and Processing of Spectra. 851-861A
X-Ray-Based Measurement of Composition during Electron Beam Melting of AISI 316 Stainless Steel: Part II. Evapora-

tive Processes and Simulation. 863-877A
Communication: Evaluation of Evaporation Losses during Electron-Beam Melting of Ti-Al-V Alloys. 911-915B

Electron beam welding
Active Solute Effects on Surface Ripples in Electron-Beam Welding Solidification. 421-432B
The role of the slope out region on fatigue crack initiation in electron beam welded waspaloy. 1637-1645A
Residual Stresses in an Electron Beam Weld of Ti-834: Characterization and Numerical Modeling. 2935-2946A

Electropolishing
Communication: Focused ion beam milling: A practical method for preparing cast Al-Si alloy samples for transmission electron microscopy. 705-707A

Elimination
The Rate of Antimony Elimination from Molten Copper by the Use of Na_2CO_3 Slag. 869-879B

Elongated structure
Microstructural evolution and deformation of cryomilled nanocrystalline Al-Ti-Cu alloy. 1473-1481A

Elongation
Effects of indium on the mechanical properties of ternary Sn-In-Ag solders. 361-365A
Microstructure and Texture of Hot-Rolled Cb-Ti and V-Cb Microalloyed Steels with Differences in Formability and Toughness. 2341-2351A
Fabrication of Ultrahigh Nitrogen Austenitic Steels by Nitrogen Gas Absorption into Solid Solution. 2591-2599A

Embrittlement
X-ray photoelectron spectroscopy and scanning auger microprobe studies on oxidation-induced embrittlement mechanism of liquid-phase-sintered 95W-Ni-Fe alloy. 355-359A
Microstructural effects on moisture-induced embrittlement of isothermally forged TiAl-based intermetallic alloys. 645-655A
Antimony-Induced Embrittlement of [011] Symmetric Tilt Boundaries in Copper Bicrystals. 773-779A
The long-term aging embrittlement of Fe-12Cr steels below 773 K. 927-934A
Fundamental Considerations for the Development of Oxidation-Resistant Alloys and Coatings Based on γ-TiAl. 2247-2251A
Electron Microscopy Study on the Grain-Boundary Precipitation during Aging of Fe-10Ni-5Mn Steel. 2421-2428A
Investigation of a Directionally Solidified NiAl/Cr(Mo) Composite Alloyed with Hf. 2663-2670A
Communication: Effects of Cooling Rate on Aging at 475 °C of an Oxide-Dispersion-Strengthened Ferritic Steel. 2681-2683A

Emissivity
Thermophysical Properties of Roll-Compacted Nickel Sheet for High-Density Infrared Sheet Fabrication. 3043-3054A

Energy dispersive X ray analysis
X-Ray-Based Measurement of Composition during Electron Beam Melting of AISI 316 Stainless Steel: Part I. Experimental Setup and Processing of Spectra. 851-861A
X-Ray-Based Measurement of Composition during Electron Beam Melting of AISI 316 Stainless Steel: Part II. Evaporative Processes and Simulation. 863-877A

Engines, Coating
Communication: Residual stress distribution in electron beam-physical vapor deposited ZrO_2 thermal barrier coating layer by Raman spectroscopy. 1739-1741A

Enrichment
Kinetics of In-Situ Formation of AlN in Al Alloy Melts by Bubbling Ammonia Gas. 793-804B

Enthalpy
Enthalpy of formation and heat capacity of Fe-Mn alloys. 209-223B
A study of microsegregation in Al-Cu using a novel single-pan scanning calorimeter. 441-447A
Communication: Discussion of "The Solubility of Sodium in Liquid Aluminum". 744-746B
Communication: Authors' Reply. 746-748B
Microstructure and fatigue characteristics of direct chill cast and electromagnetic cast 2024 Al alloy ingots. 1537-1543A
The Thermodynamics of Tetrataenite and Awaruite: A Review of the Fe-Ni Phase Diagram. 1759-1769A
Thermodynamic Investigation of the A2/B2 Region of the Fe-Al System by Knudsen Effusion Mass Spectrometry. 2409-2419A

Entrainment
Marangoni Flow at the Gas/Melt Interface of Steel. 483-493B
Entrainment of a Two-Layer Liquid through a Taphole. 821-832B

Entropy
Communication: Discussion of "The Solubility of Sodium in Liquid Aluminum". 744-746B
Communication: Authors' Reply. 746-748B
The Thermodynamics of Tetrataenite and Awaruite: A Review of the Fe-Ni Phase Diagram. 1759-1769A
Thermodynamic Investigation of the A2/B2 Region of the Fe-Al System by Knudsen Effusion Mass Spectrometry. 2409-2419A

Epoxy resins, Composite materials
Communication: Spray deposited metal-carbon fiber reinforced polymer hybrid structures. 421-424A

Equal channel angular pressing
Mechanical properties of iron processed by severe plastic deformation. 71-83A
Communication: Effects of grain size and pressing speed on the deformation mode of commercially pure Ti during equal channel angular pressing. 1555-1558A
Effect of initial texture on texture evolution in 1050 Al alloys under simple shear. 1675-1681A

Equiaxed structure
Permeability measurements of the flow of interdendritic liquid in equiaxed aluminum-silicon alloys. 25-28B
The influence of microstructure and strain rate on the compressive deformation behavior of Ti-6Al-4V. 295-306A
Precipitation of aluminum in the silicon phase contained in w319 and 356 aluminum alloys. 523-529A
Resistance to shape refinement of precipitates in Al-(Si,Ge) alloys during thermal cycling. 543-551A
Nanocrystalline Ni coatings strengthened with ultrafine particles. 673-683A
Evaluation of a Rayleigh-number-based freckle criterion for Pb-Sn alloys and Ni-base superalloys. 1525-1536A
A solutal interaction mechanism for the columnar-to-equiaxed transition in alloy solidification. 1657-1674A
Nanostructure in an Al-Mg-Sc Alloy Processed by Low-Energy Ball Milling at Cryogenic Temperature. 1985-1992A

Equilibrium
Phase-equilibrium data and liquidus for the system 'MnO'-CaO-Al_2O_3-SiO_2 at Al_2O_3/SiO_2 of 0.55 and 0.65. 173-182B
Phase equilibria of the ternary Al-Cu-Ni system and interfacial reactions of related systems at 800°C. 199-209A
Phase equilibria in prototype Nb-Pd-Hf-Al alloys 1771-1782A

Erosion
Thermal Analysis of Twin-Channel Induction Furnaces. 679-684B

Etching
A Novel Inclusion Inspection Method Employing 20 kHz Fatigue Testing. 2517-2526A

Eutectic composition
Investigation of 'shock-induced' and 'shock-assisted' chemical reactions in Mo + 2Si powder mixtures. 15-23A

Eutectic reactions
The effect of Marangoni convection on fibrous monotectic growth. 449-457A
Nucleation-Controlled Microstructures and Anomalous Eutectic Formation in Undercooled Co-Sn and Ni-Si Eutectic Melts. 2999-3008A

Eutectics
The Dy-Zn Phase Diagram. 743-750A
Communication: Further discussion on the free growth behavior in the solidification of undercooled eutectic melts. 1393-1396A
Communication: Discussion of "Eutectic Solidification of Al-Si Alloys". 2688-2690A
Communication: Authors' Reply. 2690-2693A

Evaporation
Mathematical Modeling of Aluminum Evaporation During Electron-Beam Cold-Hearth Melting of Ti-6Al-4V Ingots. 447-454B
X-Ray-Based Measurement of Composition during Electron Beam Melting of AISI 316 Stainless Steel: Part I. Experimental Setup and Processing of Spectra. 851-861A
X-Ray-Based Measurement of Composition during Electron Beam Melting of AISI 316 Stainless Steel: Part II. Evaporative Processes and Simulation. 863-877A
Communication: Evaluation of Evaporation Losses during Electron-Beam Melting of Ti-Al-V Alloys. 911-915B

Extractive metallurgy
Emerging technologies in extraction and processing of metals. 137-152B

Extrusion ingots
The Importance of Viscoplastic Strain Rate in the Formation of Center Cracks during the Start-Up Phase of Direct-Chill Cast Aluminum Extrusion Ingots. 1941-1952A

Extrusions, Microstructure
On the analysis of grain size in bulk nanocrystalline materials via x-ray diffraction. 1349-1355A

Face centered cubic lattice
Elastic Constants of Face-Centered Cubic and $L1_2$ Ni-Si Alloys: Composition and Temperature Dependence. 1863-1868A
Nanostructure in an Al-Mg-Sc Alloy Processed by Low-Energy Ball Milling at Cryogenic Temperature. 1985-1992A

Failure
The influence of microstructure and strain rate on the compressive deformation behavior of Ti-6Al-4V. 295-306A
X-ray photoelectron spectroscopy and scanning auger microprobe studies on oxidation-induced embrittlement mechanism of liquid-phase-sintered 95W-Ni-Fe alloy. 355-359A
Thermal Analysis of Twin-Channel Induction Furnaces. 679-684B
Role of microstructure on sulfide stress cracking of oil and gas pipeline steels. 1089-1096A
Deformation Mechanisms in Ti-6Al-4V/TiC Composites. 1869-1877A

Fatigue (materials)
A microstructure-based fatigue-crack-initiation model. 43-57A
On the fracture and fatigue properties of Mo-Mo_3Si-Mo_5SiB_2 refractory intermetallic alloys at ambient to elevated temperatures (25°C to 1300°C). 225-239A
Strength of SCS-6 fibers in a Tiβ21s/SCS-6 composite before and after fatigue. 1203-1213A
Microstructure and fatigue characteristics of direct chill cast and electromagnetic cast 2024 Al alloy ingots. 1537-1543A
The role of the slope out region on fatigue crack initiation in electron beam welded waspaloy. 1637-1645A
On the Wear of a Cobalt-Based Superalloy in Zinc Baths. 2387-2396A
The Effect of Severe Marforming on Shape Memory Characteristics of a Ti-Rich NiTi Alloy Processed Using Equal Channel Angular Extrusion. 2527-2539A
Effect of Precyclic Loading on Stress-Corrosion-Cracking Initiation in An X-65 Pipeline Steel Exposed to Near-Neutral pH Soil Environment. 2601-2608A

Fatigue failure
High-temperature low-cycle fatigue behavior of K40S cobalt-

base superalloy. 979-986A
The low-cycle fatigue and fatigue-crack-growth behavior of HAYNES HR-120 alloy. 1451-1460A
The role of the slope out region on fatigue crack initiation in electron beam welded waspaloy. 1637-1645A
Effects of oxidation on the fatigue crack growth resistance and the interfacial properties of a Ti-MMC laminate composite. 1705-1717A
The Effect of Solidification Time and Heat Treatment on the Fatigue Properties of a Cast 319 Aluminum Alloy. 1807-1820A
An Investigation of Contact Deformation, Fracture, and Fatigue Behavior in Bulk Metallic Glasses. 1851-1861A
Scatter in Fatigue Life Due to Effects of Porosity in Cast A356-T6 Aluminum-Silicon Alloys. 1879-1890A
Fatigue Crack Growth in a Particulate TiB_2-Reinforced Powder Metallurgy Iron-Based Composite. 2017-2024A
A Novel Inclusion Inspection Method Employing 20 kHz Fatigue Testing. 2517-2526A
Microstructure and Fatigue Properties of Hydroformed Aluminum Alloys 6063 and 5754. 2549-2557A
Fatigue Crack Growth Mechanisms in Ti6242 Lamellar Microstructures: Influence of Loading Frequency and Temperature. 2565-2577A
Crack Initiation and Propagation in 50.9 At. pct Ni-Ti Pseudoelastic Shape-Memory Wires in Bending-Rotation Fatigue. 2847-2860A

Fatigue life
Demonstration of an endurance limit in cast 319 aluminum. 33-41A
The low-cycle fatigue and fatigue-crack-growth behavior of HAYNES HR-120 alloy. 1451-1460A
The Effect of Solidification Time and Heat Treatment on the Fatigue Properties of a Cast 319 Aluminum Alloy. 1807-1820A
Scatter in Fatigue Life Due to Effects of Porosity in Cast A356-T6 Aluminum-Silicon Alloys. 1879-1890A
Microstructure and Fatigue Properties of Hydroformed Aluminum Alloys 6063 and 5754. 2549-2557A
Crack Initiation and Propagation in 50.9 At. pct Ni-Ti Pseudoelastic Shape-Memory Wires in Bending-Rotation Fatigue. 2847-2860A
Density Changes of Iron during Morphological Healing Evolution of Internal Fatigue Microcracks. 2925-2933A

Fatigue limit
Demonstration of an endurance limit in cast 319 aluminum. 33-41A

Fatigue strength
The Effect of Solidification Time and Heat Treatment on the Fatigue Properties of a Cast 319 Aluminum Alloy. 1807-1820A
Microstructure and Fatigue Properties of Hydroformed Aluminum Alloys 6063 and 5754. 2549-2557A

Fatigue tests
A Novel Inclusion Inspection Method Employing 20 kHz Fatigue Testing. 2517-2526A
Fatigue Crack Growth Mechanisms in Ti6242 Lamellar Microstructures: Influence of Loading Frequency and Temperature. 2565-2577A
Crack Initiation and Propagation in 50.9 At. pct Ni-Ti Pseudoelastic Shape-Memory Wires in Bending-Rotation Fatigue. 2847-2860A

FCC metals, Crystal lattices
Communication: Mechanical milling-induced deformation twinning in fcc materials with high stacking fault energy. 707-712A

Ferrite
The microstructure of an Fe-Mn-Si-Cr-Ni stainless steel shape memory alloy. 1029-1042A
The relationship between chromium nitride and secondary austenite precipitation in duplex stainless steels. 1575-1597A
Effect of deformation schedule on the microstructure and mechanical properties of a thermomechanically processed C-Mn-Si transformation-induced plasticity steel. 1599-1609A
Communication: Discussion of 'Lattice orientation relationship between the M_2C carbide and the ferrite matrix in the M50NiL bearing steel'. 1735A
Communication: Author's reply. 1735-1736A
Peritectic Reaction and Solidification in Iron-Nickel Alloys. 1931-1940A
Analysis of Different Acicular Ferrite Microstructures in Low-Carbon Steels by Electron Backscattered Diffraction. Study of Their Toughness Behavior. 2505-2516A

Ferrites
Microstructural Aspects of QuasiPolygonal and Granular Bainitic Ferrites in an Ultra-Low-Carbon Interstitial-Free High-Strength Steel. 2025-2026A

Ferritic stainless steels, Mechanical properties
The long-term aging embrittlement of Fe-12Cr steels below 773 K. 927-934A

Ferritic stainless steels, Microstructure
Delta-Ferrite Recovery Structures in Low-Carbon Steels. 495-501B

Ferritic stainless steels, Phases (state of matter)
Communication: Effects of Cooling Rate on Aging at 475 °C of an Oxide-Dispersion-Strengthened Ferritic Steel. 2681-2683A

Ferritic transformations
Delta-Ferrite Recovery Structures in Low-Carbon Steels. 495-501B

Ferromanganese, Phases (state of matter)
Phase-equilibrium data and liquidus for the system 'MnO'-CaO-Al_2O_3-SiO_2 at Al_2O_3/SiO_2 of 0.55 and 0.65. 173-182B

Ferromanganese, Thermal properties
Thermodynamics of carbon in liquid manganese and ferromanganese alloys. 51-59B

Ferrous alloys, Bonding
Diffusion bonding of Si_3N_4-TiN composite with nickel-based interlayers. 1627-1636A

Ferrous alloys, Crystal growth
A new analytical approach to predict spacing selection in lamellar and rod eutectic systems. 383-394A
Effect of a Catalyst on Heterogeneous Nucleation in Pure Fe and Fe-Ni Alloys. 539-547B

Ferrous alloys, Mechanical properties
Mechanical properties of iron processed by severe plastic deformation. 71-83A
Relaxation mechanisms in Fe-Al-C alloys. 255-266A
The low-cycle fatigue and fatigue-crack-growth behavior of HAYNES HR-120 alloy. 1451-1460A
Mechanical and Physical Properties of High Velocity Oxy-Fuel-Sprayed Iron Aluminide Coatings. 2223-2231A
Effect of Carbon Addition on the Strength and-Creep Resistance of FeAl Alloys. 2233-2246A

Ferrous alloys, Microstructure
Evaluation of the accuracy of the three-dimensional size distribution estimated from the Schwartz-Saltykov method. 171-181A
Growth of solutal dendrites: a cellular automaton model and its quantitative capabilities. 367-382A

Ferrous alloys, Phase transformations
Martensite Crystallography - the Apparent Controversy between the Infinitesimal Deformation Approach and the Phenomenological Theory of Martensitic Transformations. 1783-1786A

Ferrous alloys, Physical properties
A Thermodynamic Study of Liquid Fe-Si-B Alloys; an Influence of Ternary Associates on a Liquid → Glass Transition. 887-898B

Ferrous alloys, Reactions (chemical)
Morphology and kinetics of discontinuous precipitation and dissolution in an Fe-8.5Al-27Mn-1.0Si-0.92C alloy. 25-31A

Ferrous alloys, Thermal properties
Enthalpy of formation and heat capacity of Fe-Mn alloys. 209-223B

Ferrous alloys, Welding
Nitrogen absorption by iron and stainless steels during CO_2 laser welding. 75-82B

Fiber composites, Mechanical properties
Communication: Influence of Coating an Thermal Response of Composites Reinforced with Anisotropic Fibers. 883-887A
Salient shear bands and second-phase addition interactions of bulk metallic glass matrix composite. 1147-1152A
Strength of SCS-6 fibers in a Tiβ21s/SCS-6 composite before and after fatigue. 1203-1213A

Fiber pull out
Effects of oxidation on the fatigue crack growth resistance and the interfacial properties of a Ti-MMC laminate composite. 1705-1717A

Fibers, Coating
Communication: Influence of Coating an Thermal Response of Composites Reinforced with Anisotropic Fibers. 883-887A

Filtration
Deep filtration of molten aluminum using ceramic foam filters and ceramic particles with active coatings. 1183-1191A

Finish rolling
Effect of prestrain and deformation temperature on the recrystallization behavior of steels microalloyed with niobium. 1237-1247A

Finite element method
Morphological healing evolution of intragranular penny-shaped microcracks by surface diffusion: Part I. Simulation. 277-285A
Simulation of Macroscopic Solidification with an Incorporated One-Dimensional Microsegregation Model Coupled to Thermodynamic Software. 411-419B
Dendritic growth with fluid flow in pure materials. 459-466A
Postnecking elastoplastic characterization: degree of approximation in the Bridgman method and properties of the flow-stress/true-stress ratio. 615-624A
Finite-element analysis of effects of the laser-processed bimaterial component size on stresses and distortion. 1133-1145A
Numerical modeling of the damping capacity of Al/SiC(p). 1387-1391A
Deformation, residual stress, and constitutive relations for quenched W319 aluminum. 1483-1491A
Measurement and Modeling of Creep in Open-Cell NiAl Foams. 2353-2363A
Communication: The Effect of Stress State on Cavity Initiation during Hot Working of Ti-6Al-4V. 2397-2400A
Residual Stresses in an Electron Beam Weld of Ti-834: Characterization and Numerical Modeling. 2935-2946A

Flash smelting
Communication: Nickel, copper, and cobalt slag losses during converting. 121-125B

Flow
Marangoni Flow at the Gas/Melt Interface of Steel. 483-493B

Flow rate
Kinetics and Mechanism of Carbothermic Reduction of Magnesia. 433-437B
Investigation of the Performance of an Expandable Polystyrene Injector for Use in the Lost-Foam Casting Process. 843-851B

Fluid dynamics
Computational fluid-dynamics simulation of postcombustion in the electric-arc furnace. 333-343B
Last-stage solidification of alloys: theoretical model of dendrite-arm and grain coalescence. 467-479A
Entrainment of a Two-Layer Liquid through a Taphole. 821-832B

Fluid flow
Active Solute Effects on Surface Ripples in Electron-Beam Welding Solidification. 421-432B
Modeling of Ingot Development during the Start-Up Phase of Direct Chill Casting. 727-734B
Computation and Validation of Weld Pool Dimensions and Temperature Profiles for Gamma TiAl. 2273-2279A

Fluidized beds
Mathematical model of COREX melter gasifier: Part I. Steady-state model. 103-114B
Fluidizing
Reduction Kinetics of Fe_2MoO_4 Fine Powder by Hydrogen in a Fluidized Bed. 661-667B
Foamed metals, Mechanical properties
Creep of Aluminum-Based Closed-Cell Foams. 2809-2817A
Foamed metals, Powder technology
Static and dynamic energy absorption of Al foams produced by the sintering and dissolution process. 69-74B
Foams, Mechanical properties
Measurement and Modeling of Creep in Open-Cell NiAl Foams. 2353-2363A
Formability
Influence of composition, Sr modification, and annealing treatment on the structure and properties of cast Al-4 pct Mg alloys. 115-129A
Effect of material damage on forming limits of voided anisotropic sheet metals. 1283-1290A
Rapid compression of aluminum alloys and its relationship to thixoformability. 1545-1554A
Communication: Effects of grain size and pressing speed on the deformation mode of commercially pure Ti during equal channel angular pressing. 1555-1558A
Microstructural Aspects of QuasiPolygonal and Granular Bainitic Ferrites in an Ultra-Low-Carbon Interstitial-Free High-Strength Steel. 2025-2026A
Microstructure and Texture of Hot-Rolled Cb-Ti and V-Cb Microalloyed Steels with Differences in Formability and Toughness. 2341-2351A
Foundry practice
Asymptotic approximation and numerical simulation of electromagnetic casting. 83-91B
Emerging technologies in extraction and processing of metals. 137-152B
Modeling of the Solidification Process in a Continuous Casting Installation for Steel Slabs. 455-473B
Heat Transfer and Solidification Model of Continuous Slab Casting: CON1D. 685-705B
Modeling Transient Slag-Layer Phenomena in the Shell/mold Gap in Continuous Casting of Steel. 707-725B
Modeling of Ingot Development during the Start-Up Phase of Direct Chill Casting. 727-734B
Investigation of the Performance of an Expandable Polystyrene Injector for Use in the Lost-Foam Casting Process. 843-851B
Scatter in Fatigue Life Due to Effects of Porosity in Cast A356-T6 Aluminum-Silicon Alloys. 1879-1890A
The Importance of Viscoplastic Strain Rate in the Formation of Center Cracks during the Start-Up Phase of Direct-Chill Cast Aluminum Extrusion Ingots. 1941-1952A
Fractography
Synthesis of ductile titanium-titanium boride (Ti-TiB) composites with a beta-titanium matrix: the nature of TiB formation and composite properties. 1371-1385A
Fracture mechanics
Influence of composition, Sr modification, and annealing treatment on the structure and properties of cast Al-4 pct Mg alloys. 115-129A
Hydride embrittlement and irradiation effects on the hoop mechanical properties of pressurized water reactor (PWR) and boiling-water reactor (BWR) ZIRCALOY cladding tubes: Part I. Hydride embrittlement in stress-relieved, annealed, and recrystallized ZIRCALOYs at 20°C and 300°C. 553-566A
Hydride embrittlement and irradiation effects on the hoop mechanical properties of pressurized water reactor (PWR) and boiling-water reactor (BWR) ZIRCALOY cladding tubes: Part III. Mechanical behavior of hydride in stress-relieved annealed and recrystallized ZIRCALOYs at 20°C and 300°C. 579-588A
Tensile properties and creep behavior of a new Ti-Al-Nb intermetallic alloy with an O + α_2 microstructure. 633-643A
The long-term aging embrittlement of Fe-12Cr steels below 773 K. 927-934A
Fatigue Crack Growth Mechanisms in Ti6242 Lamellar Microstructures: Influence of Loading Frequency and Temperature. 2565-2577A
Fracture strength
Strength of SCS-6 fibers in a Tiβ21s/SCS-6 composite before and after fatigue. 1203-1213A
Mechanical and Physical Properties of High Velocity Oxy-Fuel-Sprayed Iron Aluminide Coatings. 2223-2231A
Fracture toughness
On the fracture and fatigue properties of Mo-Mo_3Si-Mo_5SiB_2 refractory intermetallic alloys at ambient to elevated temperatures (25°C to 1300°C). 225-239A
Improvement in fracture toughness of Ti-4.5Al-3V-2Mo-2Fe through microstructural optimization. 267-275A
Internal hydrogen embrittlement of ultrahigh-strength AERMET 100 steel. 327-344A
Spark Plasma Sintering of Al-Si-Cu-Fe Quasi-Crystalline Powder. 841-849A
The long-term aging embrittlement of Fe-12Cr steels below 773 K. 927-934A
Effects of test temperature and grain size on the Charpy impact toughness and dynamic toughness (K_{ID}) of polycrystalline niobium. 967-976A
Analysis of fracture toughness in the transition-temperature region of an Mn-Mo-Ni low-alloy steel. 1275-1281A
Improving the Fracture Toughness of Constituent Phases and Nb-Based In Situ Composites by a Computational Alloy Design Approach. 1833-1849A
Relationships of Fracture Toughness and Dislocation Mobility in Intermetallics. 2315-2328A
Some Water Vapor Effects during the Oxidation of Alloys that are α-Al_2O_3 Formers. 2609-2619A
Toughness and Strength Characteristics of Nb-W-Si Ternary Alloys Prepared by Arc Melting. 2861-2871A
Fractures
X-ray photoelectron spectroscopy and scanning auger microprobe studies on oxidation-induced embrittlement mechanism of liquid-phase-sintered 95W-Ni-Fe alloy. 355-359A
Fracturing
Salient shear bands and second-phase addition interactions of bulk metallic glass matrix composite. 1147-1152A
Effects of TiC composite coating on electrode degradation in microresistance welding of nickel-plated steel. 1501-1511A
Communication: Residual stress distribution in electron beam-physical vapor deposited ZrO_2 thermal barrier coating layer by Raman spectroscopy. 1739-1741A
Investigation of Dendrite-Boundary Microchemistry in Alloy 182 using Auger Electron Spectroscopy Analysis. 1891-1899A
Effects of Microstructural Factors on Quasi-Static and Dynamic Deformation Behaviors of Ti-6Al-4V Alloys with Widmanstatten Structures. 2541-2548A
Fragmentation
A solutal interaction mechanism for the columnar-to-equiaxed transition in alloy solidification. 1657-1674A
Frames, Materials selection
Communication: Spray deposited metal-carbon fiber reinforced polymer hybrid structures. 421-424A
Free energy
Thermodynamics of carbon in liquid manganese and ferromanganese alloys. 51-59B
Determination of Standard Gibbs Energies of Formation of $Fe_2Mo_3O_{12}$, $Fe_2Mo_3O_8$, Fe_2MoO_4, and $FeMoO_4$ of the Fe-Mo-O Ternary System and μ Phase of the Fe-Mo Binary System by Electromotive Force Measurement Using a Y_2O_3-Stabilized ZrO_2 Solid Electrolyte. 653-659B
A Thermodynamic Study of Liquid Fe-Si-B Alloys; an Influence of Ternary Associates on a Liquid → Glass Transition. 887-898B
Freezing
Nucleation of bubbles on a solidification front-experiment and analysis. 321-332B
Friction
Modeling Transient Slag-Layer Phenomena in the Shell/mold Gap in Continuous Casting of Steel. 707-725B
Friction stir welding
Basal plane texture and flow pattern in friction stir weld of a magnesium alloy. 987-994A
Frictional wear
Microstructure and Sliding Wear Behavior of Tungsten Reinforced W-Ni-Si Metal-Silicide In-Situ Composites. 2005-2015A
Functionally gradient materials, Directional solidification
Application of electromagnetic separation of phases in alloy melt to produce in-situ surface and functionally gradient composites. 1719-1725A
Functionally gradient materials, Mechanical properties
Titanium-Titanium Boride (Ti-TiB) Functionally Graded Materials through Reaction Sintering: Synthesis, Microstructure, and Properties. 1993-2003A
Functionally gradient materials, Powder technology
Composition Control in the Direct Laser-Deposition Process. 439-445B
Theoretical Design of Sedimentation Applied to the Fabrication of Functionally Graded Materials. 605-609B
Fused salts
A Polymeric Approach to the Sulfide Capacity of Silicate Slags and Melts. 399-410B
Fused salts, Reactions (chemical)
Occlusion and ion exchange in the molten (lithium chloride + potassium chloride + alkaline-earth chloride) salt + zeolite 4A system with alkaline-earth chlorides of calcium and strontium and in the molten (lithium chloride + potassium chloride + actinide chloride) salt + zeolite 4A system with the actinide chloride of uranium. 201-208B
The Effect of Salt-Phase Composition on the Rate of Soda-Ash Roasting of Chromite Ores. 555-563B
Galena, Powder technology
The Thermal Behavior of Mechanically Activated Galena by Thermogravimetry Analysis. 793-797A
Galvanizing
Communication: Phase Transition in Galvanneal Coatings. 879-881A
Gas flow
A cold model study of raceway hysteresis. 183-191B
Mixing and Solid-Liquid Mass Transfer Rates in a Creusot Loire Uddeholm Vessel: A Water Model Case Study. 833-842B
Gas metal arc welding
Numerical analysis of metal transfer in gas metal arc welding. 345-353B
Gas phases
Bubble Bursting Phenomenon in Gas/Metal/Slag Systems. 525-532B
Communication: Discussion of "Synthesis of Ultrafine Particles of Intermetallic Compounds by the Vapor-Phase Magnesium Reduction of Chloride Mixtures: Part I. Titanium Aluminides". 738-740B
Communication: Authors' Reply. 741B
Gas pipelines, Mechanical properties
Role of microstructure on sulfide stress cracking of oil and gas pipeline steels. 1089-1096A

Gas tungsten arc welding
Mechanism and Optimization of Oxide Fluxes for Deep Penetration in Gas Tungsten Arc Welding. 1901-1907A
Susceptibility of Iron Castings to Heat Absorption from an Electric Arc and to Hardened-Layer Shaping. 2973-2984A

Gas turbine engines, Welding
The role of the slope out region on fatigue crack initiation in electron beam welded waspaloy. 1637-1645A

Germanium, Additives
On the Influence of Si-Ge Additions on the Aging Response. 735-742A

Germanium, Alloying additive
Improving the Fracture Toughness of Constituent Phases and Nb-Based In Situ Composites by a Computational Alloy Design Approach. 1833-1849A

Gold, Crystal growth
Recrystallization and grain growth of cold-drawn gold bonding wire. 1113-1125A

Gold, Extraction
The Interdisciplinary Nature of Hydrometallurgy. 757-767B

Gold, Reactions (chemical)
Effect of sulfides on gold dissolution in ammoniacal thiosulfate medium. 5-13B

Grain boundaries
Last-stage solidification of alloys: theoretical model of dendrite-arm and grain coalescence. 467-479A
Delta-Ferrite Recovery Structures in Low-Carbon Steels. 495-501B
Antimony-Induced Embrittlement of [011] Symmetric Tilt Boundaries in Copper Bicrystals. 773-779A
Aspects of Orientation-Dependent Grain Growth in Extra-Low Carbon and Interstitial-Free Steels during Continuous Annealing. 827-839A
Texture and grain-boundary evolutions of continuous cast and direct chill cast AA 5052 aluminum alloy during cold rolling. 951-966A
Morphological stability of copper-silver multilayer thin films at elevated temperatures. 1043-1054A
Recrystallization and grain growth of cold-drawn gold bonding wire. 1113-1125A
Grain growth in a low-loss cold-rolled motor-lamination steel. 1321-1327A
Coherent γ'-precipitates at singular and rough grain boundaries in a model Ni-base superalloy. 1433-1437A
Hot working and recrystallization of as-cast 316L. 1683-1703A
Nanostructure in an Al-Mg-Sc Alloy Processed by Low-Energy Ball Milling at Cryogenic Temperature. 1985-1992A
Effect of Carbon Addition on the Strength and-Creep Resistance of FeAl Alloys. 2233-2246A
Electron Microscopy Study on the Grain-Boundary Precipitation during Aging of Fe-10Ni-5Mn Steel. 2421-2428A
Grain-Boundary Character Distribution in Recrystallized $L1_2$ Ordered Intermetallic Alloys. 2429-2439A
Effect of Precyclic Loading on Stress-Corrosion-Cracking Initiation in An X-65 Pipeline Steel Exposed to Near-Neutral pH Soil Environment. 2601-2608A
Microstructural Effects on the Tensile and Fracture Behavior of Aluminum Casting Alloys A356/357. 2887-2899A

Grain boundaries, Electrical properties
A model for the electrical conductivity of peak-aged and over-aged Al-Zn-Mg-Cu alloys. 899-911A

Grain boundary migration
Morphology and kinetics of discontinuous precipitation and dissolution in an Fe-8.5Al-27Mn-1.0Si-0.92C alloy. 25-31A
The shrinkage of grain-boundary voids under pressure. 1493-1500A
Microstructure Development during Hot Deformation of Aluminum to Large Strains. 2737-2744A

Grain boundary segregation
The role of tin in the hot-ductility deterioration of a low-carbon steel. 1611-1616A
Synergetic Effect of Hardness and Phosphorus Grain-Boundary Segregation on the Ductile-to-Brittle Transition Temperature of 17-4 PH Steel. 2483-2491A

Grain boundary sliding
Toughness and Strength Characteristics of Nb-W-Si Ternary Alloys Prepared by Arc Melting. 2861-2871A

Grain growth
Annealing behavior of submicrocrystalline oxide-bearing iron produced by mechanical alloying. 131-138A
Dendritic growth with fluid flow in pure materials. 459-466A
The evolution of annealing textures in 90 pct drawn copper wire. 531-541A
On the Precipitation-Hardening Behavior of the Al-Mg-Si-Cu Alloy AA6111. 751-763A
Morphological stability of copper-silver multilayer thin films at elevated temperatures. 1043-1054A
Recrystallization and grain growth of cold-drawn gold bonding wire. 1113-1125A
Grain growth in a low-loss cold-rolled motor-lamination steel. 1321-1327A
Communication: Further discussion on the free growth behavior in the solidification of undercooled eutectic melts. 1393-1396A
A Planar Simple Shear Test and Flow Behavior in a Superplastic Al-Mg Alloy. 2465-2471A
Prediction of Limit Strains in Superplastic Materials. 2559-2564A

Grain orientation
Observation of cold-rolling texture and partially recrystallized texture in polycrystalline 3 pct Si-Fe by high-resolution electron backscattered diffraction. 403-408A
Texture and grain-boundary evolutions of continuous cast and direct chill cast AA 5052 aluminum alloy during cold rolling. 951-966A
Recrystallization and grain growth of cold-drawn gold bonding wire. 1113-1125A
Hot working and recrystallization of as-cast 316L. 1683-1703A
Microstructural Effects on the Tensile Properties and Deformation Behavior of a Ti-48Al Gamma Titanium Aluminide. 2113-2127A

Grain refinement
Communication: Effect of porosity on the electrical properties of Fe-based specimens fabricated by powder metallurgy. 126-129B
Nanocrystalline Ni coatings strengthened with ultrafine particles. 673-683A
Corrosion of Co-Cr-W Alloy in Liquid Zinc. 881-886B
Influence of intense plastic straining on grain refinement, precipitation, and mechanical properties of Al-Cu-Li-based alloys. 1153-1161A
Grain refinement of Al-7Si alloys and the efficiency assessment by recognition of cooling curves. 1175-1182A
Microstructural evolution and deformation of cryomilled nanocrystalline Al-Ti-Cu alloy. 1473-1481A
The effect of grain refining on macrosegregation and dendrite arm spacing of direct chill cast AA5182. 1513-1523A
Synthesis mechanism of an Al-Ti-C grain refiner master alloy prepared by a new method. 1727-1733A

Grain size
Effects of process-control agents on mechanical alloying of nanostructured aluminum alloys. 159-170A
Superheat Treatment of Al-7Si-0.55Mg Melt and Its Influences on the Solidification Structures and the Mechanical Properties. 799-806A
Effects of test temperature and grain size on the Charpy impact toughness and dynamic toughness (K_{ID}) of polycrystalline niobium. 967-976A
Morphological stability of copper-silver multilayer thin films at elevated temperatures. 1043-1054A
Influence of intense plastic straining on grain refinement, precipitation, and mechanical properties of Al-Cu-Li-based alloys. 1153-1161A
Grain refinement of Al-7Si alloys and the efficiency assessment by recognition of cooling curves. 1175-1182A
Properties of TiAl sheet pack-rolled at temperatures below 1000°C. 1329-1339A
The effect of grain refining on macrosegregation and dendrite arm spacing of direct chill cast AA5182. 1513-1523A
Microstructure and fatigue characteristics of direct chill cast and electromagnetic cast 2024 Al alloy ingots. 1537-1543A
Communication: Effects of grain size and pressing speed on the deformation mode of commercially pure Ti during equal channel angular pressing. 1555-1558A
The role of the slope out region on fatigue crack initiation in electron beam welded waspaloy. 1637-1645A
Hot working and recrystallization of as-cast 316L. 1683-1703A
Nanostructure in an Al-Mg-Sc Alloy Processed by Low-Energy Ball Milling at Cryogenic Temperature. 1985-1992A
Influence of Alloying Elements on the Kinetic of Massive Transformation in Gamma Titanium Aluminides. 2053-2066A
Microstructural Effects on the Tensile Properties and Deformation Behavior of a Ti-48Al Gamma Titanium Aluminide. 2113-2127A
Grain-Size Effects on Tensile Behavior of Nickel and AISI 316L Stainless Steel. 2329-2340A
Analysis of Different Acicular Ferrite Microstructures in Low-Carbon Steels by Electron Backscattered Diffraction. Study of Their Toughness Behavior. 2505-2516A
Prediction of Limit Strains in Superplastic Materials. 2559-2564A
Crack Initiation and Propagation in 50.9 At. pct Ni-Ti Pseudoelastic Shape-Memory Wires in Bending-Rotation Fatigue. 2847-2860A
Toughness and Strength Characteristics of Nb-W-Si Ternary Alloys Prepared by Arc Melting. 2861-2871A
Hot Working and Recrystallization of As-Cast 317L. 3021-3041A

Grain size distribution
On the analysis of grain size in bulk nanocrystalline materials via x-ray diffraction. 1349-1355A
Microstructure and Texture of Hot-Rolled Cb-Ti and V-Cb Microalloyed Steels with Differences in Formability and Toughness. 2341-2351A

Grain structure
Effect of microstructure on hydrogen embrittlement of weld-simulated HSLA-80 and HSLA-100 steels. 1297-1309A
Coherent γ'-precipitates at singular and rough grain boundaries in a model Ni-base superalloy. 1433-1437A
Microstructural Aspects of QuasiPolygonal and Granular Bainitic Ferrites in an Ultra-Low-Carbon Interstitial-Free High-Strength Steel. 2025-2026A

Granulation
The Effect of Salt-Phase Composition on the Rate of Soda-Ash Roasting of Chromite Ores. 555-563B

Growth rate
A new analytical approach to predict spacing selection in lamellar and rod eutectic systems. 383-394A
Cellular-to-dendritic transition during the directional solidification of binary alloys. 395-401A
Heat flow parameters affecting dendrite spacings during unsteady-state solidification of Sn-Pb and Al-Cu alloys. 995-1006A
On the application of the additivity rule in pearlitic transformation in low alloy steels. 1259-1264A

Guinier Preston zone
On the Influence of Si-Ge Additions on the Aging Response. 735-742A
Roles of Microalloying Elements on the Cluster Formation in the Initial Stage of Phase Decomposition of Al-Based Alloys. 2745-2755A

Hafnium, Alloying additive
Improving the Fracture Toughness of Constituent Phases and Nb-Based In Situ Composites by a Computational Alloy Design Approach. 1833-1849A

Hafnium, Alloying elements
Investigation of a Directionally Solidified NiAl/Cr(Mo) Composite Alloyed with Hf. 2663-2670A
Hall Heroult process
Solubility of alumina in cryolite melts: measurements and modeling at 1300 K. 235-242B
Hardening
Strengthening by high densities of nanometer-size precipitates: oxides in Ni. 935-949A
Hot working and recrystallization of as-cast 316L. 1683-1703A
The Role of Nitrogen on the Deformation Response of Hadfield Steel Single Crystals. 1821-1831A
Communication: Effects of Cooling Rate on Aging at 475 °C of an Oxide-Dispersion-Strengthened Ferritic Steel. 2681-2683A
Hardness
Correlation of microstructure with hardness and wear resistance of VC/steel surface-alloyed materials fabricated by high-energy electron-beam irradiation. 59-69A
Aging response of the young's modulus and mechanical properties of Ti-29Nb-13Ta-4.6Zr for biomedical applications. 1007-1012A
Improvement of hardness and wear resistance of (TiC,TiB)/Ti-6Al-4V surface-alloyed materials fabricated by high-energy electron-beam irradiation. 1461-1471A
The role of the slope out region on fatigue crack initiation in electron beam welded waspaloy. 1637-1645A
Processing and Characterization of Plasma-Sprayed Ceramic Coatings on Steel Substrate: Part II. On Coating Performance. 1919-1930A
Microstructure and Sliding Wear Behavior of Tungsten Reinforced W-Ni-Si Metal-Silicide In-Situ Composites. 2005-2015A
Synergetic Effect of Hardness and Phosphorus Grain-Boundary Segregation on the Ductile-to-Brittle Transition Temperature of 17-4 PH Steel. 2483-2491A
Roles of Microalloying Elements on the Cluster Formation in the Initial Stage of Phase Decomposition of Al-Based Alloys. 2745-2755A
The Effect of Cold Work on the Precipitation of Ω and θ' in a Ternary Al-Cu-Mg Alloy. 2757-2769A
HCP metals
Communication: Effects of grain size and pressing speed on the deformation mode of commercially pure Ti during equal channel angular pressing. 1555-1558A
Hearths
Mathematical Modeling of Aluminum Evaporation During Electron-Beam Cold-Hearth Melting of Ti-6Al-4V Ingots. 447-454B
Heat affected zone
Effect of microstructure on hydrogen embrittlement of weld-simulated HSLA-80 and HSLA-100 steels. 1297-1309A
Heat loss
Thermal Conductivities of Molten Iron, Cobalt, and Nickel by Laser Flash Method. 2801-2807A
Heat of formation
Enthalpy of formation and heat capacity of Fe-Mn alloys. 209-223B
Determination of Standard Gibbs Energies of Formation of $Fe_2Mo_3O_{12}$, $Fe_2Mo_3O_8$, Fe_2MoO_4, and $FeMoO_4$ of the Fe-Mo-O Ternary System and μ Phase of the Fe-Mo Binary System by Electromotive Force Measurement Using a Y_2O_3-Stabilized ZrO_2 Solid Electrolyte. 653-659B
Heat of reaction
Estimation and modeling of parameters for direct reduction in iron ore/coal composites: Part I. Physical parameters. 93-102B
Heat of transformation
Enthalpy of formation and heat capacity of Fe-Mn alloys. 209-223B
Heat resistant steels, Mechanical properties
The long-term aging embrittlement of Fe-12Cr steels below 773 K. 927-934A
Heat transfer
Computational fluid-dynamics simulation of postcombustion in the electric-arc furnace. 333-343B
Heat Transfer and Solidification Model of Continuous Slab Casting: CON1D. 685-705B
Modeling Transient Slag-Layer Phenomena in the Shell/mold Gap in Continuous Casting of Steel. 707-725B
Modeling of Ingot Development during the Start-Up Phase of Direct Chill Casting. 727-734B
Computation and Validation of Weld Pool Dimensions and Temperature Profiles for Gamma TiAl. 2273-2279A
Heat transmission
Heat flow parameters affecting dendrite spacings during unsteady-state solidification of Sn-Pb and Al-Cu alloys. 995-1006A
Heating rate
Precipitation and recrystallization behavior of beta titanium alloys during continuous heat treatment. 147-158A
Kinetics and Mechanism of Carbothermic Reduction of Magnesia. 433-437B
Recrystallization of a cold-rolled low-carbon steel by cold-plasma-discharge rapid annealing. 1341-1348A
Heterogeneity
Numerical Study of the Second Ignition for Combustion Synthesizing Ni-Al Compounds. 1969-1978A
Study of Microstructure and Solute Partitioning in a Cast Ti-48Al-2Cr-2Nb Alloy by Quenching during Directional Solidification Technique. 2139-2148A
Grain-Size Effects on Tensile Behavior of Nickel and AISI 316L Stainless Steel. 2329-2340A
Heusler alloys
Precipitation of Heusler phase (Ni_2TiAl) from B2-TiNi in Ni-Ti-Al and Ni-Ti-Al-x (x = Hf, Zr) Alloys. 1221-1234A
Hexagonal lattice
Structure and stability of a new ternary hexagonal phase in Al_3Ti-based Al-Ti-V alloys. 491-501A
Theory of Interface Properties for Carbide Precipitates in TiAl. 2097-2101A
High alloy steels, Mechanical properties
Internal hydrogen embrittlement of ultrahigh-strength AERMET 100 steel. 327-344A
High cycle fatigue
Scatter in Fatigue Life Due to Effects of Porosity in Cast A356-T6 Aluminum-Silicon Alloys. 1879-1890A
High speed tool steels, Thermal properties
Thermodynamic Calculations for Nb-Containing High-Speed Steels and White Cast-Iron Alloys. 1749-1758A
High strength low alloy steels, Corrosion
Effect of Precyclic Loading on Stress-Corrosion-Cracking Initiation in An X-65 Pipeline Steel Exposed to Near-Neutral pH Soil Environment. 2601-2608A
High strength low alloy steels, Mechanical properties
Influence of thermomechanical treatments on the microstructure and mechanical properties of HSLA-100 steel plates. 241-253A
Effect of Cooling Rate on the As-Quenched Microstructure and Mechanical Properties of HSLA-100 Steel Plates. 2493-2504A
High strength low alloy steels, Microstructure
Coarsening kinetics of multicomponent MC-type carbides in high-strength low-alloy steels. 1565-1573A
Microstructure and Texture of Hot-Rolled Cb-Ti and V-Cb Microalloyed Steels with Differences in Formability and Toughness. 2341-2351A
High strength low alloy steels, Physical properties
Marangoni Flow at the Gas/Melt Interface of Steel. 483-493B
High strength low alloy steels, Structural hardening
Communication: Discussion of 'precipitation behavior and its effect on strengthening of an HSLA-Nb/Ti steel. 1013-1017A
Communication: Authors' reply. 1017-1019A
High strength low alloy steels, Welding
Effect of microstructure on hydrogen embrittlement of weld-simulated HSLA-80 and HSLA-100 steels. 1297-1309A
High strength steels, Mechanical properties
Internal hydrogen embrittlement of ultrahigh-strength AERMET 100 steel. 327-344A
Postnecking elastoplastic characterization: degree of approximation in the Bridgman method and properties of the flow-stress/true-stress ratio. 615-624A
Communication: Strength differential measurements in IN 718: effects of superimposed. 1736-1739A
Homogeneity
Numerical Study of the Second Ignition for Combustion Synthesizing Ni-Al Compounds. 1969-1978A
Isothermal Section of the Ternary Sn-Cu-Ni System and Interfacial Reactions in the Sn-Cu/Ni Couples at 800 °C. 2281-2287A
Hot isostatic pressing
On the analysis of grain size in bulk nanocrystalline materials via x-ray diffraction. 1349-1355A
Hot work tool steels, Composite materials
Composition Control in the Direct Laser-Deposition Process. 439-445B
Hot working
A constitutive description of an aluminum-0.32 pct iron under hot-deformation conditions. 319-326A
Effect of prestrain and deformation temperature on the recrystallization behavior of steels microalloyed with niobium. 1237-1247A
Hot working and recrystallization of as-cast 316L. 1683-1703A
A Taylor Model Based Description of the Proof Stress of Magnesium AZ31 during Hot Working. 1799-1806A
Communication: The Effect of Stress State on Cavity Initiation during Hot Working of Ti-6Al-4V. 2397-2400A
A Constitutive Description for Aluminum-0.1 Pct Magnesium Alloy under Hot Working Conditions. 2837-2846A
Hot Working and Recrystallization of As-Cast 317L. 3021-3041A
Hybrid composites, End uses
Communication: Spray deposited metal-carbon fiber reinforced polymer hybrid structures. 421-424A
Hydrodynamics
Asymptotic approximation and numerical simulation of electromagnetic casting. 83-91B
Hydrogen
Effect of hydrogen charging on dislocation behavior in Ni-Cr and Ni_2Cr alloys. 1249-1257A
Hydrogen embrittlement
Internal hydrogen embrittlement of ultrahigh-strength AERMET 100 steel. 327-344A
Hydride embrittlement and irradiation effects on the hoop mechanical properties of pressurized water reactor (PWR) and boiling-water reactor (BWR) ZIRCALOY cladding tubes: Part I. Hydride embrittlement in stress-relieved, annealed, and recrystallized ZIRCALOYs at 20°C and 300°C. 553-566A
Hydride embrittlement and irradiation effects on the hoop mechanical properties of pressurized water reactor (PWR) and boiling-water reactor (BWR) ZIRCALOY cladding tubes: Part II. Morphology of hydrides investigated at different magnifications and their interaction with the processes of plastic deformation. 567-578A
Multiple cracking of tantalum by hydrogenation. 685-690A
Role of microstructure on sulfide stress cracking of oil and gas pipeline steels. 1089-1096A
Effect of microstructure on hydrogen embrittlement of weld-simulated HSLA-80 and HSLA-100 steels. 1297-1309A

Effect of Carbon Addition on the Strength and-Creep Resistance of FeAl Alloys. 2233-2246A

Hydrogen reduction
Hydrogen Reduction of Oxidized Nickel Concentrates. 805-811B

Hydrogenation
Multiple cracking of tantalum by hydrogenation. 685-690A
Mutual Effects of Hydrogenation and Deformation in Ti-Nb Alloys. 2199-2206A

Hydrometallurgy
The Interdisciplinary Nature of Hydrometallurgy. 757-767B

Hydrostatic pressure
Communication: Strength differential measurements in IN 718: effects of superimposed. 1736-1739A

Hydrostatics
Stress-State Dependence of Cavitation and Flow Behavior in Superplastic Aluminum Alloys. 2449-2463A
Thermodynamics of Stress-induced Interstitial Redistribution in Body-Centered Cubic Metals. 2819-2825A

Hypereutectic structures
Application of electromagnetic separation of phases in alloy melt to produce in-situ surface and functionally gradient composites. 1719-1725A

Hypoeutectic structures
A Mushy-Zone Rayleigh Number to Describe Interdendritic Convection during Directional Solidification of Hypoeutectic Pb-Sb and Pb-Sn Alloys. 2365-2376A

Hysteresis
Detwinning in NiTi alloys. 5-13A
A cold model study of raceway hysteresis. 183-191B

Ignition
Numerical Study of the Second Ignition for Combustion Synthesizing Ni-Al Compounds. 1969-1978A

Ilmenite, Oxidation
Physicochemical Aspects of Titanium Slag Production and Solidification. 581-588B

Image analysis
Simulation of Macroscopic Solidification with an Incorporated One-Dimensional Microsegregation Model Coupled to Thermodynamic Software. 411-419B

Impact strength
Influence of thermomechanical treatments on the microstructure and mechanical properties of HSLA-100 steel plates. 241-253A
Effects of test temperature and grain size on the Charpy impact toughness and dynamic toughness (K_{ID}) of polycrystalline niobium. 967-976A
Analysis of fracture toughness in the transition-temperature region of an Mn-Mo-Ni low-alloy steel. 1275-1281A
Effect of Cooling Rate on the As-Quenched Microstructure and Mechanical Properties of HSLA-100 Steel Plates. 2493-2504A

Impact tests
Salient shear bands and second-phase addition interactions of bulk metallic glass matrix composite. 1147-1152A
Analysis of fracture toughness in the transition-temperature region of an Mn-Mo-Ni low-alloy steel. 1275-1281A

Impurities
Crystal growth in liquid steel during secondary metallurgy. 161-171B

Inclusions
Communication: Nonisothermal growth and dissolution of inclusions in liquid steels. 267-269B
Observation of Calcium Aluminate Inclusions at Interfaces between Ca-Treated, Al-Killed Steels and Slags. 533-538B
Communication: Evaluation of Evaporation Losses during Electron-Beam Melting of Ti-Al-V Alloys. 911-915B
A neutron diffraction and modeling study of uniaxial deformation in polycrystalline beryllium. 1439-1449A
A Constitutive Description for Aluminum-0.1 Pct Magnesium Alloy under Hot Working Conditions. 2837-2846A

Inclusions, Microstructure
Evaluation of the accuracy of the three-dimensional size distribution estimated from the Schwartz-Saltykov method. 171-181A

Indentation
Improving the Fracture Toughness of Constituent Phases and Nb-Based In Situ Composites by a Computational Alloy Design Approach. 1833-1849A
An Investigation of Contact Deformation, Fracture, and Fatigue Behavior in Bulk Metallic Glasses. 1851-1861A

Induction heating
Microstructure Evolution during Alpha-Beta Heat Treatment of Ti-6Al-4V. 2377-2386A

Ingot casting
Modeling of Ingot Development during the Start-Up Phase of Direct Chill Casting. 727-734B
The Importance of Viscoplastic Strain Rate in the Formation of Center Cracks during the Start-Up Phase of Direct-Chill Cast Aluminum Extrusion Ingots. 1941-1952A
Solidification of Chill-Cast Al-Zn-Mg Alloys to be Used as Sacrificial Anodes. 2991-2997A

Ingots, Microstructure
The effect of grain refining on macrosegregation and dendrite arm spacing of direct chill cast AA5182. 1513-1523A
Microstructure and fatigue characteristics of direct chill cast and electromagnetic cast 2024 Al alloy ingots. 1537-1543A

Inoculation
The effect of grain refining on macrosegregation and dendrite arm spacing of direct chill cast AA5182. 1513-1523A

Interface reactions
Studies of the wetting characteristics of liquid iron on dense alumina by the x-ray sessile drop technique. 193-199B
Phase equilibria of the ternary Al-Cu-Ni system and interfacial reactions of related systems at 800°C. 199-209A
Observation of Calcium Aluminate Inclusions at Interfaces between Ca-Treated, Al-Killed Steels and Slags. 533-538B
The Effect of Salt-Phase Composition on the Rate of Soda-Ash Roasting of Chromite Ores. 555-563B
Influence of Ash on Interfacial Reactions between Coke and Liquid Iron. 573-580B
The Rate of Antimony Elimination from Molten Copper by the Use of Na_2CO_3 Slag. 869-879B
Morphological stability of copper-silver multilayer thin films at elevated temperatures. 1043-1054A
Mechanical properties of 2014Al/SiC composites with oxidized SiC particles. 1361-1369A
Diffusion bonding of Si_3N_4-TiN composite with nickel-based interlayers. 1627-1636A
Isothermal Section of the Ternary Sn-Cu-Ni System and Interfacial Reactions in the Sn-Cu/Ni Couples at 800 °C. 2281-2287A
Reaction Layers and Mechanisms for a Ti-Activated Braze on Sapphire. 2963-2972A

Interfaces
A new analytical approach to predict spacing selection in lamellar and rod eutectic systems. 383-394A
An atomistic study of solid/liquid interfaces and phase equilibrium in binary systems. 435-439A
Behavior of oxide film at the interface between particles in sintered Al powders by pulse electric-current sintering. 699-703A
Numerical modeling of the damping capacity of Al/SiC(p). 1387-1391A

Interfaces, Physical properties
Marangoni Flow at the Gas/Melt Interface of Steel. 483-493B

Intergranular corrosion
The Effects of Cold Working on Sensitization and Intergranular Corrosion Behavior of AISI 304 Stainless Steel. 2441-2447A

Intergranular fracture
Antimony-Induced Embrittlement of [011] Symmetric Tilt Boundaries in Copper Bicrystals. 773-779A

Intergranular precipitation
The relationship between chromium nitride and secondary austenite precipitation in duplex stainless steels. 1575-1597A

Interlayers
Diffusion bonding of Si_3N_4-TiN composite with nickel-based interlayers. 1627-1636A

Intermetallic phases
Modeling of the Atomic Ordering Processes in Fe_3Al Intermetallics by the Monte Carlo Simulation Method Combined with Electronic Theory of Alloys. 721-734A
Iron Intermetallic Phases in the Al Corner of the Al-Si-Fe System. 807-825A
The microstructure of an Fe-Mn-Si-Cr-Ni stainless steel shape memory alloy. 1029-1042A
Reactive synthesis of in-situ $ZrAl_3$-Al_2O_3-Al composites. 1357-1360A
The Thermodynamics of Tetrataenite and Awaruite: A Review of the Fe-Ni Phase Diagram. 1759-1769A

Intermetallics
Precipitation of Heusler phase (Ni_2TiAl) from B2-TiNi in Ni-Ti-Al and Ni-Ti-Al-x (x = Hf, Zr) Alloys. 1221-1234A
Properties of TiAl sheet pack-rolled at temperatures below 1000°C. 1329-1339A
Elastic Constants of Face-Centered Cubic and $L1_2$ Ni-Si Alloys: Composition and Temperature Dependence. 1863-1868A

Intermetallics, Composite materials
A Review of Very-High-Temperature Nb-Silicide-Based Composites. 2043-2052A
Investigation of a Directionally Solidified NiAl/Cr(Mo) Composite Alloyed with Hf. 2663-2670A

Intermetallics, Crystal lattices
An Energy Approach to the Formation of Twins in TiAl. 2827-2836A

Intermetallics, Mechanical properties
Microstructural effects on moisture-induced embrittlement of isothermally forged TiAl-based intermetallic alloys. 645-655A
Development and Elemental Powder Metallurgy of a Y-Containing Two-Phase TiAl Alloy. 2077-2087A
Microstructural Effects on the Tensile Properties and Deformation Behavior of a Ti-48Al Gamma Titanium Aluminide. 2113-2127A
High-Temperature Deformation Behavior of a Gamma TiAl Alloy- Microstructural Evolution and Mechanisms. 2165-2176A
Mechanical and Physical Properties of High Velocity Oxy-Fuel-Sprayed Iron Aluminide Coatings. 2223-2231A
Effect of Carbon Addition on the Strength and-Creep Resistance of FeAl Alloys. 2233-2246A
Relationships of Fracture Toughness and Dislocation Mobility in Intermetallics. 2315-2328A
Measurement and Modeling of Creep in Open-Cell NiAl Foams. 2353-2363A

Intermetallics, Microstructure
Modeling of the Atomic Ordering Processes in Fe_3Al Intermetallics by the Monte Carlo Simulation Method Combined with Electronic Theory of Alloys. 721-734A
Microstructure evolution in three-dimensional inhomogeneous elastic media. 1421-1431A
Theory of Interface Properties for Carbide Precipitates in TiAl. 2097-2101A
Creep Behavior of TiAl Alloys with Enhanced High-Temperature Capability. 2149-2164A
Microstructure Stability during Creep Deformation of Hard-Oriented Polysynthetically Twinned Crystal of TiAl Alloy. 2191-2198A
A Method for Measuring Microstructural-Scale Strains Using a

Scanning Electron Microscope: Applications to γ-Titanium Aluminides. 2301-2313A
Grain-Boundary Character Distribution in Recrystallized $L1_2$ Ordered Intermetallic Alloys. 2429-2439A
Nucleation-Controlled Microstructures and Anomalous Eutectic Formation in Undercooled Co-Sn and Ni-Si Eutectic Melts. 2999-3008A

Intermetallics, Oxidation
Fundamental Considerations for the Development of Oxidation-Resistant Alloys and Coatings Based on γ-TiAl. 2247-2251A
Effect of Ion Implantation on the Oxidation Resistance of TiAl. 2253-2261A

Intermetallics, Phase transformations
Influence of Alloying Elements on the Kinetic of Massive Transformation in Gamma Titanium Aluminides. 2053-2066A
Influence of Oxygen on Phase Transformations in a Ti-48 At. Pct Al Alloy. 2067-2075A
Effects of Ternary Additions on the Thermoelastic Martensitic Transformation of NiAl. 2089-2095A
The Effect of Severe Marforming on Shape Memory Characteristics of a Ti-Rich NiTi Alloy Processed Using Equal Channel Angular Extrusion. 2527-2539A

Intermetallics, Phases (state of matter)
Communication: Discussion of "Synthesis of Ultrafine Particles of Intermetallic Compounds by the Vapor-Phase Magnesium Reduction of Chloride Mixtures: Part I. Titanium Aluminides". 738-740B
Communication: Authors' Reply. 741B
Microstructural Characterization of a Platinum-Modified Diffusion Aluminide Bond Coat for Thermal Barrier Coatings. 2289-2299A
Characterization of Microstructure in Laser-Surface-Alloyed Layers of Aluminum on Nickel. 2621-2631A

Intermetallics, Powder technology
In-Situ Reactive Processing of Nickel Aluminides by Laser-Engineered Net Shaping. 2633-2641A

Intermetallics, Structural hardening
Work-Hardening and Recovery Mechanisms in Gamma-Based Titanium Aluminides. 2103-2111A
Precipitation Strengthening in K5-Series γ-TiAl Alloyed with Silicon and Carbon. 2129-2138A

Intermetallics, Synthesis
Numerical Study of the Second Ignition for Combustion Synthesizing Ni-Al Compounds. 1969-1978A

Intermetallics, Welding
Computation and Validation of Weld Pool Dimensions and Temperature Profiles for Gamma TiAl. 2273-2279A

Interstitial free steels, Heat treatment
Aspects of Orientation-Dependent Grain Growth in Extra-Low Carbon and Interstitial-Free Steels during Continuous Annealing. 827-839A

Interstitial free steels, Microstructure
Effect of rolling temperature on the deformation and recrystallization textures of warm-rolled steels. 1163-1174A
Microstructural Aspects of QuasiPolygonal and Granular Bainitic Ferrites in an Ultra-Low-Carbon Interstitial-Free High-Strength Steel. 2025-2026A

Intragranular structure
Morphological healing evolution of intragranular penny-shaped microcracks by surface diffusion: Part I. Simulation. 277-285A
Morphological healing evolution of intragranular penny-shaped microcracks by surface diffusion: Part II. Experiments. 287-294A
The relationship between chromium nitride and secondary austenite precipitation in duplex stainless steels. 1575-1597A

Investment castings, Directional solidification
Study of Microstructure and Solute Partitioning in a Cast Ti-48Al-2Cr-2Nb Alloy by Quenching during Directional Solidification Technique. 2139-2148A

Ion exchanging
Occlusion and ion exchange in the molten (lithium chloride + potassium chloride + alkaline-earth chloride) salt + zeolite 4A system with alkaline-earth chlorides of calcium and strontium and in the molten (lithium chloride + potassium chloride + actinide chloride) salt + zeolite 4A system with the actinide chloride of uranium. 201-208B

Ion implantation
Strengthening by high densities of nanometer-size precipitates: oxides in Ni. 935-949A
Effect of Ion Implantation on the Oxidation Resistance of TiAl. 2253-2261A

Iridium base alloys, Mechanical properties
Compressive Strength and Creep Properties of Ir-Nb-Zr Alloys between 1473 and 2073 K. 2207-2215A
Creep Behaviors of an Ir-23Nb Alloy at Ultra-high Temperatures. 2217-2221A

Iron, Alloying elements
The nucleation of Fe-rich phases on oxide films in Al-11.5Si-0.4Mg cast alloys. 1409-1420A

Iron, Binary systems
The Thermodynamics of Tetrataenite and Awaruite: A Review of the Fe-Ni Phase Diagram. 1759-1769A
Peritectic Reaction and Solidification in Iron-Nickel Alloys. 1931-1940A
Thermodynamic Investigation of the A2/B2 Region of the Fe-Al System by Knudsen Effusion Mass Spectrometry. 2409-2419A

Iron, Composite materials
Fatigue Crack Growth in a Particulate TiB_2-Reinforced Powder Metallurgy Iron-Based Composite. 2017-2024A

Iron, Impurities
Solution-Chemistry Analysis of Ammonium Bicarbonate Consumption in Rare Earth-Element Precipitation. 611-617B

Iron, Mechanical properties
Influence of composition, Sr modification, and annealing treatment on the structure and properties of cast Al-4 pct Mg alloys. 115-129A
Morphological healing evolution of intragranular penny-shaped microcracks by surface diffusion: Part I. Simulation. 277-285A
Morphological healing evolution of intragranular penny-shaped microcracks by surface diffusion: Part II. Experiments. 287-294A
Density Changes of Iron during Morphological Healing Evolution of Internal Fatigue Microcracks. 2925-2933A

Iron, Oxidation
Communication: The use of secondary ion mass spectrometry for investigating oxygen in pyrometallurgical reactions. 355-358B

Iron, Physical properties
The Contact Angle between Liquid Iron and a Single Crystal, Alumina Substrate at 1873 K: Effects of Oxygen and Droplet Size. 503-508B
Investigation of the Reactions between Oxygen-Containing Iron and SiO_2 Substrate by X -Ray Sessile-Drop Technique. 647-652B

Iron, Reactions (chemical)
Improvement of Desulfurization Efficiency of Molten Iron with Magnesium Vapor Produced In Situ by Aluminothermic Reduction of Magnesium Oxide. 619-629B

Iron, Reduction (chemical)
Kinetics of reduction of ferric iron in Fe_2O_3-CaO-SiO_2-Al_2O_3 Slags under Argon, CO-CO_2, or H_2-H_2O. 225-234B
Communication: A Surface Reaction Kinetic Model to Compare the Reductive Leaching of Iron from Goethite, Magnetite, and Limonitic Nickel Laterite Ores by Acidic Sulfur Dioxide. 735-738B

Iron, Surface properties
Studies of the wetting characteristics of liquid iron on dense alumina by the x-ray sessile drop technique. 193-199B

Iron, Ternary systems
Iron Intermetallic Phases in the Al Corner of the Al-Si-Fe System. 807-825A

Iron, Thermal properties
Thermal Conductivities of Molten Iron, Cobalt, and Nickel by Laser Flash Method. 2801-2807A

Iron and steel making
Mathematical model of COREX melter gasifier: Part II. Dynamic model. 115-119B
Studies of the wetting characteristics of liquid iron on dense alumina by the x-ray sessile drop technique. 193-199B
Computational fluid-dynamics simulation of postcombustion in the electric-arc furnace. 333-343B
Viscosity of Blast Furnace Type Slags. 509-516B
Bubble Bursting Phenomenon in Gas/Metal/Slag Systems. 525-532B
Observation of Calcium Aluminate Inclusions at Interfaces between Ca-Treated, Al-Killed Steels and Slags. 533-538B
Dusts, Scale, Slags, Sludges...Not Wastes, But Sources of Profits. 769-779B
Desiliconization and Decarburization Behavior of Molten Fe-C-Si(-S) Alloy with CO_2 and O_2. 861-867B
Effect of n addition on tensile and corrosion behaviors of CD4MCU cast duplex stainless steels. 1617-1625A

Iron compounds, Mechanical properties
Mechanical and Physical Properties of High Velocity Oxy-Fuel-Sprayed Iron Aluminide Coatings. 2223-2231A
Effect of Carbon Addition on the Strength and-Creep Resistance of FeAl Alloys. 2233-2246A

Iron compounds, Microstructure
Modeling of the Atomic Ordering Processes in Fe_3Al Intermetallics by the Monte Carlo Simulation Method Combined with Electronic Theory of Alloys. 721-734A

Iron compounds, Reactions (chemical)
The Prediction and Representation of Phase Equilibria and Physicochemical Properties in Complex Slag Systems. 595-603B

Iron compounds, Reduction (chemical)
Reduction Kinetics of Fe_2MoO_4 Fine Powder by Hydrogen in a Fluidized Bed. 661-667B

Iron compounds, Ternary systems
Determination of Standard Gibbs Energies of Formation of $Fe_2Mo_3O_{12}$, $Fe_2Mo_3O_8$, Fe_2MoO_4, and $FeMoO_4$ of the Fe-Mo-O Ternary System and μ Phase of the Fe-Mo Binary System by Electromotive Force Measurement Using a Y_2O_3-Stabilized ZrO_2 Solid Electrolyte. 653-659B

Iron compounds, Welding
Simulation of Time-Dependent Pool Shape during Laser Spot Welding: Transient Effects. 2947-2961A

Iron ores, Composite materials
Estimation and modeling of parameters for direct reduction in iron ore/coal composites: Part I. Physical parameters. 93-102B
Estimation and modeling of parameters for direct reduction in iron ore/coal composites: part II. Kinetic parameters. 255-266B

Iron oxides, Heat treatment
Annealing behavior of submicrocrystalline oxide-bearing iron produced by mechanical alloying. 131-138A

Iron oxides, Physical properties
Marangoni convection driven by thermocapillary and solutocapillary forces in the Fe-O alloy pool during the solidification or remelting process. 37-49B

Ironmaking
A cold model study of raceway hysteresis. 183-191B
Influence of Ash on Interfacial Reactions between Coke and Liquid Iron. 573-580B

Journal bearings
On the Wear of a Cobalt-Based Superalloy in Zinc Baths. 2387-2396A

Lamellar structure
A new analytical approach to predict spacing selection in lamellar and rod eutectic systems. 383-394A
Mechanisms of globularization of Ti-6Al-4V during static heat treatment. 691-698A
Communication: Further discussion on the free growth behavior in the solidification of undercooled eutectic melts. 1393-1396A
Nanostructure in an Al-Mg-Sc Alloy Processed by Low-Energy Ball Milling at Cryogenic Temperature. 1985-1992A
Influence of Oxygen on Phase Transformations in a Ti-48 At. Pct Al Alloy. 2067-2075A
Precipitation Strengthening in K5-Series γ-TiAl Alloyed with Silicon and Carbon. 2129-2138A
Primary Creep Behavior of Ti-48Al-2W as a Function of Stress and Lamellar Morphology. 2177-2190A
Microstructure Stability during Creep Deformation of Hard-Oriented Polysynthetically Twinned Crystal of TiAl Alloy. 2191-2198A

Laminar flow
Laminar-turbulent transition in an electromagnetically levitated droplet. 29-36B

Laminates, Mechanical properties
Effects of oxidation on the fatigue crack growth resistance and the interfacial properties of a Ti-MMC laminate composite. 1705-1717A

Laminates, Microstructure
Morphological stability of copper-silver multilayer thin films at elevated temperatures. 1043-1054A

Laser beam welding
Nitrogen absorption by iron and stainless steels during CO_2 laser welding. 75-82B
Simulation of Time-Dependent Pool Shape during Laser Spot Welding: Transient Effects. 2947-2961A

Laser processing
In-Situ Reactive Processing of Nickel Aluminides by Laser-Engineered Net Shaping. 2633-2641A

Latent heat
A study of microsegregation in Al-Cu using a novel single-pan scanning calorimeter. 441-447A

Laterites, Extraction
Communication: A Surface Reaction Kinetic Model to Compare the Reductive Leaching of Iron from Goethite, Magnetite, and Limonitic Nickel Laterite Ores by Acidic Sulfur Dioxide. 735-738B

Lattice instability
Structure and stability of a new ternary hexagonal phase in Al_3Ti-based Al-Ti-V alloys. 491-501A

Lattice parameters
Effects of process-control agents on mechanical alloying of nanostructured aluminum alloys. 159-170A
Phase transformations in a Cu-14.2Al-7.8Ni alloy. 503-509A
Precipitation of Heusler phase (Ni_2TiAl) from B2-TiNi in Ni-Ti-Al and Ni-Ti-Al-x (x = Hf, Zr) Alloys. 1221-1234A
Phase equilibria in prototype Nb-Pd-Hf-Al alloys 1771-1782A
Mutual Effects of Hydrogenation and Deformation in Ti-Nb Alloys. 2199-2206A
Structural Properties and Stability of Metastable Phases in the Zr-Nb System: Part II. Aging of Bcc (β) Alloys and Assessment of β-Zr. 2771-2779A
Thermodynamics of Stress-induced Interstitial Redistribution in Body-Centered Cubic Metals. 2819-2825A

Lattice vacancies
The role of tin in the hot-ductility deterioration of a low-carbon steel. 1611-1616A
Roles of Microalloying Elements on the Cluster Formation in the Initial Stage of Phase Decomposition of Al-Based Alloys. 2745-2755A

Laves phase
Relationships of Fracture Toughness and Dislocation Mobility in Intermetallics. 2315-2328A

Leaching
Effect of sulfides on gold dissolution in ammoniacal thiosulfate medium. 5-13B
Sulfidation of chalcopyrite with elemental sulfur. 15-23B
Leaching of sulfidized chalcopyrite with H_2SO_4-NaCl-O_2. 153-159B
Calciothermic reduction of titanium oxide in molten $CaCl_2$. 277-285B
Effect of Aging Conditions on the Leaching of Mechanically Activated Pyrite and Sphalerite. 639-645B
Communication: A Surface Reaction Kinetic Model to Compare the Reductive Leaching of Iron from Goethite, Magnetite, and Limonitic Nickel Laterite Ores by Acidic Sulfur Dioxide. 735-738B

Lead (metal)
Evaluation of a Rayleigh-number-based freckle criterion for Pb-Sn alloys and Ni-base superalloys. 1525-1536A

Lead (metal), Extraction
Emerging technologies in extraction and processing of metals. 137-152B

Lead (metal), Phases (state of matter)
Experimental Study of Phase Equilibria in the PbO-ZnO"Fe_2O_3"-(CaO + SiO_2) System in Air for the Lead and Zinc Blast Furnace Sinters (CaO/SiO_2 Weight Ratio of 0.933 and PbO/(CaO + SiO_2) Ratios of 2.0 and 3.2). 383-397B

Lead (metal), Reduction (chemical)
The Effect of the CaO/SiO_2 Ratio on the Phase Equilibria in the ZnO-"Fe_2O_3"-(PbO + CaO + SiO_2) System in Air: CaO/SiO_2 = 0.1, PbO/(CaO + SiO_2) = 6.2, and CaO/SiO_2 =0.6, PbO/(CaO + SiO_2) = 4.3. 369-382B

Lead base alloys, Directional solidification
A Mushy-Zone Rayleigh Number to Describe Interdendritic Convection during Directional Solidification of Hypoeutectic Pb-Sb and Pb-Sn Alloys. 2365-2376A
Effect of Crucible Diameter Reduction on the Convection, Macrosegregation, and Dendritic Morphology during Directional Solidification of Pb-2.2 Wt Pct Sb Alloy. 2985-2990A

Lead base alloys, Microstructure
Evaluation of a Rayleigh-number-based freckle criterion for Pb-Sn alloys and Ni-base superalloys. 1525-1536A

Levitation
Laminar-turbulent transition in an electromagnetically levitated droplet. 29-36B

Levitation casting
Microstructure and fatigue characteristics of direct chill cast and electromagnetic cast 2024 Al alloy ingots. 1537-1543A

Liners, Physical properties
Thermal Analysis of Twin-Channel Induction Furnaces. 679-684B

Liquid flow
Permeability measurements of the flow of interdendritic liquid in equiaxed aluminum-silicon alloys. 25-28B

Liquid metals
The Prediction and Representation of Phase Equilibria and Physicochemical Properties in Complex Slag Systems. 595-603B
X-Ray-Based Measurement of Composition during Electron Beam Melting of AISI 316 Stainless Steel: Part I. Experimental Setup and Processing of Spectra. 851-861A
X-Ray-Based Measurement of Composition during Electron Beam Melting of AISI 316 Stainless Steel: Part II. Evaporative Processes and Simulation. 863-877A
Thermal Conductivities of Molten Iron, Cobalt, and Nickel by Laser Flash Method. 2801-2807A

Liquid metals, Alloy development
Deep filtration of molten aluminum using ceramic foam filters and ceramic particles with active coatings. 1183-1191A

Liquid metals, Diffusion
Communication: The Entropy Factor in Liquid Diffusion. 882-883A

Liquid metals, Microstructure
Communication: Nonisothermal growth and dissolution of inclusions in liquid steels. 267-269B

Liquid metals, Physical properties
Experimental and Theoretical Studies of the Motion Generated by a Two- Frequency Magnetic Field at the Free Surface of a Gallium Pool. 669-678B

Liquid phases
An atomistic study of solid/liquid interfaces and phase equilibrium in binary systems. 435-439A
The effect of Marangoni convection on fibrous monotectic growth. 449-457A
The Effect of Salt-Phase Composition on the Rate of Soda-Ash Roasting of Chromite Ores. 555-563B
Mixing and Solid-Liquid Mass Transfer Rates in a Creusot Loire Uddeholm Vessel: A Water Model Case Study. 833-842B
Peritectic Reaction and Solidification in Iron-Nickel Alloys. 1931-1940A
Isothermal Section of the Ternary Sn-Cu-Ni System and Interfacial Reactions in the Sn-Cu/Ni Couples at 800 °C. 2281-2287A
Modeling of Marangoni-Induced Droplet Motion and Melt Convection during Solidification of Hypermonotectic Alloys. 3009-3019A

Liquidus
Phase-equilibrium data and liquidus for the system 'MnO'-CaO-Al_2O_3-SiO_2 at Al_2O_3/SiO_2 of 0.55 and 0.65. 173-182B
The Effect of the CaO/SiO_2 Ratio on the Phase Equilibria in the ZnO-"Fe_2O_3"-(PbO + CaO + SiO_2) System in Air: CaO/SiO_2 = 0.1, PbO/(CaO + SiO_2) = 6.2, and CaO/SiO_2 =0.6, PbO/(CaO + SiO_2) = 4.3. 369-382B
Experimental Study of Phase Equilibria in the PbO-ZnO"Fe_2O_3"-(CaO + SiO_2) System in Air for the Lead and Zinc Blast Furnace Sinters (CaO/SiO_2 Weight Ratio of 0.933 and PbO/(CaO + SiO_2) Ratios of 2.0 and 3.2). 383-397B
Phase Equilibria and Thermodynamic Properties of the Cu_2O-CaO- Na_2O System in Equilibrium with Copper. 631-638B
Stabilization of Thermosolutal Convective Instabilities in Ni-Based Single-Crystal Superalloys: Carbide Precipitation and Rayleigh Numbers. 1953-1967A
A Mushy-Zone Rayleigh Number to Describe Interdendritic Convection during Directional Solidification of Hypoeutectic Pb-Sb and Pb-Sn Alloys. 2365-2376A

Lost foam casting
Investigation of the Performance of an Expandable Polystyrene Injector for Use in the Lost-Foam Casting Process. 843-851B

Low alloy steels, Mechanical properties
Effects of tensile prestrain on the notch toughness of low-alloy steel. 1055-1068A
Analysis of fracture toughness in the transition-temperature region of an Mn-Mo-Ni low-alloy steel. 1275-1281A
A Novel Inclusion Inspection Method Employing 20 kHz Fatigue Testing. 2517-2526A

Low alloy steels, Phase transformations
On the application of the additivity rule in pearlitic transformation in low alloy steels. 1259-1264A

Low carbon steels, Coating
Processing and Characterization of Plasma-Sprayed Ceramic Coatings on Steel Substrate: Part I. On Coating Characteristics. 1909-1918A

Low carbon steels, Heat treatment
Aspects of Orientation-Dependent Grain Growth in Extra-Low Carbon and Interstitial-Free Steels during Continuous Annealing. 827-839A
Recrystallization of a cold-rolled low-carbon steel by cold-plasma-discharge rapid annealing. 1341-1348A

Low carbon steels, Mechanical properties
Postnecking elastoplastic characterization: degree of approximation in the Bridgman method and properties of the flow-stress/true-stress ratio. 615-624A
The role of tin in the hot-ductility deterioration of a low-carbon steel. 1611-1616A
Large Strain Mechanical Behavior of 1018 Cold-Rolled Steel over a Wide Range of Strain Rates. 2873-2885A
Low carbon steels, Microstructure
Delta-Ferrite Recovery Structures in Low-Carbon Steels. 495-501B
Effect of rolling temperature on the deformation and recrystallization textures of warm-rolled steels. 1163-1174A
Microstructural Aspects of QuasiPolygonal and Granular Bainitic Ferrites in an Ultra-Low-Carbon Interstitial-Free High-Strength Steel. 2025-2026A
Analysis of Different Acicular Ferrite Microstructures in Low-Carbon Steels by Electron Backscattered Diffraction. Study of Their Toughness Behavior. 2505-2516A
Low carbon steels, Physical properties
Marangoni Flow at the Gas/Melt Interface of Steel. 483-493B
Low cycle fatigue
Morphological healing evolution of intragranular penny-shaped microcracks by surface diffusion: Part II. Experiments. 287-294A
High-temperature low-cycle fatigue behavior of K40S cobalt-base superalloy. 979-986A
The low-cycle fatigue and fatigue-crack-growth behavior of HAYNES HR-120 alloy. 1451-1460A
Low expansion alloys, Bonding
Diffusion bonding of Si_3N_4-TiN composite with nickel-based interlayers. 1627-1636A
Lubrication
Modeling Transient Slag-Layer Phenomena in the Shell/mold Gap in Continuous Casting of Steel. 707-725B
Luders lines
Orientation dependence of dislocation structures in cyclically deformed Cu-16 At. Pct Al alloy single crystals. 307-318A
Magnesite refractories, Reduction (chemical)
Kinetics and Mechanism of Carbothermic Reduction of Magnesia. 433-437B
Magnesium base alloys, Mechanical properties
A Taylor Model Based Description of the Proof Stress of Magnesium AZ31 during Hot Working. 1799-1806A
Magnesium base alloys, Welding
Basal plane texture and flow pattern in friction stir weld of a magnesium alloy. 987-994A
Magnesium oxide, Reactions (chemical)
Improvement of Desulfurization Efficiency of Molten Iron with Magnesium Vapor Produced In Situ by Aluminothermic Reduction of Magnesium Oxide. 619-629B
Magnetic fields
Experimental and Theoretical Studies of the Motion Generated by a Two- Frequency Magnetic Field at the Free Surface of a Gallium Pool. 669-678B
Application of electromagnetic separation of phases in alloy melt to produce in-situ surface and functionally gradient composites. 1719-1725A
Effect of Crucible Diameter Reduction on the Convection, Macrosegregation, and Dendritic Morphology during Directional Solidification of Pb-2.2 Wt Pct Sb Alloy. 2985-2990A
Magnetic permeability
Effect of temper rolling on texture formation in a low loss cold-rolled magnetic lamination steel. 1311-1319A
Magnetite, Extraction
Communication: A Surface Reaction Kinetic Model to Compare the Reductive Leaching of Iron from Goethite, Magnetite, and Limonitic Nickel Laterite Ores by Acidic Sulfur Dioxide. 735-738B
Magnetohydrodynamics
Laminar-turbulent transition in an electromagnetically levitated droplet. 29-36B
Manganese, Alloying elements
The nucleation of Fe-rich phases on oxide films in Al-11.5Si-0.4Mg cast alloys. 1409-1420A
Influence of Alloying Elements on the Kinetic of Massive Transformation in Gamma Titanium Aluminides. 2053-2066A
Manganese base alloys, Thermal properties
Thermodynamics of Nitrogen in Mn-Fe-C Melts. 853-859B
Manganese compounds, Thermal properties
Thermodynamics of carbon in liquid manganese and ferromanganese alloys. 51-59B
Manganese steels, Microstructure
The Role of Nitrogen on the Deformation Response of Hadfield Steel Single Crystals. 1821-1831A
Manufacturing
Communication: Spray deposited metal-carbon fiber reinforced polymer hybrid structures. 421-424A
Marforming
The Effect of Severe Marforming on Shape Memory Characteristics of a Ti-Rich NiTi Alloy Processed Using Equal Channel Angular Extrusion. 2527-2539A
Martensite
Constrained phase-transformation of a TiNi shape-memory alloy. 219-223A
Effect of deformation schedule on the microstructure and mechanical properties of a thermomechanically processed C-Mn-Si transformation-induced plasticity steel. 1599-1609A
Martensite Crystallography - the Apparent Controversy between the Infinitesimal Deformation Approach and the Phenomenological Theory of Martensitic Transformations. 1783-1786A
Microstructural Characterization of a Platinum-Modified Diffusion Aluminide Bond Coat for Thermal Barrier Coatings. 2289-2299A
The Effects of Cold Working on Sensitization and Intergranular Corrosion Behavior of AISI 304 Stainless Steel. 2441-2447A
Martensitic stainless steels, Mechanical properties
The effect of the strain path on the work hardening of austenitic and ferritic stainless steels in axisymmetric drawing. 589-601A
Effect of quenching, tempering, and cold rolling on creep deformation behavior of a tempered martensitic 9Cr-1W steel. 913-925A
Synergetic Effect of Hardness and Phosphorus Grain-Boundary Segregation on the Ductile-to-Brittle Transition Temperature of 17-4 PH Steel. 2483-2491A
Martensitic stainless steels, Microstructure
Coarsening kinetics of multicomponent MC-type carbides in high-strength low-alloy steels. 1565-1573A
Martensitic transformations
Detwinning in NiTi alloys. 5-13A
Phase transformations in a Cu-14.2Al-7.8Ni alloy. 503-509A
Observations and analysis of the influence of phase transformations on the instability of the thermally grown oxide in a thermal barrier system. 511-522A
Precipitation of Heusler phase (Ni_2TiAl) from B2-TiNi in Ni-Ti-Al and Ni-Ti-Al-x (x = Hf, Zr) Alloys. 1221-1234A
Martensite Crystallography - the Apparent Controversy between the Infinitesimal Deformation Approach and the Phenomenological Theory of Martensitic Transformations. 1783-1786A
Effects of Ternary Additions on the Thermoelastic Martensitic Transformation of NiAl. 2089-2095A
The Effect of Severe Marforming on Shape Memory Characteristics of a Ti-Rich NiTi Alloy Processed Using Equal Channel Angular Extrusion. 2527-2539A
Characterization of Microstructure in Laser-Surface-Alloyed Layers of Aluminum on Nickel. 2621-2631A
Mass balance
A Polymeric Approach to the Sulfide Capacity of Silicate Slags and Melts. 399-410B
Mass production
Reduction Kinetics of Fe_2MoO_4 Fine Powder by Hydrogen in a Fluidized Bed. 661-667B
Mass transfer
Kinetics of reduction of ferric iron in Fe_2O_3-CaO-SiO_2-Al_2O_3 Slags under Argon, CO-CO_2, or H_2-H_2O. 225-234B
Mixing and Solid-Liquid Mass Transfer Rates in a Creusot Loire Uddeholm Vessel: A Water Model Case Study. 833-842B
The Rate of Antimony Elimination from Molten Copper by the Use of Na_2CO_3 Slag. 869-879B
Master alloys, Synthesis
Synthesis mechanism of an Al-Ti-C grain refiner master alloy prepared by a new method. 1727-1733A
Mathematical analysis
Communication: Evaluation of Evaporation Losses during Electron-Beam Melting of Ti-Al-V Alloys. 911-915B
On the analysis of grain size in bulk nanocrystalline materials via x-ray diffraction. 1349-1355A
The nucleation of Fe-rich phases on oxide films in Al-11.5Si-0.4Mg cast alloys. 1409-1420A
Coarsening kinetics of multicomponent MC-type carbides in high-strength low-alloy steels. 1565-1573A
Thermodynamic Calculations for Nb-Containing High-Speed Steels and White Cast-Iron Alloys. 1749-1758A
Martensite Crystallography - the Apparent Controversy between the Infinitesimal Deformation Approach and the Phenomenological Theory of Martensitic Transformations. 1783-1786A
Theory of Interface Properties for Carbide Precipitates in TiAl. 2097-2101A
Structural Properties and Stability of Metastable Phases in the Zr-Nb System: Part II. Aging of Bcc (β) Alloys and Assessment of β-Zr. 2771-2779A
Thermodynamics of Stress-induced Interstitial Redistribution in Body-Centered Cubic Metals. 2819-2825A
Mathematical models
Asymptotic approximation and numerical simulation of electromagnetic casting. 83-91B
Estimation and modeling of parameters for direct reduction in iron ore/coal composites: Part I. Physical parameters. 93-102B
Mathematical model of COREX melter gasifier: Part I. Steady-state model. 103-114B
Mathematical model of COREX melter gasifier: Part II. Dynamic model. 115-119B
A Polymeric Approach to the Sulfide Capacity of Silicate Slags and Melts. 399-410B
Simulation of Macroscopic Solidification with an Incorporated One-Dimensional Microsegregation Model Coupled to Thermodynamic Software. 411-419B
Mathematical Modeling of Aluminum Evaporation During Electron-Beam Cold-Hearth Melting of Ti-6Al-4V Ingots. 447-454B
Modeling of the Solidification Process in a Continuous Casting Installation for Steel Slabs. 455-473B
From Viscosity and Surface Tension to Marangoni Flow in Melts. 517-523B
The Prediction and Representation of Phase Equilibria and Physicochemical Properties in Complex Slag Systems. 595-603B
Phase Equilibria and Thermodynamic Properties of the Cu_2O-CaO- Na_2O System in Equilibrium with Copper. 631-638B
Heat Transfer and Solidification Model of Continuous Slab Casting: CON1D. 685-705B
Modeling Transient Slag-Layer Phenomena in the Shell/mold

Gap in Continuous Casting of Steel. 707-725B
Modeling of the Atomic Ordering Processes in Fe_3Al Intermetallics by the Monte Carlo Simulation Method Combined with Electronic Theory of Alloys. 721-734A
A Composite Model for the Grain-Size Dependence of Yield Stress of Nanograined Materials. 765-772A
Kinetics of In-Situ Formation of AlN in Al Alloy Melts by Bubbling Ammonia Gas. 793-804B
Thermodynamics of Nitrogen in Mn-Fe-C Melts. 853-859B
X-Ray-Based Measurement of Composition during Electron Beam Melting of AISI 316 Stainless Steel: Part II. Evaporative Processes and Simulation. 863-877A
Communication: The Entropy Factor in Liquid Diffusion. 882-883A
Communication: Influence of Coating an Thermal Response of Composites Reinforced with Anisotropic Fibers. 883-887A
A Thermodynamic Study of Liquid Fe-Si-B Alloys; an Influence of Ternary Associates on a Liquid → Glass Transition. 887-898B
Studies on Transport Phenomena during Directional Solidification of a Noneutectic Binary Solution Cooled from the Top. 899-909B
Solidification of Hastelloy alloys: an alternative interpretation. 1127-1132A
Precipitation of Heusler phase (Ni_2TiAl) from B2-TiNi in Ni-Ti-Al and Ni-Ti-Al-x (x = Hf, Zr) Alloys. 1221-1234A
Effect of prestrain and deformation temperature on the recrystallization behavior of steels microalloyed with niobium. 1237-1247A
On the application of the additivity rule in pearlitic transformation in low alloy steels. 1259-1264A
Microstructure evolution in three-dimensional inhomogeneous elastic media. 1421-1431A
Deformation, residual stress, and constitutive relations for quenched W319 aluminum. 1483-1491A
Coarsening kinetics of multicomponent MC-type carbides in high-strength low-alloy steels. 1565-1573A
A solutal interaction mechanism for the columnar-to-equiaxed transition in alloy solidification. 1657-1674A
The Role of Nitrogen on the Deformation Response of Hadfield Steel Single Crystals. 1821-1831A
Scatter in Fatigue Life Due to Effects of Porosity in Cast A356-T6 Aluminum-Silicon Alloys. 1879-1890A
Microstructure Evolution during Alpha-Beta Heat Treatment of Ti-6Al-4V. 2377-2386A
Prediction of Limit Strains in Superplastic Materials. 2559-2564A
Microstructure Development during Hot Deformation of Aluminum to Large Strains. 2737-2744A
Roles of Microalloying Elements on the Cluster Formation in the Initial Stage of Phase Decomposition of Al-Based Alloys. 2745-2755A
Creep of Aluminum-Based Closed-Cell Foams. 2809-2817A
A Constitutive Description for Aluminum-0.1 Pct Magnesium Alloy under Hot Working Conditions. 2837-2846A
Large Strain Mechanical Behavior of 1018 Cold-Rolled Steel over a Wide Range of Strain Rates. 2873-2885A
Precipitation Strengthening of the Aluminum Alloy AA6111. 2913-2924A
Simulation of Time-Dependent Pool Shape during Laser Spot Welding: Transient Effects. 2947-2961A
Susceptibility of Iron Castings to Heat Absorption from an Electric Arc and to Hardened-Layer Shaping. 2973-2984A
Nucleation-Controlled Microstructures and Anomalous Eutectic Formation in Undercooled Co-Sn and Ni-Si Eutectic Melts. 2999-3008A
Modeling of Marangoni-Induced Droplet Motion and Melt Convection during Solidification of Hypermonotectic Alloys. 3009-3019A
Thermophysical Properties of Roll-Compacted Nickel Sheet for High-Density Infrared Sheet Fabrication. 3043-3054A

Matrices (base phases)
Measurement of the lattice misfit of the nickel-base superalloy SC16 by high-energy synchrotron radiation. 193-197A

Mattes, Physical properties
Entrainment of a Two-Layer Liquid through a Taphole. 821-832B

Mean free path
The Role of Nitrogen on the Deformation Response of Hadfield Steel Single Crystals. 1821-1831A

Mechanical alloying
Effects of process-control agents on mechanical alloying of nanostructured aluminum alloys. 159-170A
Mechanically induced solid-state devitrifications of $Zr_{70}Pd_{20}Ni_{10}$ glassy alloy powders. 893-898A

Mechanical measurements
Mechanical measurements of passive film fracture on an austenitic stainless steel. 1291-1296A

Mechanical twinning
Communication: Mechanical milling-induced deformation twinning in fcc materials with high stacking fault energy. 707-712A

Mechanisms
Relaxation mechanisms in Fe-Al-C alloys. 255-266A
Static Strain Aging Phenomena in Cold-Rolled Dual-Phase Steels. 781-792A
Communication: The Entropy Factor in Liquid Diffusion. 882-883A

Medium carbon steels, Mechanical properties
Postnecking elastoplastic characterization: degree of approximation in the Bridgman method and properties of the flow-stress/true-stress ratio. 615-624A

Medium carbon steels, Powder technology
Communication: Effect of porosity on the electrical properties of Fe-based specimens fabricated by powder metallurgy. 126-129B

Melting furnaces
Mathematical model of COREX melter gasifier: Part II. Dynamic model. 115-119B

Melts
Bubble Bursting Phenomenon in Gas/Metal/Slag Systems. 525-532B
Superheat Treatment of Al-7Si-0.55Mg Melt and Its Influences on the Solidification Structures and the Mechanical Properties. 799-806A
Synthesis mechanism of an Al-Ti-C grain refiner master alloy prepared by a new method. 1727-1733A

Melts, Physical properties
Temperature Dependence of the Refractive Index of Al_2O_3-Na_2O- SiO_2 Melts: Role of Electronic Polarizability of Oxygen Controlled by Network Structure. 549-554B

Melts, Reactions (chemical)
A Polymeric Approach to the Sulfide Capacity of Silicate Slags and Melts. 399-410B

Melts, Thermal properties
Thermodynamics of carbon in liquid manganese and ferromanganese alloys. 51-59B
Solubility of alumina in cryolite melts: measurements and modeling at 1300 K. 235-242B
Thermodynamics of Nitrogen in Mn-Fe-C Melts. 853-859B

Metal dusting
Microscale investigations of the metal-dusting corrosion mechanism on mild steel. 345-354A

Metal fibers, Composite materials
Salient shear bands and second-phase addition interactions of bulk metallic glass matrix composite. 1147-1152A

Metal matrix composites, Coatings
Effects of TiC composite coating on electrode degradation in microresistance welding of nickel-plated steel. 1501-1511A

Metal matrix composites, Mechanical properties
Salient shear bands and second-phase addition interactions of bulk metallic glass matrix composite. 1147-1152A
Bridging mechanisms in a Tiβ21s/SCS-6 composite: in-situ scanning electron microscopy study. 1193-1202A
Strength of SCS-6 fibers in a Tiβ21s/SCS-6 composite before and after fatigue. 1203-1213A
Effects of oxidation on the fatigue crack growth resistance and the interfacial properties of a Ti-MMC laminate composite. 1705-1717A
Fabrication and Creep Properties of Superalloy-Zirconia Composites. 2643-2653A

Metal matrix composites, Melting
Emerging technologies in extraction and processing of metals. 137-152B

Metal matrix composites, Microstructure
Deformation Mechanisms in Ti-6Al-4V/TiC Composites. 1869-1877A

Metal vapors
Nitrogen absorption by iron and stainless steels during CO_2 laser welding. 75-82B

Metallic glasses, Composite materials
Salient shear bands and second-phase addition interactions of bulk metallic glass matrix composite. 1147-1152A

Metallic glasses, Mechanical properties
Elasto-Plastic Load Transfer in Bulk Metallic Glass Composites Containing Ductile Particles. 1787-1797A
An Investigation of Contact Deformation, Fracture, and Fatigue Behavior in Bulk Metallic Glasses. 1851-1861A

Metallurgical coke, Reactions (chemical)
Influence of Ash on Interfacial Reactions between Coke and Liquid Iron. 573-580B

Metastable phases
Iron Intermetallic Phases in the Al Corner of the Al-Si-Fe System. 807-825A
Precipitation of Heusler phase (Ni_2TiAl) from B2-TiNi in Ni-Ti-Al and Ni-Ti-Al-x (x = Hf, Zr) Alloys. 1221-1234A
Effect of service-simulated aging on the microstructure and properties of casing casting steel (1CrMoV) vis-a-vis remnant life assessment. 1265-1274A
Characterization of Microstructure in Laser-Surface-Alloyed Layers of Aluminum on Nickel. 2621-2631A
Structural Properties and Stability of Metastable Phases in the Zr-Nb System: Part II. Aging of Bcc (β) Alloys and Assessment of β-Zr. 2771-2779A

Microalloying
Creep Behavior of TiAl Alloys with Enhanced High-Temperature Capability. 2149-2164A
Roles of Microalloying Elements on the Cluster Formation in the Initial Stage of Phase Decomposition of Al-Based Alloys. 2745-2755A

Microchemistry
Investigation of Dendrite-Boundary Microchemistry in Alloy 182 using Auger Electron Spectroscopy Analysis. 1891-1899A

Microcracks
Morphological healing evolution of intragranular penny-shaped microcracks by surface diffusion: Part I. Simulation. 277-285A
Morphological healing evolution of intragranular penny-shaped microcracks by surface diffusion: Part II. Experiments. 287-294A
Effects of tensile prestrain on the notch toughness of low-alloy steel. 1055-1068A
Microstructural evolution and deformation of cryomilled nanocrystalline Al-Ti-Cu alloy. 1473-1481A
An Investigation of Contact Deformation, Fracture, and Fatigue Behavior in Bulk Metallic Glasses. 1851-1861A
Effect of Precyclic Loading on Stress-Corrosion-Cracking Initiation in An X-65 Pipeline Steel Exposed to Near-Neutral pH Soil Environment. 2601-2608A
Density Changes of Iron during Morphological Healing Evolution of Internal Fatigue Microcracks. 2925-2933A

Microelectromechanical systems, Heat treatment
Strengthening by high densities of nanometer-size precipitates: oxides in Ni. 935-949A

Microgravity
Laminar-turbulent transition in an electromagnetically levitated

droplet. 29-36B
Microhardness
Mechanical properties of iron processed by severe plastic deformation. 71-83A
Spark Plasma Sintering of Al-Si-Cu-Fe Quasi-Crystalline Powder. 841-849A
Titanium-Titanium Boride (Ti-TiB) Functionally Graded Materials through Reaction Sintering: Synthesis, Microstructure, and Properties. 1993-2003A
Mutual Effects of Hydrogenation and Deformation in Ti-Nb Alloys. 2199-2206A
Susceptibility of Iron Castings to Heat Absorption from an Electric Arc and to Hardened-Layer Shaping. 2973-2984A
Microporosity
The Effect of Solidification Time and Heat Treatment on the Fatigue Properties of a Cast 319 Aluminum Alloy. 1807-1820A
Microstrain
Residual Stresses in an Electron Beam Weld of Ti-834: Characterization and Numerical Modeling. 2935-2946A
Microstructural analysis
On the analysis of grain size in bulk nanocrystalline materials via x-ray diffraction. 1349-1355A
Milling (machining)
Communication: Focused ion beam milling: A practical method for preparing cast Al-Si alloy samples for transmission electron microscopy. 705-707A
Minerals, Microstructure
Cellular-to-dendritic transition during the directional solidification of binary alloys. 395-401A
Miscibility
Modeling of Marangoni-Induced Droplet Motion and Melt Convection during Solidification of Hypermonotectic Alloys. 3009-3019A
Mixing
Mixing and Solid-Liquid Mass Transfer Rates in a Creusot Loire Uddeholm Vessel: A Water Model Case Study. 833-842B
Modulation
Experimental and Theoretical Studies of the Motion Generated by a Two- Frequency Magnetic Field at the Free Surface of a Gallium Pool. 669-678B
Modulus of elasticity
Communication: Influence of Coating an Thermal Response of Composites Reinforced with Anisotropic Fibers. 883-887A
Aging response of the young's modulus and mechanical properties of Ti-29Nb-13Ta-4.6Zr for biomedical applications. 1007-1012A
Molds
The critical amount of nitrogen on the formation of nitrogen gas pores during solidification of 25Cr-7Ni duplex stainless steels. 313-320B
Molecular dynamics
An atomistic study of solid/liquid interfaces and phase equilibrium in binary systems. 435-439A
Molybdates, Reduction (chemical)
Reduction Kinetics of Fe_2MoO_4 Fine Powder by Hydrogen in a Fluidized Bed. 661-667B
Molybdenum, Alloying elements
Hot working and recrystallization of as-cast 316L. 1683-1703A
Molybdenum, Composite materials
Theoretical Design of Sedimentation Applied to the Fabrication of Functionally Graded Materials. 605-609B
Molybdenum base alloys, Composite materials
A Review of Very-High-Temperature Nb-Silicide-Based Composites. 2043-2052A
Molybdenum compounds, Mechanical properties
On the fracture and fatigue properties of Mo-Mo_3Si-Mo_5SiB_2 refractory intermetallic alloys at ambient to elevated temperatures (25°C to 1300°C). 225-239A
Molybdenum disilicide, Mechanical properties
High-temperature deformation behavior of coarse- and fine-grained $MoSi_2$ with different silica contents. 1069-1088A
Molybdenum disilicide, Reactions (chemical)
Investigation of 'shock-induced' and 'shock-assisted' chemical reactions in Mo + 2Si powder mixtures. 15-23A
Monitoring
Thermal Analysis of Twin-Channel Induction Furnaces. 679-684B
X-Ray-Based Measurement of Composition during Electron Beam Melting of AISI 316 Stainless Steel: Part I. Experimental Setup and Processing of Spectra. 851-861A
Monotectic reactions
The effect of Marangoni convection on fibrous monotectic growth. 449-457A
Modeling of Marangoni-Induced Droplet Motion and Melt Convection during Solidification of Hypermonotectic Alloys. 3009-3019A
Morphology
Morphology and kinetics of discontinuous precipitation and dissolution in an Fe-8.5Al-27Mn-1.0Si-0.92C alloy. 25-31A
Crystal growth in liquid steel during secondary metallurgy. 161-171B
On the Precipitation-Hardening Behavior of the Al-Mg-Si-Cu Alloy AA6111. 751-763A
Superheat Treatment of Al-7Si-0.55Mg Melt and Its Influences on the Solidification Structures and the Mechanical Properties. 799-806A
Communication: Influence of Coating an Thermal Response of Composites Reinforced with Anisotropic Fibers. 883-887A
Solidification of Hastelloy alloys: an alternative interpretation. 1127-1132A
Effect of microstructure on hydrogen embrittlement of weld-simulated HSLA-80 and HSLA-100 steels. 1297-1309A
Synthesis of ductile titanium-titanium boride (Ti-TiB) composites with a beta-titanium matrix: the nature of TiB formation and composite properties. 1371-1385A
Coarsening kinetics of multicomponent MC-type carbides in high-strength low-alloy steels. 1565-1573A
A Method for Measuring Microstructural-Scale Strains Using a Scanning Electron Microscope: Applications to γ-Titanium Aluminides. 2301-2313A
Analysis of Different Acicular Ferrite Microstructures in Low-Carbon Steels by Electron Backscattered Diffraction. Study of Their Toughness Behavior. 2505-2516A
Investigation of Microstructural Changes in INCONEL 706 at High Temperatures by In-Situ Small-Angle Neutron Scattering. 2781-2792A
Effect of Crucible Diameter Reduction on the Convection, Macrosegregation, and Dendritic Morphology during Directional Solidification of Pb-2.2 Wt Pct Sb Alloy. 2985-2990A
Morphology, Heating effects
Aspects of Orientation-Dependent Grain Growth in Extra-Low Carbon and Interstitial-Free Steels during Continuous Annealing. 827-839A
Multilayers, Microstructure
Morphological stability of copper-silver multilayer thin films at elevated temperatures. 1043-1054A
Nanomaterials, Mechanical properties
A Composite Model for the Grain-Size Dependence of Yield Stress of Nanograined Materials. 765-772A
Nanomaterials, Melting
Emerging technologies in extraction and processing of metals. 137-152B
Nanostructure
On the analysis of grain size in bulk nanocrystalline materials via x-ray diffraction. 1349-1355A
Microstructural evolution and deformation of cryomilled nanocrystalline Al-Ti-Cu alloy. 1473-1481A
Nanostructure in an Al-Mg-Sc Alloy Processed by Low-Energy Ball Milling at Cryogenic Temperature. 1985-1992A
Near net shaping
Composition Control in the Direct Laser-Deposition Process. 439-445B
In-Situ Reactive Processing of Nickel Aluminides by Laser-Engineered Net Shaping. 2633-2641A
Necking
Mechanical properties of an ultrafine-grained Al-7.5 Pct Mg alloy. 603-613A
Postnecking elastoplastic characterization: degree of approximation in the Bridgman method and properties of the flow-stress/true-stress ratio. 615-624A
Neutron scattering
Investigation of Microstructural Changes in INCONEL 706 at High Temperatures by In-Situ Small-Angle Neutron Scattering. 2781-2792A
New technology
Emerging technologies in extraction and processing of metals. 137-152B
Recrystallization of a cold-rolled low-carbon steel by cold-plasma-discharge rapid annealing. 1341-1348A
Nickel, Alloying elements
Communication: Activities of Phosphorus in Copper-Nickel Liquid Alloys Saturated with Solid Copper-Nickel Solid Solutions at 1573 K. 741-744B
Nickel, Binary systems
The Thermodynamics of Tetrataenite and Awaruite: A Review of the Fe-Ni Phase Diagram. 1759-1769A
Peritectic Reaction and Solidification in Iron-Nickel Alloys. 1931-1940A
Nickel, Crystal growth
Communication: On the Atomistic Theory of Solidification. 2683-2688A
Nickel, Mechanical properties
Grain-Size Effects on Tensile Behavior of Nickel and AISI 316L Stainless Steel. 2329-2340A
Nickel, Physical properties
Thermophysical Properties of Roll-Compacted Nickel Sheet for High-Density Infrared Sheet Fabrication. 3043-3054A
Nickel, Reduction (chemical)
Communication: Nickel, copper, and cobalt slag losses during converting. 121-125B
Hydrogen Reduction of Oxidized Nickel Concentrates. 805-811B
Nickel, Ternary systems
Phase equilibria of the ternary Al-Cu-Ni system and interfacial reactions of related systems at 800°C. 199-209A
Isothermal Section of the Ternary Sn-Cu-Ni System and Interfacial Reactions in the Sn-Cu/Ni Couples at 800 °C. 2281-2287A
Nickel, Thermal properties
Thermal Conductivities of Molten Iron, Cobalt, and Nickel by Laser Flash Method. 2801-2807A
Nickel, Welding
Effects of TiC composite coating on electrode degradation in microresistance welding of nickel-plated steel. 1501-1511A
Nickel base alloys
Fabrication and Creep Properties of Superalloy-Zirconia Composites. 2643-2653A
Nickel base alloys, Bonding
Diffusion bonding of Si_3N_4-TiN composite with nickel-based interlayers. 1627-1636A
Nickel base alloys, Composite materials
Investigation of a Directionally Solidified NiAl/Cr(Mo) Composite Alloyed with Hf. 2663-2670A

Nickel base alloys, Crystal growth
Nanocrystalline Ni coatings strengthened with ultrafine particles. 673-683A
Solidification of Hastelloy alloys: an alternative interpretation. 1127-1132A
Nickel base alloys, Crystal lattices
Measurement of the lattice misfit of the nickel-base superalloy SC16 by high-energy synchrotron radiation. 193-197A
Effect of hydrogen charging on dislocation behavior in Ni-Cr and Ni_2Cr alloys. 1249-1257A
Nickel base alloys, Directional solidification
Stabilization of Thermosolutal Convective Instabilities in Ni-Based Single-Crystal Superalloys: Carbide Precipitation and Rayleigh Numbers. 1953-1967A
Nickel base alloys, Heat treatment
Strengthening by high densities of nanometer-size precipitates: oxides in Ni. 935-949A
Nickel base alloys, Materials substitution
A Review of Very-High-Temperature Nb-Silicide-Based Composites. 2043-2052A
Nickel base alloys, Mechanical properties
A microstructure-based fatigue-crack-initiation model. 43-57A
Communication: Strength differential measurements in IN 718: effects of superimposed. 1736-1739A
Measurement and Modeling of Creep in Open-Cell NiAl Foams. 2353-2363A
Crack Initiation and Propagation in 50.9 At. pct Ni-Ti Pseudoelastic Shape-Memory Wires in Bending-Rotation Fatigue. 2847-2860A
Nickel base alloys, Microstructure
Communication: Further discussion on the free growth behavior in the solidification of undercooled eutectic melts. 1393-1396A
Microstructure evolution in three-dimensional inhomogeneous elastic media. 1421-1431A
Coherent γ'-precipitates at singular and rough grain boundaries in a model Ni-base superalloy. 1433-1437A
Evaluation of a Rayleigh-number-based freckle criterion for Pb-Sn alloys and Ni-base superalloys. 1525-1536A
Elastic Constants of Face-Centered Cubic and $L1_2$ Ni-Si Alloys: Composition and Temperature Dependence. 1863-1868A
Grain-Boundary Character Distribution in Recrystallized $L1_2$ Ordered Intermetallic Alloys. 2429-2439A
Investigation of Microstructural Changes in INCONEL 706 at High Temperatures by In-Situ Small-Angle Neutron Scattering. 2781-2792A
Nucleation-Controlled Microstructures and Anomalous Eutectic Formation in Undercooled Co-Sn and Ni-Si Eutectic Melts. 2999-3008A
Nickel base alloys, Oxidation
Some Water Vapor Effects during the Oxidation of Alloys that are α-Al_2O_3 Formers. 2609-2619A
Nickel base alloys, Phase transformations
Detwinning in NiTi alloys. 5-13A
Observations and analysis of the influence of phase transformations on the instability of the thermally grown oxide in a thermal barrier system. 511-522A
Effects of Ternary Additions on the Thermoelastic Martensitic Transformation of NiAl. 2089-2095A
The Effect of Severe Marforming on Shape Memory Characteristics of a Ti-Rich NiTi Alloy Processed Using Equal Channel Angular Extrusion. 2527-2539A
Nickel base alloys, Phases (state of matter)
Characterization of Microstructure in Laser-Surface-Alloyed Layers of Aluminum on Nickel. 2621-2631A
Nickel base alloys, Powder technology
In-Situ Reactive Processing of Nickel Aluminides by Laser-Engineered Net Shaping 2633-2641A
Nickel base alloys, Synthesis
Numerical Study of the Second Ignition for Combustion Synthesizing Ni-Al Compounds. 1969-1978A
Nickel base alloys, Thermal properties
Finite-element analysis of effects of the laser-processed bimaterial component size on stresses and distortion. 1133-1145A
Nickel base alloys, Welding
The microstructure and fracture behavior of the dissimilar alloy 690-SUS 304L joint with various Nb addition. 1097-1105A
The role of the slope out region on fatigue crack initiation in electron beam welded waspaloy. 1637-1645A
Investigation of Dendrite-Boundary Microchemistry in Alloy 182 using Auger Electron Spectroscopy Analysis. 1891-1899A
Nickel chromium molybdenum steels, Crystal lattices
Communication: Discussion of 'Lattice orientation relationship between the M_2C carbide and the ferrite matrix in the M50NiL bearing steel'. 1735A
Communication: Author's reply. 1735-1736A
Nickel compounds, Composite materials
Investigation of a Directionally Solidified NiAl/Cr(Mo) Composite Alloyed with Hf. 2663-2670A
Nickel compounds, Mechanical properties
Measurement and Modeling of Creep in Open-Cell NiAl Foams. 2353-2363A
Nickel compounds, Microstructure
Precipitation of Heusler phase (Ni_2TiAl) from B2-TiNi in Ni-Ti-Al and Ni-Ti-Al-x (x = Hf, Zr) Alloys. 1221-1234A
Microstructure evolution in three-dimensional inhomogeneous elastic media. 1421-1431A
Grain-Boundary Character Distribution in Recrystallized $L1_2$ Ordered Intermetallic Alloys. 2429-2439A
Nickel compounds, Phase transformations
Effects of Ternary Additions on the Thermoelastic Martensitic Transformation of NiAl. 2089-2095A
The Effect of Severe Marforming on Shape Memory Characteristics of a Ti-Rich NiTi Alloy Processed Using Equal Channel Angular Extrusion. 2527-2539A
Nickel compounds, Phases (state of matter)
Characterization of Microstructure in Laser-Surface-Alloyed Layers of Aluminum on Nickel. 2621-2631A
Nickel compounds, Powder technology
In-Situ Reactive Processing of Nickel Aluminides by Laser-Engineered Net Shaping. 2633-2641A
Nickel compounds, Synthesis
Numerical Study of the Second Ignition for Combustion Synthesizing Ni-Al Compounds. 1969-1978A
Nickel mattes
Communication: Nickel, copper, and cobalt slag losses during converting. 121-125B
Niobium, Alloying elements
Effect of prestrain and deformation temperature on the recrystallization behavior of steels microalloyed with niobium. 1237-1247A
Coarsening kinetics of multicomponent MC-type carbides in high-strength low-alloy steels. 1565-1573A
Thermodynamic Calculations for Nb-Containing High-Speed Steels and White Cast-Iron Alloys. 1749-1758A
Influence of Alloying Elements on the Kinetic of Massive Transformation in Gamma Titanium Aluminides. 2053-2066A
Mutual Effects of Hydrogenation and Deformation in Ti-Nb Alloys. 2199-2206A
Oxidation Behavior and Transmission Electron Microscope Characterization of Ti-44Al-xNb-2(Ta,Zr) Alloys. 2263-2271A
Niobium, Binary systems
Structural Properties and Stability of Metastable Phases in the Zr-Nb System: Part II. Aging of Bcc (β) Alloys and Assessment of β-Zr. 2771-2779A
Niobium, Mechanical properties
Effects of test temperature and grain size on the Charpy impact toughness and dynamic toughness (K_{ID}) of polycrystalline niobium. 967-976A
Niobium base alloys, Composite materials
A Review of Very-High-Temperature Nb-Silicide-Based Composites. 2043-2052A
Niobium base alloys, Mechanical properties
Mechanical properties of as-cast and directionally solidified Nb-Mo-W-Ti-Si in-situ composites at high temperatures. 85-94A
Toughness and Strength Characteristics of Nb-W-Si Ternary Alloys Prepared by Arc Melting. 2861-2871A
Niobium base alloys, Microstructure
Improving the Fracture Toughness of Constituent Phases and Nb-Based In Situ Composites by a Computational Alloy Design Approach. 1833-1849A
Niobium base alloys, Phases (state of matter)
Phase equilibria in prototype Nb-Pd-Hf-Al alloys 1771-1782A
Nodular iron, Phases (state of matter)
An analysis of retained austenite in austempered ductile iron. 211-217A
Nonmetallic inclusions
Crystal growth in liquid steel during secondary metallurgy. 161-171B
Deep filtration of molten aluminum using ceramic foam filters and ceramic particles with active coatings. 1183-1191A
Mechanical and Physical Properties of High Velocity Oxy-Fuel-Sprayed Iron Aluminide Coatings. 2223-2231A
A Novel Inclusion Inspection Method Employing 20 kHz Fatigue Testing. 2517-2526A
Crack Initiation and Propagation in 50.9 At. pct Ni-Ti Pseudoelastic Shape-Memory Wires in Bending-Rotation Fatigue. 2847-2860A
Notch toughness
Effects of tensile prestrain on the notch toughness of low-alloy steel. 1055-1068A
Nucleation
Nucleation of bubbles on a solidification front-experiment and analysis. 321-332B
Effect of a Catalyst on Heterogeneous Nucleation in Pure Fe and Fe-Ni Alloys. 539-547B
On the Precipitation-Hardening Behavior of the Al-Mg-Si-Cu Alloy AA6111. 751-763A
Studies on Transport Phenomena during Directional Solidification of a Noneutectic Binary Solution Cooled from the Top. 899-909B
On the application of the additivity rule in pearlitic transformation in low alloy steels. 1259-1264A
The nucleation of Fe-rich phases on oxide films in Al-11.5Si-0.4Mg cast alloys. 1409-1420A
Microstructural evolution and deformation of cryomilled nanocrystalline Al-Ti-Cu alloy. 1473-1481A
The relationship between chromium nitride and secondary austenite precipitation in duplex stainless steels. 1575-1597A
A solutal interaction mechanism for the columnar-to-equiaxed transition in alloy solidification. 1657-1674A
Precipitation Strengthening in K5-Series γ-TiAl Alloyed with Silicon and Carbon. 2129-2138A
Microstructure Evolution during Alpha-Beta Heat Treatment of Ti-6Al-4V. 2377-2386A
Analysis of Different Acicular Ferrite Microstructures in Low-Carbon Steels by Electron Backscattered Diffraction. Study of Their Toughness Behavior. 2505-2516A
The Spatial Distribution of Nucleation Sites and its Effect on Recrystallization Kinetics in Commercial Aluminum Alloys. 2705-2715A
Roles of Microalloying Elements on the Cluster Formation in the Initial Stage of Phase Decomposition of Al-Based Alloys. 2745-2755A
Nucleation-Controlled Microstructures and Anomalous Eutectic Formation in Undercooled Co-Sn and Ni-Si Eutectic Melts. 2999-3008A

Modeling of Marangoni-Induced Droplet Motion and Melt Convection during Solidification of Hypermonotectic Alloys. 3009-3019A

Nuclei
A solutal interaction mechanism for the columnar-to-equiaxed transition in alloy solidification. 1657-1674A

Numerical analysis
Numerical analysis of metal transfer in gas metal arc welding. 345-353B
Coarsening kinetics of multicomponent MC-type carbides in high-strength low-alloy steels. 1565-1573A

Occlusion
Occlusion and ion exchange in the molten (lithium chloride + potassium chloride + alkaline-earth chloride) salt + zeolite 4A system with alkaline-earth chlorides of calcium and strontium and in the molten (lithium chloride + potassium chloride + actinide chloride) salt + zeolite 4A system with the actinide chloride of uranium. 201-208B

Optimization
Modeling of Ingot Development during the Start-Up Phase of Direct Chill Casting. 727-734B

Order disorder
Modeling of the Atomic Ordering Processes in Fe_3Al Intermetallics by the Monte Carlo Simulation Method Combined with Electronic Theory of Alloys. 721-734A
Effect of Crucible Diameter Reduction on the Convection, Macrosegregation, and Dendritic Morphology during Directional Solidification of Pb-2.2 Wt Pct Sb Alloy. 2985-2990A

Ores, Reactions (chemical)
The Effect of Salt-Phase Composition on the Rate of Soda-Ash Roasting of Chromite Ores. 555-563B

Orientation
Aspects of Orientation-Dependent Grain Growth in Extra-Low Carbon and Interstitial-Free Steels during Continuous Annealing. 827-839A

Orientation relationships
Phase transformations in a Cu-14.2Al-7.8Ni alloy. 503-509A
Precipitation of aluminum in the silicon phase contained in w319 and 356 aluminum alloys. 523-529A
Coarsening kinetics of multicomponent MC-type carbides in high-strength low-alloy steels. 1565-1573A
Communication: Discussion of 'Lattice orientation relationship between the M_2C carbide and the ferrite matrix in the M50NiL bearing steel'. 1735A
Communication: Author's reply. 1735-1736A

Orthorhombic lattice
Phase transformations in a Cu-14.2Al-7.8Ni alloy. 503-509A

Oscillations
Experimental and Theoretical Studies of the Motion Generated by a Two- Frequency Magnetic Field at the Free Surface of a Gallium Pool. 669-678B

Oxidation rate
X-ray photoelectron spectroscopy and scanning auger microprobe studies on oxidation-induced embrittlement mechanism of liquid-phase-sintered 95W-Ni-Fe alloy. 355-359A

Oxidation resistance
A Review of Very-High-Temperature Nb-Silicide-Based Composites. 2043-2052A
Development and Elemental Powder Metallurgy of a Y-Containing Two-Phase TiAl Alloy. 2077-2087A
Fundamental Considerations for the Development of Oxidation-Resistant Alloys and Coatings Based on γ-TiAl. 2247-2251A
Effect of Ion Implantation on the Oxidation Resistance of TiAl. 2253-2261A
Oxidation Behavior and Transmission Electron Microscope Characterization of Ti-44Al-xNb-2(Ta,Zr) Alloys. 2263-2271A

Oxidation tests
Effect of Ion Implantation on the Oxidation Resistance of TiAl. 2253-2261A

Oxide coatings
The nucleation of Fe-rich phases on oxide films in Al-11.5Si-0.4Mg cast alloys. 1409-1420A

Oxide coatings, Mechanical properties
Mechanical measurements of passive film fracture on an austenitic stainless steel. 1291-1296A

Oxides
Viscosity of Blast Furnace Type Slags. 509-516B

Oxidizing atmospheres
Some Water Vapor Effects during the Oxidation of Alloys that are α-Al_2O_3 Formers. 2609-2619A

Pack rolling
Properties of TiAl sheet pack-rolled at temperatures below 1000°C. 1329-1339A

Palladium base alloys, Magnetic properties
Laminar-turbulent transition in an electromagnetically levitated droplet. 29-36B

Partial pressure
The Contact Angle between Liquid Iron and a Single Crystal, Alumina Substrate at 1873 K: Effects of Oxygen and Droplet Size. 503-508B
Investigation of the Reactions between Oxygen-Containing Iron and SiO_2 Substrate by X -Ray Sessile-Drop Technique. 647-652B

Partially stabilized zirconia, Composite materials
Fabrication and Creep Properties of Superalloy-Zirconia Composites. 2643-2653A

Particle size
Communication: Effect of porosity on the electrical properties of Fe-based specimens fabricated by powder metallurgy. 126-129B
Synthesis of ductile titanium-titanium boride (Ti-TiB) composites with a beta-titanium matrix: the nature of TiB formation and composite properties. 1371-1385A

Particle size distribution
Evaluation of the accuracy of the three-dimensional size distribution estimated from the Schwartz-Saltykov method. 171-181A
Theoretical Design of Sedimentation Applied to the Fabrication of Functionally Graded Materials. 605-609B
The Spatial Distribution of Nucleation Sites and its Effect on Recrystallization Kinetics in Commercial Aluminum Alloys. 2705-2715A
Precipitation Strengthening of the Aluminum Alloy AA6111. 2913-2924A

Particulate composites, Bonding
Diffusion bonding of Si_3N_4-TiN composite with nickel-based interlayers. 1627-1636A

Particulate composites, Mechanical properties
Mechanical properties of 2014Al/SiC composites with oxidized SiC particles. 1361-1369A
Numerical modeling of the damping capacity of Al/SiC(p). 1387-1391A
Microstructure and Sliding Wear Behavior of Tungsten Reinforced W-Ni-Si Metal-Silicide In-Situ Composites. 2005-2015A
Fatigue Crack Growth in a Particulate TiB_2-Reinforced Powder Metallurgy Iron-Based Composite. 2017-2024A
Fabrication and Creep Properties of Superalloy-Zirconia Composites. 2643-2653A
Investigation of a Directionally Solidified NiAl/Cr(Mo) Composite Alloyed with Hf. 2663-2670A

Particulate composites, Melting
Emerging technologies in extraction and processing of metals. 137-152B

Particulate composites, Oxidation
A Review of Very-High-Temperature Nb-Silicide-Based Composites. 2043-2052A

Particulate composites, Powder technology
Reactive synthesis of in-situ $ZrAl_3$-Al_2O_3-Al composites. 1357-1360A

Particulate composites, Reactions (chemical)
Kinetics of In-Situ Formation of AlN in Al Alloy Melts by Bubbling Ammonia Gas. 793-804B

Particulate composites, Reduction (chemical)
Estimation and modeling of parameters for direct reduction in iron ore/coal composites: Part I. Physical parameters. 93-102B
Estimation and modeling of parameters for direct reduction in iron ore/coal composites: part II. Kinetic parameters. 255-266B

Passivation
Mechanical measurements of passive film fracture on an austenitic stainless steel. 1291-1296A

Passivity
Effect of sulfides on gold dissolution in ammoniacal thiosulfate medium. 5-13B

Pearlitic transformations
On the application of the additivity rule in pearlitic transformation in low alloy steels. 1259-1264A

Peritectic reactions
The Dy-Zn Phase Diagram. 743-750A
Peritectic Reaction and Solidification in Iron-Nickel Alloys. 1931-1940A

Permeability
Permeability measurements of the flow of interdendritic liquid in equiaxed aluminum-silicon alloys. 25-28B
Evaluation of a Rayleigh-number-based freckle criterion for Pb-Sn alloys and Ni-base superalloys. 1525-1536A
A Mushy-Zone Rayleigh Number to Describe Interdendritic Convection during Directional Solidification of Hypoeutectic Pb-Sb and Pb-Sn Alloys. 2365-2376A

Petroleum pipelines, Mechanical properties
Role of microstructure on sulfide stress cracking of oil and gas pipeline steels. 1089-1096A

Phase boundary
Precipitation of Heusler phase (Ni_2TiAl) from B2-TiNi in Ni-Ti-Al and Ni-Ti-Al-x (x = Hf, Zr) Alloys. 1221-1234A
Influence of Alloying Elements on the Kinetic of Massive Transformation in Gamma Titanium Aluminides. 2053-2066A

Phase decomposition
Solidification, Segregation, and Banding in Carbon and Alloy Steels. 781-792B
Roles of Microalloying Elements on the Cluster Formation in the Initial Stage of Phase Decomposition of Al-Based Alloys. 2745-2755A
Modeling of Marangoni-Induced Droplet Motion and Melt Convection during Solidification of Hypermonotectic Alloys. 3009-3019A

Phase diagrams
An atomistic study of solid/liquid interfaces and phase equilibrium in binary systems. 435-439A
Phase Equilibria and Thermodynamic Properties of the Cu_2O-CaO- Na_2O System in Equilibrium with Copper. 631-638B
The Dy-Zn Phase Diagram. 743-750A
Communication: Discussion of "The Solubility of Sodium in Liquid Aluminum". 744-746B
Communication: Authors' Reply. 746-748B
Iron Intermetallic Phases in the Al Corner of the Al-Si-Fe System. 807-825A
The Thermodynamics of Tetrataenite and Awaruite: A Review of the Fe-Ni Phase Diagram. 1759-1769A
Phase equilibria in prototype Nb-Pd-Hf-Al alloys 1771-1782A
Thermodynamic Investigation of the A2/B2 Region of the Fe-Al System by Knudsen Effusion Mass Spectrometry. 2409-2419A
Communication: Effects of Cooling Rate on Aging at 475 °C of an Oxide-Dispersion-Strengthened Ferritic Steel. 2681-2683A
Structural Properties and Stability of Metastable Phases in the Zr-Nb System: Part II. Aging of Bcc (β) Alloys and Assessment of β-Zr. 2771-2779A

Phase rule
Communication: Discussion of "Synthesis of Ultrafine Particles of Intermetallic Compounds by the Vapor-Phase Magnesium Reduction of Chloride Mixtures: Part I. Titanium Aluminides". 738-740B
Communication: Authors' Reply. 741B
Phase stability
The Dy-Zn Phase Diagram. 743-750A
The microstructure of an Fe-Mn-Si-Cr-Ni stainless steel shape memory alloy. 1029-1042A
Mutual Effects of Hydrogenation and Deformation in Ti-Nb Alloys. 2199-2206A
Phase transformations
Communication: Phase Transition in Galvanneal Coatings. 879-881A
Phosphorus, Alloying elements
Communication: Activities of Phosphorus in Copper-Nickel Liquid Alloys Saturated with Solid Copper-Nickel Solid Solutions at 1573 K. 741-744B
Physical simulation
Mixing and Solid-Liquid Mass Transfer Rates in a Creusot Loire Uddeholm Vessel: A Water Model Case Study. 833-842B
A model for the electrical conductivity of peak-aged and over-aged Al-Zn-Mg-Cu alloys. 899-911A
Effect of microstructure on hydrogen embrittlement of weld-simulated HSLA-80 and HSLA-100 steels. 1297-1309A
Pig iron, Reactions (chemical)
Desiliconization and Decarburization Behavior of Molten Fe-C-Si(-S) Alloy with CO_2 and O_2. 861-867B
Pipelines, Corrosion
Effect of Precyclic Loading on Stress-Corrosion-Cracking Initiation in An X-65 Pipeline Steel Exposed to Near-Neutral pH Soil Environment. 2601-2608A
Pitting (corrosion)
Effects of TiC composite coating on electrode degradation in microresistance welding of nickel-plated steel. 1501-1511A
Effect of n addition on tensile and corrosion behaviors of CD4MCU cast duplex stainless steels. 1617-1625A
Plasma spraying
Communication: Residual stress distribution in electron beam-physical vapor deposited ZrO_2 thermal barrier coating layer by Raman spectroscopy. 1739-1741A
Processing and Characterization of Plasma-Sprayed Ceramic Coatings on Steel Substrate: Part I. On Coating Characteristics. 1909-1918A
Processing and Characterization of Plasma-Sprayed Ceramic Coatings on Steel Substrate: Part II. On Coating Performance. 1919-1930A
Plastic anisotropy
Communication: Recrystallization Textures of Continuous Cast AA 3015 Alloy: Development of the P Orientation {111}<566>. 2029-2032A
Plastic deformation
Mechanical properties of iron processed by severe plastic deformation. 71-83A
Constrained phase-transformation of a TiNi shape-memory alloy. 219-223A
Orientation dependence of dislocation structures in cyclically deformed Cu-16 At. Pct Al alloy single crystals. 307-318A
Hydride embrittlement and irradiation effects on the hoop mechanical properties of pressurized water reactor (PWR) and boiling-water reactor (BWR) ZIRCALOY cladding tubes: Part II. Morphology of hydrides investigated at different magnifications and their interaction with the processes of plastic deformation. 567-578A
Hydride embrittlement and irradiation effects on the hoop mechanical properties of pressurized water reactor (PWR) and boiling-water reactor (BWR) ZIRCALOY cladding tubes: Part III. Mechanical behavior of hydride in stress-relieved annealed and recrystallized ZIRCALOYs at 20°C and 300°C. 579-588A
Effects of tensile prestrain on the notch toughness of low-alloy steel. 1055-1068A
High-temperature deformation behavior of coarse- and fine-grained $MoSi_2$ with different silica contents. 1069-1088A
Effect of material damage on forming limits of voided anisotropic sheet metals. 1283-1290A
Microstructural evolution and deformation of cryomilled nanocrystalline Al-Ti-Cu alloy. 1473-1481A
Effects of TiC composite coating on electrode degradation in microresistance welding of nickel-plated steel. 1501-1511A
Communication: Effects of grain size and pressing speed on the deformation mode of commercially pure Ti during equal channel angular pressing. 1555-1558A
Work-Hardening and Recovery Mechanisms in Gamma-Based Titanium Aluminides. 2103-2111A
Grain-Size Effects on Tensile Behavior of Nickel and AISI 316L Stainless Steel. 2329-2340A
The Effect of Severe Marforming on Shape Memory Characteristics of a Ti-Rich NiTi Alloy Processed Using Equal Channel Angular Extrusion. 2527-2539A
Effect of Surface Oxide Films on the Properties of Pulse Electric-Current Sintered Metal Powders. 2655-2661A
The Effect of Cold Work on the Precipitation of Ω and θ' in a Ternary Al-Cu-Mg Alloy. 2757-2769A
Plastic flow
Effects of indium on the mechanical properties of ternary Sn-In-Ag solders. 361-365A
Rapid compression of aluminum alloys and its relationship to thixoformability. 1545-1554A
Plasticity
Effect of hydrogen charging on dislocation behavior in Ni-Cr and Ni_2Cr alloys. 1249-1257A
Effect of deformation schedule on the microstructure and mechanical properties of a thermomechanically processed C-Mn-Si transformation-induced plasticity steel. 1599-1609A
Elasto-Plastic Load Transfer in Bulk Metallic Glass Composites Containing Ductile Particles. 1787-1797A
Microstructure and Texture of Hot-Rolled Cb-Ti and V-Cb Microalloyed Steels with Differences in Formability and Toughness. 2341-2351A
Platinum base alloys, Phases (state of matter)
Microstructural Characterization of a Platinum-Modified Diffusion Aluminide Bond Coat for Thermal Barrier Coatings. 2289-2299A
Platinum compounds, Phase transformations
Observations and analysis of the influence of phase transformations on the instability of the thermally grown oxide in a thermal barrier system. 511-522A
Platinum compounds, Phases (state of matter)
Microstructural Characterization of a Platinum-Modified Diffusion Aluminide Bond Coat for Thermal Barrier Coatings. 2289-2299A
Pole figures
Effect of initial texture on texture evolution in 1050 Al alloys under simple shear. 1675-1681A
Polycrystals, Mechanical properties
Effects of test temperature and grain size on the Charpy impact toughness and dynamic toughness (K_{ID}) of polycrystalline niobium. 967-976A
Polygonization
Delta-Ferrite Recovery Structures in Low-Carbon Steels. 495-501B
Polymerization
A Polymeric Approach to the Sulfide Capacity of Silicate Slags and Melts. 399-410B
Porosity
Estimation and modeling of parameters for direct reduction in iron ore/coal composites: Part I. Physical parameters. 93-102B
Communication: Effect of porosity on the electrical properties of Fe-based specimens fabricated by powder metallurgy. 126-129B
The critical amount of nitrogen on the formation of nitrogen gas pores during solidification of 25Cr-7Ni duplex stainless steels. 313-320B
Diffusion bonding of Si_3N_4-TiN composite with nickel-based interlayers. 1627-1636A
Scatter in Fatigue Life Due to Effects of Porosity in Cast A356-T6 Aluminum-Silicon Alloys. 1879-1890A
In-Situ Reactive Processing of Nickel Aluminides by Laser-Engineered Net Shaping. 2633-2641A
Powder compacts, Physical properties
Thermophysical Properties of Roll-Compacted Nickel Sheet for High-Density Infrared Sheet Fabrication. 3043-3054A
Powder metallurgy
Communication: Effect of porosity on the electrical properties of Fe-based specimens fabricated by powder metallurgy. 126-129B
On the analysis of grain size in bulk nanocrystalline materials via x-ray diffraction. 1349-1355A
Prandtl number
Marangoni convection driven by thermocapillary and solutocapillary forces in the Fe-O alloy pool during the solidification or remelting process. 37-49B
Precipitates
Measurement of the lattice misfit of the nickel-base superalloy SC16 by high-energy synchrotron radiation. 193-197A
On the Influence of Si-Ge Additions on the Aging Response. 735-742A
On the Precipitation-Hardening Behavior of the Al-Mg-Si-Cu Alloy AA6111. 751-763A
Precipitation Strengthening in K5-Series γ-TiAl Alloyed with Silicon and Carbon. 2129-2138A
Precipitation
Morphology and kinetics of discontinuous precipitation and dissolution in an Fe-8.5Al-27Mn-1.0Si-0.92C alloy. 25-31A
Precipitation and recrystallization behavior of beta titanium alloys during continuous heat treatment. 147-158A
Precipitation of aluminum in the silicon phase contained in w319 and 356 aluminum alloys. 523-529A
Resistance to shape refinement of precipitates in Al-(Si,Ge) alloys during thermal cycling. 543-551A
Solution-Chemistry Analysis of Ammonium Bicarbonate Consumption in Rare Earth-Element Precipitation. 611-617B
On the Precipitation-Hardening Behavior of the Al-Mg-Si-Cu Alloy AA6111. 751-763A
Influence of intense plastic straining on grain refinement, precipitation, and mechanical properties of Al-Cu-Li-based alloys. 1153-1161A
Precipitation of Heusler phase (Ni_2TiAl) from B2-TiNi in Ni-Ti-Al and Ni-Ti-Al-x (x = Hf, Zr) Alloys. 1221-1234A
Effect of prestrain and deformation temperature on the recrystallization behavior of steels microalloyed with niobium. 1237-1247A
Effect of service-simulated aging on the microstructure and properties of casing casting steel (1CrMoV) vis-a-vis remnant life assessment. 1265-1274A
The nucleation of Fe-rich phases on oxide films in Al-11.5Si-0.4Mg cast alloys. 1409-1420A
Microstructure evolution in three-dimensional inhomogeneous elastic media. 1421-1431A
Coherent γ'-precipitates at singular and rough grain boundaries in a model Ni-base superalloy. 1433-1437A
Microstructure and fatigue characteristics of direct chill cast

and electromagnetic cast 2024 Al alloy ingots. 1537-1543A
Coarsening kinetics of multicomponent MC-type carbides in high-strength low-alloy steels. 1565-1573A
The role of the slope out region on fatigue crack initiation in electron beam welded waspaloy. 1637-1645A
The Role of Nitrogen on the Deformation Response of Hadfield Steel Single Crystals. 1821-1831A
Stabilization of Thermosolutal Convective Instabilities in Ni-Based Single-Crystal Superalloys: Carbide Precipitation and Rayleigh Numbers. 1953-1967A
Influence of Oxygen on Phase Transformations in a Ti-48 At. Pct Al Alloy. 2067-2075A
Theory of Interface Properties for Carbide Precipitates in TiAl. 2097-2101A
Creep Behavior of TiAl Alloys with Enhanced High-Temperature Capability. 2149-2164A
Primary Creep Behavior of Ti-48Al-2W as a Function of Stress and Lamellar Morphology. 2177-2190A
Mutual Effects of Hydrogenation and Deformation in Ti-Nb Alloys. 2199-2206A
Effect of Carbon Addition on the Strength and-Creep Resistance of FeAl Alloys. 2233-2246A
Microstructural Characterization of a Platinum-Modified Diffusion Aluminide Bond Coat for Thermal Barrier Coatings. 2289-2299A
Electron Microscopy Study on the Grain-Boundary Precipitation during Aging of Fe-10Ni-5Mn Steel. 2421-2428A
The Influence of Precipitation on the Work-Hardening Behavior of the Aluminum Alloys AA6111 and AA7030. 2473-2481A
Characterization of Microstructure in Laser-Surface-Alloyed Layers of Aluminum on Nickel. 2621-2631A
Roles of Microalloying Elements on the Cluster Formation in the Initial Stage of Phase Decomposition of Al-Based Alloys. 2745-2755A
The Effect of Cold Work on the Precipitation of Ω and θ' in a Ternary Al-Cu-Mg Alloy. 2757-2769A
Investigation of Microstructural Changes in INCONEL 706 at High Temperatures by In-Situ Small-Angle Neutron Scattering. 2781-2792A
Crack Initiation and Propagation in 50.9 At. pct Ni-Ti Pseudoelastic Shape-Memory Wires in Bending-Rotation Fatigue. 2847-2860A
Precipitation Strengthening of the Aluminum Alloy AA6111. 2913-2924A

Precipitation hardening
Communication: Discussion of 'precipitation behavior and its effect on strengthening of an HSLA-Nb/Ti steel. 1013-1017A
Communication: Authors' reply. 1017-1019A
Precipitation Strengthening in K5-Series γ-TiAl Alloyed with Silicon and Carbon. 2129-2138A
Precipitation Strengthening of the Aluminum Alloy AA6111. 2913-2924A

Precipitation hardening steels, Mechanical properties
Synergetic Effect of Hardness and Phosphorus Grain-Boundary Segregation on the Ductile-to-Brittle Transition Temperature of 17-4 PH Steel. 2483-2491A
Effect of Prior Oxidation on the Creep Behavior of NiAl-Hardened Austenitic Steel. 2579-2590A

Precipitation hardening steels, Microstructure
Electron Microscopy Study on the Grain-Boundary Precipitation during Aging of Fe-10Ni-5Mn Steel. 2421-2428A

Preferential attack (corrosion)
Corrosion of Co-Cr-W Alloy in Liquid Zinc. 881-886B

Preferred orientation
Cathodic Deposition of Copper in the Presence of Aqueous Sulfurous Acid, Bivalent Aquacobalt Ion, or Both using a Stainless Steel Cathode and a Graphite Anode. 813-819B

Pressing
Work-softening behavior of the ultrafine-grained Al alloy processed by high-strain-rate, dissimilar-channel angular pressing. 625-632A

Pressurized water reactors, Mechanical properties
Hydride embrittlement and irradiation effects on the hoop mechanical properties of pressurized water reactor (PWR) and boiling-water reactor (BWR) ZIRCALOY cladding tubes: Part I. Hydride embrittlement in stress-relieved, annealed, and recrystallized ZIRCALOYs at 20°C and 300°C. 553-566A
Hydride embrittlement and irradiation effects on the hoop mechanical properties of pressurized water reactor (PWR) and boiling-water reactor (BWR) ZIRCALOY cladding tubes: Part II. Morphology of hydrides investigated at different magnifications and their interaction with the processes of plastic deformation. 567-578A
Hydride embrittlement and irradiation effects on the hoop mechanical properties of pressurized water reactor (PWR) and boiling-water reactor (BWR) ZIRCALOY cladding tubes: Part III. Mechanical behavior of hydride in stress-relieved annealed and recrystallized ZIRCALOYs at 20°C and 300°C. 579-588A

Prestraining
Effects of tensile prestrain on the notch toughness of low-alloy steel. 1055-1068A
Effect of prestrain and deformation temperature on the recrystallization behavior of steels microalloyed with niobium. 1237-1247A

Process control
Effects of process-control agents on mechanical alloying of nanostructured aluminum alloys. 159-170A

Process parameters
Asymptotic approximation and numerical simulation of electromagnetic casting. 83-91B
Emerging technologies in extraction and processing of metals. 137-152B
Droplet solidification and gas-droplet thermal coupling in the atomization of a Cu-6Sn alloy. 243-253B
A transient simulation and dynamic spray cooling control model for continuous steel casting. 297-306B
The critical amount of nitrogen on the formation of nitrogen gas pores during solidification of 25Cr-7Ni duplex stainless steels. 313-320B
Composition Control in the Direct Laser-Deposition Process. 439-445B
Behavior of oxide film at the interface between particles in sintered Al powders by pulse electric-current sintering. 699-703A
Spark Plasma Sintering of Al-Si-Cu-Fe Quasi-Crystalline Powder. 841-849A
Investigation of the Performance of an Expandable Polystyrene Injector for Use in the Lost-Foam Casting Process. 843-851B
Communication: Effects of grain size and pressing speed on the deformation mode of commercially pure Ti during equal channel angular pressing. 1555-1558A
Solidification of Chill-Cast Al-Zn-Mg Alloys to be Used as Sacrificial Anodes. 2991-2997A

Processing industry
Thermal Analysis of Twin-Channel Induction Furnaces. 679-684B

Proof stress
A Taylor Model Based Description of the Proof Stress of Magnesium AZ31 during Hot Working. 1799-1806A
Fabrication of Ultrahigh Nitrogen Austenitic Steels by Nitrogen Gas Absorption into Solid Solution. 2591-2599A

Pyrite, Beneficiation
Kinetics of the sulfidation of chalcopyrite with gaseous sulfur. 61-68B

Pyrite, Extraction
Effect of Aging Conditions on the Leaching of Mechanically Activated Pyrite and Sphalerite. 639-645B

Pyrolysis
Estimation and modeling of parameters for direct reduction in iron ore/coal composites: part II. Kinetic parameters. 255-266B

Pyrometallurgy
Communication: The use of secondary ion mass spectrometry for investigating oxygen in pyrometallurgical reactions. 355-358B

Quantitative metallography
Improving the Fracture Toughness of Constituent Phases and Nb-Based In Situ Composites by a Computational Alloy Design Approach. 1833-1849A

Quasicrystalline structure
Spark Plasma Sintering of Al-Si-Cu-Fe Quasi-Crystalline Powder. 841-849A

Quenching (cooling)
Deformation, residual stress, and constitutive relations for quenched W319 aluminum. 1483-1491A
Study of Microstructure and Solute Partitioning in a Cast Ti-48Al-2Cr-2Nb Alloy by Quenching during Directional Solidification Technique. 2139-2148A
The Effect of Cold Work on the Precipitation of Ω and θ' in a Ternary Al-Cu-Mg Alloy. 2757-2769A

Quenching and tempering
Effect of quenching, tempering, and cold rolling on creep deformation behavior of a tempered martensitic 9Cr-1W steel. 913-925A

Raman spectroscopy
Communication: Residual stress distribution in electron beam-physical vapor deposited ZrO_2 thermal barrier coating layer by Raman spectroscopy. 1739-1741A

Rapid prototyping
In-Situ Reactive Processing of Nickel Aluminides by Laser-Engineered Net Shaping. 2633-2641A

Rapid solidification
Communication: On the Atomistic Theory of Solidification. 2683-2688A

Rare earth metals, Recovering
Solution-Chemistry Analysis of Ammonium Bicarbonate Consumption in Rare Earth-Element Precipitation. 611-617B

Raw materials
Theoretical Design of Sedimentation Applied to the Fabrication of Functionally Graded Materials. 605-609B

Reaction kinetics
Morphology and kinetics of discontinuous precipitation and dissolution in an Fe-8.5Al-27Mn-1.0Si-0.92C alloy. 25-31A
Kinetics of the sulfidation of chalcopyrite with gaseous sulfur. 61-68B
Leaching of sulfidized chalcopyrite with H_2SO_4-NaCl-O_2. 153-159B
Kinetics of reduction of ferric iron in Fe_2O_3-CaO-SiO_2-Al_2O_3 Slags under Argon, CO-CO_2, or H_2-H_2O. 225-234B
Computational fluid-dynamics simulation of postcombustion in the electric-arc furnace. 333-343B
Communication: The use of secondary ion mass spectrometry for investigating oxygen in pyrometallurgical reactions. 355-358B
Reduction Kinetics of Fe_2MoO_4 Fine Powder by Hydrogen in a Fluidized Bed. 661-667B
Communication: A Surface Reaction Kinetic Model to Compare the Reductive Leaching of Iron from Goethite, Magnetite, and Limonitic Nickel Laterite Ores by Acidic Sulfur Dioxide. 735-738B
Communication: Discussion of 'precipitation behavior and its effect on strengthening of an HSLA-Nb/Ti steel. 1013-1017A
Communication: Authors' reply. 1017-1019A
Communication: Comments on the Analysis of Experimental Data in Nonisothermal Kinetics. 2679-2681A

Reaction mechanisms
Kinetics of reduction of ferric iron in Fe_2O_3-CaO-SiO_2-Al_2O_3 Slags under Argon, CO-CO_2, or H_2-H_2O. 225-234B
Kinetics and Mechanism of Carbothermic Reduction of Magnesia. 433-437B
The Effect of Salt-Phase Composition on the Rate of Soda-Ash Roasting of Chromite Ores. 555-563B
Reactive synthesis of in-situ $ZrAl_3$-Al_2O_3-Al composites. 1357-1360A
Synthesis mechanism of an Al-Ti-C grain refiner master alloy prepared by a new method. 1727-1733A
Effect of Ion Implantation on the Oxidation Resistance of TiAl. 2253-2261A

Communication: Comments on the Analysis of Experimental Data in Nonisothermal Kinetics. 2679-2681A

Reactive processing
Reactive synthesis of in-situ $ZrAl_3$-Al_2O_3-Al composites. 1357-1360A
Synthesis of ductile titanium-titanium boride (Ti-TiB) composites with a beta-titanium matrix: the nature of TiB formation and composite properties. 1371-1385A
In-Situ Reactive Processing of Nickel Aluminides by Laser-Engineered Net Shaping. 2633-2641A

Reactors
Mathematical model of COREX melter gasifier: Part I. Steady-state model. 103-114B

Recovery
Constrained phase-transformation of a TiNi shape-memory alloy. 219-223A
Delta-Ferrite Recovery Structures in Low-Carbon Steels. 495-501B
Effect of quenching, tempering, and cold rolling on creep deformation behavior of a tempered martensitic 9Cr-1W steel. 913-925A
Work-Hardening and Recovery Mechanisms in Gamma-Based Titanium Aluminides. 2103-2111A

Recrystallization
Annealing behavior of submicrocrystalline oxide-bearing iron produced by mechanical alloying. 131-138A
Precipitation and recrystallization behavior of beta titanium alloys during continuous heat treatment. 147-158A
Observation of cold-rolling texture and partially recrystallized texture in polycrystalline 3 pct Si-Fe by high-resolution electron backscattered diffraction. 403-408A
The evolution of annealing textures in 90 pct drawn copper wire. 531-541A
Aspects of Orientation-Dependent Grain Growth in Extra-Low Carbon and Interstitial-Free Steels during Continuous Annealing. 827-839A
Recrystallization and grain growth of cold-drawn gold bonding wire. 1113-1125A
Effect of rolling temperature on the deformation and recrystallization textures of warm-rolled steels. 1163-1174A
Effect of prestrain and deformation temperature on the recrystallization behavior of steels microalloyed with niobium. 1237-1247A
Grain growth in a low-loss cold-rolled motor-lamination steel. 1321-1327A
Recrystallization of a cold-rolled low-carbon steel by cold-plasma-discharge rapid annealing. 1341-1348A
Communication: Recrystallization Textures of Continuous Cast AA 3015 Alloy: Development of the P Orientation {111}<566>. 2029-2032A
Creep Behavior of TiAl Alloys with Enhanced High-Temperature Capability. 2149-2164A
Grain-Boundary Character Distribution in Recrystallized $L1_2$ Ordered Intermetallic Alloys. 2429-2439A
The Spatial Distribution of Nucleation Sites and its Effect on Recrystallization Kinetics in Commercial Aluminum Alloys. 2705-2715A
Recrystallization of an AlMgSi Alloy after Different Modes of Hot Deformation. 2717-2726A

Refractivity
Temperature Dependence of the Refractive Index of Al_2O_3-Na_2O- SiO_2 Melts: Role of Electronic Polarizability of Oxygon Controlled by Network Structure. 549-554B

Refractories, Physical properties
Thermal Analysis of Twin-Channel Induction Furnaces. 679-684B

Refractories, Recycling
Dusts, Scale, Slags, Sludges...Not Wastes, But Sources of Profits. 769-779B

Relaxation
Relaxation mechanisms in Fe-Al-C alloys. 255-266A
The Role of Nitrogen on the Deformation Response of Hadfield Steel Single Crystals. 1821-1831A

Residual stress
Communication: Influence of Coating an Thermal Response of Composites Reinforced with Anisotropic Fibers. 883-887A
Finite-element analysis of effects of the laser-processed bimaterial component size on stresses and distortion. 1133-1145A
A neutron diffraction and modeling study of uniaxial deformation in polycrystalline beryllium. 1439-1449A
Deformation, residual stress, and constitutive relations for quenched W319 aluminum. 1483-1491A
Diffusion bonding of Si_3N_4-TiN composite with nickel-based interlayers. 1627-1636A
Communication: Residual stress distribution in electron beam-physical vapor deposited ZrO_2 thermal barrier coating layer by Raman spectroscopy. 1739-1741A
Processing and Characterization of Plasma-Sprayed Ceramic Coatings on Steel Substrate: Part II. On Coating Performance. 1919-1930A
Titanium-Titanium Boride (Ti-TiB) Functionally Graded Materials through Reaction Sintering: Synthesis, Microstructure, and Properties. 1993-2003A
Mechanical and Physical Properties of High Velocity Oxy-Fuel-Sprayed Iron Aluminide Coatings. 2223-2231A
Grain-Size Effects on Tensile Behavior of Nickel and AISI 316L Stainless Steel. 2329-2340A
The Effect of Severe Marforming on Shape Memory Characteristics of a Ti-Rich NiTi Alloy Processed Using Equal Channel Angular Extrusion. 2527-2539A
Effect of Precyclic Loading on Stress-Corrosion-Cracking Initiation in An X-65 Pipeline Steel Exposed to Near-Neutral pH Soil Environment. 2601-2608A
Residual Stresses in an Electron Beam Weld of Ti-834: Characterization and Numerical Modeling. 2935-2946A

Resistance welding
Effects of TiC composite coating on electrode degradation in microresistance welding of nickel-plated steel. 1501-1511A

Resistivity
Communication: Effect of porosity on the electrical properties of Fe-based specimens fabricated by powder metallurgy. 126-129B
A model for the electrical conductivity of peak-aged and over-aged Al-Zn-Mg-Cu alloys. 899-911A

Retained austenite
An analysis of retained austenite in austempered ductile iron. 211-217A
Effect of deformation schedule on the microstructure and mechanical properties of a thermomechanically processed C-Mn-Si transformation-induced plasticity steel. 1599-1609A

Retarding
Evaluation of a Rayleigh-number-based freckle criterion for Pb-Sn alloys and Ni-base superalloys. 1525-1536A

Reynolds number
Laminar-turbulent transition in an electromagnetically levitated droplet. 29-36B

Roasting
The Effect of Salt-Phase Composition on the Rate of Soda-Ash Roasting of Chromite Ores. 555-563B

Rolling direction
Effect of temper rolling on texture formation in a low loss cold-rolled magnetic lamination steel. 1311-1319A
Properties of TiAl sheet pack-rolled at temperatures below 1000°C. 1329-1339A

Rolling texture
Effect of temper rolling on texture formation in a low loss cold-rolled magnetic lamination steel. 1311-1319A
Grain growth in a low-loss cold-rolled motor-lamination steel. 1321-1327A

Roughness
Evolution of strain-induced microstructure and texture in commercial aluminum sheet under balanced biaxial stretching. 657-671A
Effect of temper rolling on texture formation in a low loss cold-rolled magnetic lamination steel. 1311-1319A
Processing and Characterization of Plasma-Sprayed Ceramic Coatings on Steel Substrate: Part II. On Coating Performance. 1919-1930A

Rupture tests
Effect of service-simulated aging on the microstructure and properties of casing casting steel (1CrMoV) vis-a-vis remnant life assessment. 1265-1274A

Rupturing
Effect of quenching, tempering, and cold rolling on creep deformation behavior of a tempered martensitic 9Cr-1W steel. 913-925A
A Review of Very-High-Temperature Nb-Silicide-Based Composites. 2043-2052A

Sacrificial anodes, Materials selection
Solidification of Chill-Cast Al-Zn-Mg Alloys to be Used as Sacrificial Anodes. 2991-2997A

Sapphire, Brazing
Reaction Layers and Mechanisms for a Ti-Activated Braze on Sapphire. 2963-2972A

Scale (corrosion)
Some Water Vapor Effects during the Oxidation of Alloys that are α-Al_2O_3 Formers. 2609-2619A

Schmidt number
Marangoni convection driven by thermocapillary and solutocapillary forces in the Fe-O alloy pool during the solidification or remelting process. 37-49B

Sea nodules
Communication: A Surface Reaction Kinetic Model to Compare the Reductive Leaching of Iron from Goethite, Magnetite, and Limonitic Nickel Laterite Ores by Acidic Sulfur Dioxide. 735-738B

Sea water, Environment
Effect of microstructure on hydrogen embrittlement of weld-simulated HSLA-80 and HSLA-100 steels. 1297-1309A

Sedimentation
Theoretical Design of Sedimentation Applied to the Fabrication of Functionally Graded Materials. 605-609B

Segregations
Simulation of Macroscopic Solidification with an Incorporated One-Dimensional Microsegregation Model Coupled to Thermodynamic Software. 411-419B
A study of microsegregation in Al-Cu using a novel single-pan scanning calorimeter. 441-447A
Marangoni Flow at the Gas/Melt Interface of Steel. 483-493B
Antimony-Induced Embrittlement of [011] Symmetric Tilt Boundaries in Copper Bicrystals. 773-779A
Solidification, Segregation, and Banding in Carbon and Alloy Steels. 781-792B
The effect of grain refining on macrosegregation and dendrite arm spacing of direct chill cast AA5182. 1513-1523A
The role of the slope out region on fatigue crack initiation in electron beam welded waspaloy. 1637-1645A
Investigation of Dendrite-Boundary Microchemistry in Alloy 182 using Auger Electron Spectroscopy Analysis. 1891-1899A
Stabilization of Thermosolutal Convective Instabilities in Ni-Based Single-Crystal Superalloys: Carbide Precipitation and Rayleigh Numbers. 1953-1967A
Study of Microstructure and Solute Partitioning in a Cast Ti-48Al-2Cr-2Nb Alloy by Quenching during Directional Solidification Technique. 2139-2148A
In-Situ Reactive Processing of Nickel Aluminides by Laser-Engineered Net Shaping. 2633-2641A

Effect of Crucible Diameter Reduction on the Convection, Macrosegregation, and Dendritic Morphology during Directional Solidification of Pb-2.2 Wt Pct Sb Alloy. 2985-2990A

Sensitizing
The Effects of Cold Working on Sensitization and Intergranular Corrosion Behavior of AISI 304 Stainless Steel. 2441-2447A

Sensors, Development
The Use of Solid Electrolytes in the Determination of Activities and the Development of Sensors. 589-594B

Separation
Observation of Calcium Aluminate Inclusions at Interfaces between Ca-Treated, Al-Killed Steels and Slags. 533-538B
Application of electromagnetic separation of phases in alloy melt to produce in-situ surface and functionally gradient composites. 1719-1725A

Serrated yielding
Influence of composition, Sr modification, and annealing treatment on the structure and properties of cast Al-4 pct Mg alloys. 115-129A

Shape memory
Effects of Ternary Additions on the Thermoelastic Martensitic Transformation of NiAl. 2089-2095A
The Effect of Severe Marforming on Shape Memory Characteristics of a Ti-Rich NiTi Alloy Processed Using Equal Channel Angular Extrusion. 2527-2539A

Shape memory alloys
Precipitation of Heusler phase (Ni_2TiAl) from B2-TiNi in Ni-Ti-Al and Ni-Ti-Al-x (x = Hf, Zr) Alloys. 1221-1234A

Shape memory alloys, Phase transformations
Constrained phase-transformation of a TiNi shape-memory alloy. 219-223A
The Effect of Severe Marforming on Shape Memory Characteristics of a Ti-Rich NiTi Alloy Processed Using Equal Channel Angular Extrusion. 2527-2539A

Shape memory alloys, Phases (state of matter)
The microstructure of an Fe-Mn-Si-Cr-Ni stainless steel shape memory alloy. 1029-1042A

Shear deformation
Basal plane texture and flow pattern in friction stir weld of a magnesium alloy. 987-994A
A Taylor Model Based Description of the Proof Stress of Magnesium AZ31 during Hot Working. 1799-1806A
Recrystallization of an AlMgSi Alloy after Different Modes of Hot Deformation. 2717-2726A

Shear modulus
Strengthening by high densities of nanometer-size precipitates: oxides in Ni. 935-949A

Shear strength
Relationship between tensile and shear strengths of the mushy zone in solidifying aluminum alloys. 105-113A

Shear stress
Response of semi-solid Sn-15 pct Pb to rapid shear-rate changes. 409-417A
Modeling Transient Slag-Layer Phenomena in the Shell/mold Gap in Continuous Casting of Steel. 707-725B
The Role of Nitrogen on the Deformation Response of Hadfield Steel Single Crystals. 1821-1831A
Effects of Microstructural Factors on Quasi-Static and Dynamic Deformation Behaviors of Ti-6Al-4V Alloys with Widmanstatten Structures. 2541-2548A

Shear tests
A Planar Simple Shear Test and Flow Behavior in a Superplastic Al-Mg Alloy. 2465-2471A

Sheet metal
Effect of material damage on forming limits of voided anisotropic sheet metals. 1283-1290A

Sheet metal, Heat treatment
Aspects of Orientation-Dependent Grain Growth in Extra-Low Carbon and Interstitial-Free Steels during Continuous Annealing. 827-839A

Shielded metal arc welding
The microstructure and fracture behavior of the dissimilar alloy 690-SUS 304L joint with various Nb addition. 1097-1105A

Shipbuilding
Effect of microstructure on hydrogen embrittlement of weld-simulated HSLA-80 and HSLA-100 steels. 1297-1309A

Shock
Investigation of 'shock-induced' and 'shock-assisted' chemical reactions in Mo + 2Si powder mixtures. 15-23A

Shrinkage
Estimation and modeling of parameters for direct reduction in iron ore/coal composites: Part I. Physical parameters. 93-102B
The shrinkage of grain-boundary voids under pressure. 1493-1500A
Density Changes of Iron during Morphological Healing Evolution of Internal Fatigue Microcracks. 2925-2933A

Silicates, Reactions (chemical)
A Polymeric Approach to the Sulfide Capacity of Silicate Slags and Melts. 399-410B

Siliceous refractories, Corrosion
Investigation of the Reactions between Oxygen-Containing Iron and SiO_2 Substrate by X -Ray Sessile-Drop Technique. 647-652B

Silicides, Mechanical properties
On the fracture and fatigue properties of Mo-Mo_3Si-Mo_5SiB_2 refractory intermetallic alloys at ambient to elevated temperatures (25°C to 1300°C). 225-239A

Silicides, Microstructure
Microstructure evolution in three-dimensional inhomogeneous elastic media. 1421-1431A

Silicides, Silicides
Microstructure and Sliding Wear Behavior of Tungsten Reinforced W-Ni-Si Metal-Silicide In-Situ Composites. 2005-2015A

Silicomanganese, Phases (state of matter)
Phase-equilibrium data and liquidus for the system 'MnO'-CaO-Al_2O_3-SiO_2 at Al_2O_3/SiO_2 of 0.55 and 0.65. 173-182B

Silicon, Additives
On the Influence of Si-Ge Additions on the Aging Response. 735-742A

Silicon, Alloying additive
Improving the Fracture Toughness of Constituent Phases and Nb-Based In Situ Composites by a Computational Alloy Design Approach. 1833-1849A

Silicon, Alloying elements
The Use of Solid Electrolytes in the Determination of Activities and the Development of Sensors. 589-594B
Elastic Constants of Face-Centered Cubic and $L1_2$ Ni-Si Alloys: Composition and Temperature Dependence. 1863-1868A
Precipitation Strengthening in K5-Series γ-TiAl Alloyed with Silicon and Carbon. 2129-2138A

Silicon, Binary systems
A solutal interaction mechanism for the columnar-to-equiaxed transition in alloy solidification. 1657-1674A
Communication: Discussion of "Eutectic Solidification of Al-Si Alloys". 2688-2690A
Communication: Authors' Reply. 2690-2693A

Silicon, Ternary systems
Iron Intermetallic Phases in the Al Corner of the Al-Si-Fe System. 807-825A

Silicon base alloys, Crystal growth
Observation of cold-rolling texture and partially recrystallized texture in polycrystalline 3 pct Si-Fe by high-resolution electron backscattered diffraction. 403-408A

Silicon carbide, Composite materials
Emerging technologies in extraction and processing of metals. 137-152B
Bridging mechanisms in a Tiβ21s/SCS-6 composite: in-situ scanning electron microscopy study. 1193-1202A
Strength of SCS-6 fibers in a Tiβ21s/SCS-6 composite before and after fatigue. 1203-1213A
Mechanical properties of 2014Al/SiC composites with oxidized SiC particles. 1361-1369A
Numerical modeling of the damping capacity of Al/SiC(p). 1387-1391A
Effects of oxidation on the fatigue crack growth resistance and the interfacial properties of a Ti-MMC laminate composite. 1705-1717A

Silicon dioxide, Reduction (chemical)
Influence of Ash on Interfacial Reactions between Coke and Liquid Iron. 573-580B

Silicon nitride, Bonding
Diffusion bonding of Si_3N_4-TiN composite with nickel-based interlayers. 1627-1636A

Silver, Composite materials
Morphological stability of copper-silver multilayer thin films at elevated temperatures. 1043-1054A

Silver, Extraction
The Interdisciplinary Nature of Hydrometallurgy. 757-767B

Silver, Powder technology
Effect of Surface Oxide Films on the Properties of Pulse Electric-Current Sintered Metal Powders. 2655-2661A

Single crystals, Directional solidification
Stabilization of Thermosolutal Convective Instabilities in Ni-Based Single-Crystal Superalloys: Carbide Precipitation and Rayleigh Numbers. 1953-1967A

Single crystals, Microstructure
The Role of Nitrogen on the Deformation Response of Hadfield Steel Single Crystals. 1821-1831A

Sintered aluminum powder, Powder technology
Effect of Surface Oxide Films on the Properties of Pulse Electric-Current Sintered Metal Powders. 2655-2661A

Sintered compacts
Theoretical Design of Sedimentation Applied to the Fabrication of Functionally Graded Materials. 605-609B

Sintering
Static and dynamic energy absorption of Al foams produced by the sintering and dissolution process. 69-74B

Sintering (powder metallurgy)
Behavior of oxide film at the interface between particles in sintered Al powders by pulse electric-current sintering. 699-703A
Synthesis of ductile titanium-titanium boride (Ti-TiB) composites with a beta-titanium matrix: the nature of TiB formation and composite properties. 1371-1385A
Effect of Surface Oxide Films on the Properties of Pulse Electric-Current Sintered Metal Powders. 2655-2661A
Dehydrogenation of Nanocrystalline TiH_2 and Consequent Consolidation to Form Dense Ti. 2793-2799A

Slab casting
Modeling of the Solidification Process in a Continuous Casting Installation for Steel Slabs. 455-473B
Heat Transfer and Solidification Model of Continuous Slab Casting: CON1D. 685-705B

Slag disposal
Desiliconization and Decarburization Behavior of Molten Fe-C-

Si(-S) Alloy with CO_2 and O_2. 861-867B

Slagging
The Prediction and Representation of Phase Equilibria and Physicochemical Properties in Complex Slag Systems. 595-603B

Slags
Communication: Nickel, copper, and cobalt slag losses during converting. 121-125B
Bubble Bursting Phenomenon in Gas/Metal/Slag Systems. 525-532B
The Rate of Antimony Elimination from Molten Copper by the Use of Na_2CO_3 Slag. 869-879B
Synthesis mechanism of an Al-Ti-C grain refiner master alloy prepared by a new method. 1727-1733A

Slags, Phases (state of matter)
Phase-equilibrium data and liquidus for the system 'MnO'-CaO-Al_2O_3-SiO_2 at Al_2O_3/SiO_2 of 0.55 and 0.65. 173-182B
Experimental Study of Phase Equilibria in the PbO-ZnO"Fe_2O_3"-(CaO + SiO_2) System in Air for the Lead and Zinc Blast Furnace Sinters (CaO/SiO_2 Weight Ratio of 0.933 and PbO/(CaO + SiO_2) Ratios of 2.0 and 3.2). 383-397B
Phase Equilibria and Thermodynamic Properties of the Cu_2O-CaO- Na_2O System in Equilibrium with Copper. 631-638B

Slags, Physical properties
From Viscosity and Surface Tension to Marangoni Flow in Melts. 517-523B
Entrainment of a Two-Layer Liquid through a Taphole. 821-832B

Slags, Reactions (chemical)
Kinetics of reduction of ferric iron in Fe_2O_3-CaO-SiO_2-Al_2O_3 Slags under Argon, CO-CO_2, or H_2-H_2O. 225-234B
A Polymeric Approach to the Sulfide Capacity of Silicate Slags and Melts. 399-410B
Observation of Calcium Aluminate Inclusions at Interfaces between Ca-Treated, Al-Killed Steels and Slags. 533-538B
The Prediction and Representation of Phase Equilibria and Physicochemical Properties in Complex Slag Systems. 595-603B
Investigation of the Reactions between Oxygen-Containing Iron and SiO_2 Substrate by X -Ray Sessile-Drop Technique. 647-652B

Slags, Recycling
Dusts, Scale, Slags, Sludges...Not Wastes, But Sources of Profits. 769-779B

Slags, Reduction (chemical)
The Effect of the CaO/SiO_2 Ratio on the Phase Equilibria in the ZnO-"Fe_2O_3"-(PbO + CaO + SiO_2) System in Air: CaO/SiO_2 = 0.1, PbO/(CaO + SiO_2) = 6.2, and CaO/SiO_2 =0.6, PbO/(CaO + SiO_2) = 4.3. 369-382B
Arsenate Capacities of Copper Smelting Slags. 565-571B
Physicochemical Aspects of Titanium Slag Production and Solidification. 581-588B

Slags, Surface properties
Studies of the wetting characteristics of liquid iron on dense alumina by the x-ray sessile drop technique. 193-199B

Sliding friction
Microstructure and Sliding Wear Behavior of Tungsten Reinforced W-Ni-Si Metal-Silicide In-Situ Composites. 2005-2015A

Slip
Orientation dependence of dislocation structures in cyclically deformed Cu-16 At. Pct Al alloy single crystals. 307-318A
Modeling Transient Slag-Layer Phenomena in the Shell/mold Gap in Continuous Casting of Steel. 707-725B
A neutron diffraction and modeling study of uniaxial deformation in polycrystalline beryllium. 1439-1449A
Communication: Effects of grain size and pressing speed on the deformation mode of commercially pure Ti during equal channel angular pressing. 1555-1558A
A Taylor Model Based Description of the Proof Stress of Magnesium AZ31 during Hot Working. 1799-1806A
Fatigue Crack Growth in a Particulate TiB_2-Reinforced Powder Metallurgy Iron-Based Composite. 2017-2024A
Microstructural Effects on the Tensile Properties and Deformation Behavior of a Ti-48Al Gamma Titanium Aluminide. 2113-2127A
Relationships of Fracture Toughness and Dislocation Mobility in Intermetallics. 2315-2328A
The Effect of Severe Marforming on Shape Memory Characteristics of a Ti-Rich NiTi Alloy Processed Using Equal Channel Angular Extrusion. 2527-2539A

Slip bands
Effect of rolling temperature on the deformation and recrystallization textures of warm-rolled steels. 1163-1174A
Deformation Mechanisms in Ti-6Al-4V/TiC Composites. 1869-1877A
Effects of Microstructural Factors on Quasi-Static and Dynamic Deformation Behaviors of Ti-6Al-4V Alloys with Widmanstatten Structures. 2541-2548A

Slip planes
Observation of cold-rolling texture and partially recrystallized texture in polycrystalline 3 pct Si-Fe by high-resolution electron backscattered diffraction. 403-408A

Sludge, Recycling
Dusts, Scale, Slags, Sludges...Not Wastes, But Sources of Profits. 769-779B

Slurries, Physical properties
Response of semi-solid Sn-15 pct Pb to rapid shear-rate changes. 409-417A

Smelting
Mathematical model of COREX melter gasifier: Part I. Steady-state model. 103-114B
Phase-equilibrium data and liquidus for the system 'MnO'-CaO-Al_2O_3-SiO_2 at Al_2O_3/SiO_2 of 0.55 and 0.65. 173-182B
The Effect of the CaO/SiO_2 Ratio on the Phase Equilibria in the ZnO-"Fe_2O_3"-(PbO + CaO + SiO_2) System in Air: CaO/SiO_2 = 0.1, PbO/(CaO + SiO_2) = 6.2, and CaO/SiO_2 =0.6, PbO/(CaO + SiO_2) = 4.3. 369-382B
Arsenate Capacities of Copper Smelting Slags. 565-571B
Physicochemical Aspects of Titanium Slag Production and Solidification. 581-588B
The Prediction and Representation of Phase Equilibria and Physicochemical Properties in Complex Slag Systems. 595-603B

Soaking
Recrystallization of a cold-rolled low-carbon steel by cold-plasma-discharge rapid annealing. 1341-1348A

Sodium, Alloying additive
The Use of Solid Electrolytes in the Determination of Activities and the Development of Sensors. 589-594B

Sodium, Alloying elements
Communication: Discussion of "The Solubility of Sodium in Liquid Aluminum". 744-746B
Communication: Authors' Reply. 746-748B

Softening
Effect of prestrain and deformation temperature on the recrystallization behavior of steels microalloyed with niobium. 1237-1247A
Mutual Effects of Hydrogenation and Deformation in Ti-Nb Alloys. 2199-2206A

Solders, Mechanical properties
Effects of indium on the mechanical properties of ternary Sn-In-Ag solders. 361-365A

Solid phases
An atomistic study of solid/liquid interfaces and phase equilibrium in binary systems. 435-439A
Communication: Discussion of "Synthesis of Ultrafine Particles of Intermetallic Compounds by the Vapor-Phase Magnesium Reduction of Chloride Mixtures: Part I. Titanium Aluminides". 738-740B
Communication: Authors' Reply. 741B

Solid solutions
Modeling of the Atomic Ordering Processes in Fe_3Al Intermetallics by the Monte Carlo Simulation Method Combined with Electronic Theory of Alloys. 721-734A

Solid state
Structure and stability of a new ternary hexagonal phase in Al_3Ti-based Al-Ti-V alloys. 491-501A

Solidification
Marangoni convection driven by thermocapillary and solutocapillary forces in the Fe-O alloy pool during the solidification or remelting process. 37-49B
Relationship between tensile and shear strengths of the mushy zone in solidifying aluminum alloys. 105-113A
Analysis of the mechanism of die soldering in aluminum die casting. 139-146A
Droplet solidification and gas-droplet thermal coupling in the atomization of a Cu-6Sn alloy. 243-253B
The critical amount of nitrogen on the formation of nitrogen gas pores during solidification of 25Cr-7Ni duplex stainless steels. 313-320B
Cellular-to-dendritic transition during the directional solidification of binary alloys. 395-401A
Response of semi-solid Sn-15 pct Pb to rapid shear-rate changes. 409-417A
Simulation of Macroscopic Solidification with an Incorporated One-Dimensional Microsegregation Model Coupled to Thermodynamic Software. 411-419B
Active Solute Effects on Surface Ripples in Electron-Beam Welding Solidification. 421-432B
An atomistic study of solid/liquid interfaces and phase equilibrium in binary systems. 435-439A
Modeling of the Solidification Process in a Continuous Casting Installation for Steel Slabs. 455-473B
Dendritic growth with fluid flow in pure materials. 459-466A
Last-stage solidification of alloys: theoretical model of dendrite-arm and grain coalescence. 467-479A
The morphological evolution of dendritic microstructures during coarsening. 481-489A
Marangoni Flow at the Gas/Melt Interface of Steel. 483-493B
Precipitation of aluminum in the silicon phase contained in w319 and 356 aluminum alloys. 523-529A
Effect of a Catalyst on Heterogeneous Nucleation in Pure Fe and Fe-Ni Alloys. 539-547B
Physicochemical Aspects of Titanium Slag Production and Solidification. 581-588B
Heat Transfer and Solidification Model of Continuous Slab Casting: CON1D. 685-705B
Solidification, Segregation, and Banding in Carbon and Alloy Steels. 781-792B
Superheat Treatment of Al-7Si-0.55Mg Melt and Its Influences on the Solidification Structures and the Mechanical Properties. 799-806A
Studies on Transport Phenomena during Directional Solidification of a Noneutectic Binary Solution Cooled from the Top. 899-909B
Heat flow parameters affecting dendrite spacings during unsteady-state solidification of Sn-Pb and Al-Cu alloys. 995-1006A
Solidification of Hastelloy alloys: an alternative interpretation. 1127-1132A
Grain refinement of Al-7Si alloys and the efficiency assessment by recognition of cooling curves. 1175-1182A
The effect of grain refining on macrosegregation and dendrite arm spacing of direct chill cast AA5182. 1513-1523A
Rapid compression of aluminum alloys and its relationship to thixoformability. 1545-1554A
A solutal interaction mechanism for the columnar-to-equiaxed transition in alloy solidification. 1657-1674A
The Effect of Solidification Time and Heat Treatment on the Fatigue Properties of a Cast 319 Aluminum Alloy.

Peritectic Reaction and Solidification in Iron-Nickel Alloys. 1931-1940A
Characterization of Microstructure in Laser-Surface-Alloyed Layers of Aluminum on Nickel. 2621-2631A
In-Situ Reactive Processing of Nickel Aluminides by Laser-Engineered Net Shaping. 2633-2641A
Communication: Discussion of "Eutectic Solidification of Al-Si Alloys". 2688-2690A
Communication: Authors' Reply. 2690-2693A
Microstructural Effects on the Tensile and Fracture Behavior of Aluminum Casting Alloys A356/357. 2887-2899A
Damage by Eutectic Particle Cracking in Aluminum Casting Alloys A356/357. 2901-2912A
Solidification of Chill-Cast Al-Zn-Mg Alloys to be Used as Sacrificial Anodes. 2991-2997A
Nucleation-Controlled Microstructures and Anomalous Eutectic Formation in Undercooled Co-Sn and Ni-Si Eutectic Melts. 2999-3008A
Modeling of Marangoni-Induced Droplet Motion and Melt Convection during Solidification of Hypermonotectic Alloys. 3009-3019A

Solids
A study of microsegregation in Al-Cu using a novel single-pan scanning calorimeter. 441-447A

Solubility
Solubility of alumina in cryolite melts: measurements and modeling at 1300 K. 235-242B
Phase Equilibria and Thermodynamic Properties of the Cu_2O-CaO- Na_2O System in Equilibrium with Copper. 631-638B
Communication: Discussion of "The Solubility of Sodium in Liquid Aluminum". 744-746B
Communication: Authors' Reply. 746-748B
Thermodynamics of Nitrogen in Mn-Fe-C Melts. 853-859B
Reactive synthesis of in-situ $ZrAl_3$-Al_2O_3-Al composites. 1357-1360A
Isothermal Section of the Ternary Sn-Cu-Ni System and Interfacial Reactions in the Sn-Cu/Ni Couples at 800 °C. 2281-2287A

Solution heat treatment
The Effect of Cold Work on the Precipitation of Ω and θ' in a Ternary Al-Cu-Mg Alloy. 2757-2769A

Solution strengthening
Mechanical properties of an ultrafine-grained Al-7.5 Pct Mg alloy. 603-613A

Spacecraft
Laminar-turbulent transition in an electromagnetically levitated droplet. 29-36B

Spalling
Microstructure and Sliding Wear Behavior of Tungsten Reinforced W-Ni-Si Metal-Silicide In-Situ Composites. 2005-2015A
Effect of Ion Implantation on the Oxidation Resistance of TiAl. 2253-2261A
Some Water Vapor Effects during the Oxidation of Alloys that are α-Al_2O_3 Formers. 2609-2619A

Spark plasma sintering
Spark Plasma Sintering of Al-Si-Cu-Fe Quasi-Crystalline Powder. 841-849A

Specific heat
Enthalpy of formation and heat capacity of Fe-Mn alloys. 209-223B
A study of microsegregation in Al-Cu using a novel single-pan scanning calorimeter. 441-447A
Thermal Conductivities of Molten Iron, Cobalt, and Nickel by Laser Flash Method. 2801-2807A

Specimen preparation
Communication: Focused ion beam milling: A practical method for preparing cast Al-Si alloy samples for transmission electron microscopy. 705-707A

Sphalerite, Extraction
Effect of Aging Conditions on the Leaching of Mechanically Activated Pyrite and Sphalerite. 639-645B

Spheroidizing
Morphological healing evolution of intragranular penny-shaped microcracks by surface diffusion: Part I. Simulation. 277-285A

Spinodal decomposition
Communication: Effects of Cooling Rate on Aging at 475 °C of an Oxide-Dispersion-Strengthened Ferritic Steel. 2681-2683A

Splitting
Morphological healing evolution of intragranular penny-shaped microcracks by surface diffusion: Part I. Simulation. 277-285A

Spot welding
Simulation of Time-Dependent Pool Shape during Laser Spot Welding: Transient Effects. 2947-2961A

Spray cooling
A transient simulation and dynamic spray cooling control model for continuous steel casting. 297-306B

Sprayed coatings, Mechanical properties
Mechanical and Physical Properties of High Velocity Oxy-Fuel-Sprayed Iron Aluminide Coatings. 2223-2231A

Spring steels, Mechanical properties
A Novel Inclusion Inspection Method Employing 20 kHz Fatigue Testing. 2517-2526A

Stability
Observations and analysis of the influence of phase transformations on the instability of the thermally grown oxide in a thermal barrier system. 511-522A

Stabilization
Fundamental Considerations for the Development of Oxidation-Resistant Alloys and Coatings Based on γ-TiAl. 2247-2251A
Investigation of Microstructural Changes in INCONEL 706 at High Temperatures by In-Situ Small-Angle Neutron Scattering. 2781-2792A

Stacking fault energy
Communication: Mechanical milling-induced deformation twinning in fcc materials with high stacking fault energy. 707-712A
Hot Working and Recrystallization of As-Cast 317L. 3021-3041A

Stainless steels, Coating
Cathodic Deposition of Copper in the Presence of Aqueous Sulfurous Acid, Bivalent Aquacobalt Ion, or Both using a Stainless Steel Cathode and a Graphite Anode. 813-819B

Stainless steels, Phases (state of matter)
The microstructure of an Fe-Mn-Si-Cr-Ni stainless steel shape memory alloy. 1029-1042A

Standing waves
Experimental and Theoretical Studies of the Motion Generated by a Two- Frequency Magnetic Field at the Free Surface of a Gallium Pool. 669-678B

Statistical analysis
Scatter in Fatigue Life Due to Effects of Porosity in Cast A356-T6 Aluminum-Silicon Alloys. 1879-1890A

Steel constituents
On the application of the additivity rule in pearlitic transformation in low alloy steels. 1259-1264A

Steel scrap, Recycling
Dusts, Scale, Slags, Sludges...Not Wastes, But Sources of Profits. 769-779B

Steels, Casting
A transient simulation and dynamic spray cooling control model for continuous steel casting. 297-306B
Modeling of the Solidification Process in a Continuous Casting Installation for Steel Slabs. 455-473B
Heat Transfer and Solidification Model of Continuous Slab Casting: CON1D. 685-705B
Modeling Transient Slag-Layer Phenomena in the Shell/mold Gap in Continuous Casting of Steel. 707-725B

Steels, Composite materials
Communication: Spray deposited metal-carbon fiber reinforced polymer hybrid structures. 421-424A

Steels, Mechanical properties
Role of microstructure on sulfide stress cracking of oil and gas pipeline steels. 1089-1096A

Steels, Metal working
Effect of prestrain and deformation temperature on the recrystallization behavior of steels microalloyed with niobium. 1237-1247A

Steels, Microstructure
Communication: Nonisothermal growth and dissolution of inclusions in liquid steels. 267-269B
Grain growth in a low-loss cold-rolled motor-lamination steel. 1321-1327A

Steels, Physical properties
Mixing and Solid-Liquid Mass Transfer Rates in a Creusot Loire Uddeholm Vessel: A Water Model Case Study. 833-842B

Steels, Reactions (chemical)
Observation of Calcium Aluminate Inclusions at Interfaces between Ca-Treated, Al-Killed Steels and Slags. 533-538B

Steels, Rolling
Effect of temper rolling on texture formation in a low loss cold-rolled magnetic lamination steel. 1311-1319A

Steels, Surface finishing
Communication: Phase Transition in Galvanneal Coatings. 879-881A

Steels, Welding
Active Solute Effects on Surface Ripples in Electron-Beam Welding Solidification. 421-432B
Effects of TiC composite coating on electrode degradation in microresistance welding of nickel-plated steel. 1501-1511A

Stiffness
Communication: Spray deposited metal-carbon fiber reinforced polymer hybrid structures. 421-424A
Elastic Constants of Face-Centered Cubic and $L1_2$ Ni-Si Alloys: Composition and Temperature Dependence. 1863-1868A
Fatigue Crack Growth in a Particulate TiB_2-Reinforced Powder Metallurgy Iron-Based Composite. 2017-2024A

Strain
Detwinning in NiTi alloys. 5-13A
High-temperature low-cycle fatigue behavior of K40S cobalt-base superalloy. 979-986A
Communication: Effects of grain size and pressing speed on the deformation mode of commercially pure Ti during equal channel angular pressing. 1555-1558A
A Method for Measuring Microstructural-Scale Strains Using a Scanning Electron Microscope: Applications to γ-Titanium Aluminides. 2301-2313A

Strain aging
Static Strain Aging Phenomena in Cold-Rolled Dual-Phase Steels. 781-792A

Strain hardening
The effect of the strain path on the work hardening of austenitic and ferritic stainless steels in axisymmetric drawing. 589-601A
Mechanical properties of an ultrafine-grained Al-7.5 Pct Mg alloy. 603-613A
Work-softening behavior of the ultrafine-grained Al alloy processed by high-strain-rate, dissimilar-channel angular pressing. 625-632A
Elasto-Plastic Load Transfer in Bulk Metallic Glass Composites Containing Ductile Particles. 1787-1797A
A Planar Simple Shear Test and Flow Behavior in a Superplastic Al-Mg Alloy. 2465-2471A
The Influence of Precipitation on the Work-Hardening Behavior

of the Aluminum Alloys AA6111 and AA7030. 2473-2481A
Large Strain Mechanical Behavior of 1018 Cold-Rolled Steel over a Wide Range of Strain Rates. 2873-2885A
Microstructural Effects on the Tensile and Fracture Behavior of Aluminum Casting Alloys A356/357. 2887-2899A
Hot Working and Recrystallization of As-Cast 317L. 3021-3041A

Strain rate
Effect of nitrogen content on the environmentally-assisted cracking susceptibility of duplex stainless steels. 95-103A
The influence of microstructure and strain rate on the compressive deformation behavior of Ti-6Al-4V. 295-306A
A constitutive description of an aluminum-0.32 pct iron under hot-deformation conditions. 319-326A
The effect of the strain path on the work hardening of austenitic and ferritic stainless steels in axisymmetric drawing. 589-601A
Mechanical properties of an ultrafine-grained Al-7.5 Pct Mg alloy. 603-613A
Microstructural effects on moisture-induced embrittlement of isothermally forged TiAl-based intermetallic alloys. 645-655A
High-temperature deformation behavior of coarse- and fine-grained $MoSi_2$ with different silica contents. 1069-1088A
Effect of microstructure on hydrogen embrittlement of weld-simulated HSLA-80 and HSLA-100 steels. 1297-1309A
Deformation, residual stress, and constitutive relations for quenched W319 aluminum. 1483-1491A
Communication: Effects of grain size and pressing speed on the deformation mode of commercially pure Ti during equal channel angular pressing. 1555-1558A
Effect of n addition on tensile and corrosion behaviors of CD4MCU cast duplex stainless steels. 1617-1625A
Hot working and recrystallization of as-cast 316L. 1683-1703A
A Taylor Model Based Description of the Proof Stress of Magnesium AZ31 during Hot Working. 1799-1806A
Deformation Mechanisms in Ti-6Al-4V/TiC Composites. 1869-1877A
High-Temperature Deformation Behavior of a Gamma TiAl Alloy- Microstructural Evolution and Mechanisms. 2165-2176A
Microstructure Stability during Creep Deformation of Hard-Oriented Polysynthetically Twinned Crystal of TiAl Alloy. 2191-2198A
Measurement and Modeling of Creep in Open-Cell NiAl Foams. 2353-2363A
Stress-State Dependence of Cavitation and Flow Behavior in Superplastic Aluminum Alloys. 2449-2463A
A Planar Simple Shear Test and Flow Behavior in a Superplastic Al-Mg Alloy. 2465-2471A
Prediction of Limit Strains in Superplastic Materials. 2559-2564A
Fabrication and Creep Properties of Superalloy-Zirconia Composites. 2643-2653A
Communication: Effects of Cooling Rate on Aging at 475 °C of an Oxide-Dispersion-Strengthened Ferritic Steel. 2681-2683A
Creep of Aluminum-Based Closed-Cell Foams. 2809-2817A
A Constitutive Description for Aluminum-0.1 Pct Magnesium Alloy under Hot Working Conditions. 2837-2846A
Large Strain Mechanical Behavior of 1018 Cold-Rolled Steel over a Wide Range of Strain Rates. 2873-2885A
Hot Working and Recrystallization of As-Cast 317L. 3021-3041A

Strain softening
Work-softening behavior of the ultrafine-grained Al alloy processed by high-strain-rate, dissimilar-channel angular pressing. 625-632A
High-temperature deformation behavior of coarse- and fine-grained $MoSi_2$ with different silica contents. 1069-1088A
On the Origin of Strain Softening during Deformation of Aluminum in Torsion to Large Strains. 2727-2736A
Large Strain Mechanical Behavior of 1018 Cold-Rolled Steel over a Wide Range of Strain Rates. 2873-2885A

Stress concentration
Postnecking elastoplastic characterization: degree of approximation in the Bridgman method and properties of the flow-stress/true-stress ratio. 615-624A
Effects of test temperature and grain size on the Charpy impact toughness and dynamic toughness (K_{ID}) of polycrystalline niobium. 967-976A

Stress corrosion cracking
Effect of nitrogen content on the environmentally-assisted cracking susceptibility of duplex stainless steels. 95-103A
Effect of n addition on tensile and corrosion behaviors of CD4MCU cast duplex stainless steels. 1617-1625A
Investigation of Dendrite-Boundary Microchemistry in Alloy 182 using Auger Electron Spectroscopy Analysis. 1891-1899A

Stress cracking
Role of microstructure on sulfide stress cracking of oil and gas pipeline steels. 1089-1096A

Stress intensity
Internal hydrogen embrittlement of ultrahigh-strength AERMET 100 steel. 327-344A
Effects of oxidation on the fatigue crack growth resistance and the interfacial properties of a Ti-MMC laminate composite. 1705-1717A

Stress ratio
An Investigation of Contact Deformation, Fracture, and Fatigue Behavior in Bulk Metallic Glasses. 1851-1861A
Fatigue Crack Growth Mechanisms in Ti6242 Lamellar Microstructures: Influence of Loading Frequency and Temperature. 2565-2577A

Stress strain curves
Salient shear bands and second-phase addition interactions of bulk metallic glass matrix composite. 1147-1152A
A neutron diffraction and modeling study of uniaxial deformation in polycrystalline beryllium. 1439-1449A
On the Origin of Strain Softening during Deformation of Aluminum in Torsion to Large Strains. 2727-2736A

A Constitutive Description for Aluminum-0.1 Pct Magnesium Alloy under Hot Working Conditions. 2837-2846A

Stresses
A constitutive description of an aluminum-0.32 pct iron under hot-deformation conditions. 319-326A

Stretching
Evolution of strain-induced microstructure and texture in commercial aluminum sheet under balanced biaxial stretching. 657-671A

Striations
Crack Initiation and Propagation in 50.9 At. pct Ni-Ti Pseudoelastic Shape-Memory Wires in Bending-Rotation Fatigue. 2847-2860A

Strip steel, Structural hardening
Communication: Discussion of 'precipitation behavior and its effect on strengthening of an HSLA-Nb/Ti steel. 1013-1017A
Communication: Authors' reply. 1017-1019A

Strontium, Mechanical properties
Influence of composition, Sr modification, and annealing treatment on the structure and properties of cast Al-4 pct Mg alloys. 115-129A

Strontium, Reactions (chemical)
Occlusion and ion exchange in the molten (lithium chloride + potassium chloride + alkaline-earth chloride) salt + zeolite 4A system with alkaline-earth chlorides of calcium and strontium and in the molten (lithium chloride + potassium chloride + actinide chloride) salt + zeolite 4A system with the actinide chloride of uranium. 201-208B

Structure factor
Synthesis of ductile titanium-titanium boride (Ti-TiB) composites with a beta-titanium matrix: the nature of TiB formation and composite properties. 1371-1385A

Substructures
Delta-Ferrite Recovery Structures in Low-Carbon Steels. 495-501B

Sulfides, Reactions (chemical)
Effect of sulfides on gold dissolution in ammoniacal thiosulfate medium. 5-13B

Sulfidization
Sulfidation of chalcopyrite with elemental sulfur. 15-23B
Kinetics of the sulfidation of chalcopyrite with gaseous sulfur. 61-68B

Superalloys, Bonding
Diffusion bonding of Si_3N_4-TiN composite with nickel-based interlayers. 1627-1636A

Superalloys, Composite materials
Fabrication and Creep Properties of Superalloy-Zirconia Composites. 2643-2653A

Superalloys, Crystal growth
Solidification of Hastelloy alloys: an alternative interpretation. 1127-1132A

Superalloys, Crystal lattices
Measurement of the lattice misfit of the nickel-base superalloy SC16 by high-energy synchrotron radiation. 193-197A

Superalloys, Directional solidification
Stabilization of Thermosolutal Convective Instabilities in Ni-Based Single-Crystal Superalloys: Carbide Precipitation and Rayleigh Numbers. 1953-1967A

Superalloys, Mechanical properties
A microstructure-based fatigue-crack-initiation model. 43-57A
High-temperature low-cycle fatigue behavior of K40S cobalt-base superalloy. 979-986A
The low-cycle fatigue and fatigue-crack-growth behavior of HAYNES HR-120 alloy. 1451-1460A
Communication: Strength differential measurements in IN 718: effects of superimposed. 1736-1739A
Creep Behaviors of an Ir-23Nb Alloy at Ultra-high Temperatures. 2217-2221A
On the Wear of a Cobalt-Based Superalloy in Zinc Baths. 2387-2396A

Superalloys, Microstructure
Coherent γ'-precipitates at singular and rough grain boundaries in a model Ni-base superalloy. 1433-1437A
Evaluation of a Rayleigh-number-based freckle criterion for Pb-Sn alloys and Ni-base superalloys. 1525-1536A
Investigation of Microstructural Changes in INCONEL 706 at High Temperatures by In-Situ Small-Angle Neutron Scattering. 2781-2792A

Superalloys, Oxidation
Some Water Vapor Effects during the Oxidation of Alloys that are α-Al_2O_3 Formers. 2609-2619A

Superalloys, Phase transformations
Observations and analysis of the influence of phase transformations on the instability of the thermally grown oxide in a thermal barrier system. 511-522A

Superalloys, Phases (state of matter)
Communication: Effects of Cooling Rate on Aging at 475 °C of an Oxide-Dispersion-Strengthened Ferritic Steel. 2681-2683A

Superalloys, Thermal properties
Communication: Thermal Conductivity of Cobalt-Base Alloys. 2026-2028A

Superalloys, Welding
The microstructure and fracture behavior of the dissimilar alloy 690-SUS 304L joint with various Nb addition. 1097-1105A
The role of the slope out region on fatigue crack initiation in electron beam welded waspaloy. 1637-1645A

Supercooling
Communication: Further discussion on the free growth behavior in the solidification of undercooled eutectic melts. 1393-1396A
Communication: On the Atomistic Theory of Solidification. 2683-2688A

Superheating
Superheat Treatment of Al-7Si-0.55Mg Melt and Its Influences

on the Solidification Structures and the Mechanical Properties. 799-806A

Superlattices
Effect of hydrogen charging on dislocation behavior in Ni-Cr and Ni_2Cr alloys. 1249-1257A

Superplastic forming
Influence of intense plastic straining on grain refinement, precipitation, and mechanical properties of Al-Cu-Li-based alloys. 1153-1161A

Superplasticity
Properties of TiAl sheet pack-rolled at temperatures below 1000°C. 1329-1339A
High-Temperature Deformation Behavior of a Gamma TiAl Alloy- Microstructural Evolution and Mechanisms. 2165-2176A
Stress-State Dependence of Cavitation and Flow Behavior in Superplastic Aluminum Alloys. 2449-2463A
A Planar Simple Shear Test and Flow Behavior in a Superplastic Al-Mg Alloy. 2465-2471A
Prediction of Limit Strains in Superplastic Materials. 2559-2564A

Supersaturation
Precipitation of Heusler phase (Ni_2TiAl) from B2-TiNi in Ni-Ti-Al and Ni-Ti-Al-x (x = Hf, Zr) Alloys. 1221-1234A
Microstructure Evolution during Alpha-Beta Heat Treatment of Ti-6Al-4V. 2377-2386A

Superstructures
Effect of hydrogen charging on dislocation behavior in Ni-Cr and Ni_2Cr alloys. 1249-1257A

Surface alloying
Correlation of microstructure with hardness and wear resistance of VC/steel surface-alloyed materials fabricated by high-energy electron-beam irradiation. 59-69A
Improvement of hardness and wear resistance of (TiC,TiB)/Ti-6Al-4V surface-alloyed materials fabricated by high-energy electron-beam irradiation. 1461-1471A

Surface area
Effect of Aging Conditions on the Leaching of Mechanically Activated Pyrite and Sphalerite. 639-645B
A Mushy-Zone Rayleigh Number to Describe Interdendritic Convection during Directional Solidification of Hypoeutectic Pb-Sb and Pb-Sn Alloys. 2365-2376A
Microstructure Development during Hot Deformation of Aluminum to Large Strains. 2737-2744A

Surface energy
Microstructure evolution in three-dimensional inhomogeneous elastic media. 1421-1431A
The shrinkage of grain-boundary voids under pressure. 1493-1500A
Theory of Interface Properties for Carbide Precipitates in TiAl. 2097-2101A
Relationships of Fracture Toughness and Dislocation Mobility in Intermetallics. 2315-2328A
An Energy Approach to the Formation of Twins in TiAl. 2827-2836A

Surface layer
Characterization of Microstructure in Laser-Surface-Alloyed Layers of Aluminum on Nickel. 2621-2631A

Surface structure
Communication: Phase Transition in Galvanneal Coatings. 879-881A

Surface temperature
A Review of Very-High-Temperature Nb-Silicide-Based Composites. 2043-2052A

Surface tension
Active Solute Effects on Surface Ripples in Electron-Beam Welding Solidification. 421-432B
From Viscosity and Surface Tension to Marangoni Flow in Melts. 517-523B
Bubble Bursting Phenomenon in Gas/Metal/Slag Systems. 525-532B
Mechanism and Optimization of Oxide Fluxes for Deep Penetration in Gas Tungsten Arc Welding. 1901-1907A

Surface waves
Experimental and Theoretical Studies of the Motion Generated by a Two- Frequency Magnetic Field at the Free Surface of a Gallium Pool. 669-678B

Surgical implants, Mechanical properties
Aging response of the young's modulus and mechanical properties of Ti-29Nb-13Ta-4.6Zr for biomedical applications. 1007-1012A

Tantalum, Alloying additive
Oxidation Behavior and Transmission Electron Microscope Characterization of Ti-44Al-xNb-2(Ta,Zr) Alloys. 2263-2271A

Tantalum, Alloying elements
Elasto-Plastic Load Transfer in Bulk Metallic Glass Composites Containing Ductile Particles. 1787-1797A

Tantalum, Mechanical properties
Multiple cracking of tantalum by hydrogenation. 685-690A

Temperature distribution
Communication: Thermal Conductivity of Cobalt-Base Alloys. 2026-2028A

Temperature effects
Communication: Influence of Coating an Thermal Response of Composites Reinforced with Anisotropic Fibers. 883-887A

Tensile properties
Mechanical properties of iron processed by severe plastic deformation. 71-83A
Influence of composition, Sr modification, and annealing treatment on the structure and properties of cast Al-4 pct Mg alloys. 115-129A
Tensile properties and creep behavior of a new Ti-Al-Nb intermetallic alloy with an O + α_2 microstructure. 633-643A
A Composite Model for the Grain-Size Dependence of Yield Stress of Nanograined Materials. 765-772A
Synthesis of ductile titanium-titanium boride (Ti-TiB) composites with a beta-titanium matrix: the nature of TiB formation and composite properties. 1371-1385A
Effect of n addition on tensile and corrosion behaviors of CD4MCU cast duplex stainless steels. 1617-1625A
Development and Elemental Powder Metallurgy of a Y-Containing Two-Phase TiAl Alloy. 2077-2087A
Microstructural Effects on the Tensile Properties and Deformation Behavior of a Ti-48Al Gamma Titanium Aluminide. 2113-2127A
Effect of Carbon Addition on the Strength and-Creep Resistance of FeAl Alloys. 2233-2246A
Grain-Size Effects on Tensile Behavior of Nickel and AISI 316L Stainless Steel. 2329-2340A
Effects of Microstructural Factors on Quasi-Static and Dynamic Deformation Behaviors of Ti-6Al-4V Alloys with Widmanstatten Structures. 2541-2548A
Microstructural Effects on the Tensile and Fracture Behavior of Aluminum Casting Alloys A356/357. 2887-2899A

Tensile strength
Effect of nitrogen content on the environmentally-assisted cracking susceptibility of duplex stainless steels. 95-103A
Relationship between tensile and shear strengths of the mushy zone in solidifying aluminum alloys. 105-113A
Influence of thermomechanical treatments on the microstructure and mechanical properties of HSLA-100 steel plates. 241-253A
Effects of indium on the mechanical properties of ternary Sn-In-Ag solders. 361-365A
Mechanical properties of an ultrafine-grained Al-7.5 Pct Mg alloy. 603-613A
Aging response of the young's modulus and mechanical properties of Ti-29Nb-13Ta-4.6Zr for biomedical applications. 1007-1012A
Effect of service-simulated aging on the microstructure and properties of casing casting steel (1CrMoV) vis-a-vis remnant life assessment. 1265-1274A
Mechanical properties of 2014Al/SiC composites with oxidized SiC particles. 1361-1369A
Microstructural Aspects of QuasiPolygonal and Granular Bainitic Ferrites in an Ultra-Low-Carbon Interstitial-Free High-Strength Steel. 2025-2026A
Primary Creep Behavior of Ti-48Al-2W as a Function of Stress and Lamellar Morphology. 2177-2190A
Effect of Cooling Rate on the As-Quenched Microstructure and Mechanical Properties of HSLA-100 Steel Plates. 2493-2504A
Microstructure and Fatigue Properties of Hydroformed Aluminum Alloys 6063 and 5754. 2549-2557A
Investigation of a Directionally Solidified NiAl/Cr(Mo) Composite Alloyed with Hf. 2663-2670A

Tensile stress
The effect of the strain path on the work hardening of austenitic and ferritic stainless steels in axisymmetric drawing. 589-601A
Microstructural effects on moisture-induced embrittlement of isothermally forged TiAl-based intermetallic alloys. 645-655A
Effects of tensile prestrain on the notch toughness of low-alloy steel. 1055-1068A
Mechanical measurements of passive film fracture on an austenitic stainless steel. 1291-1296A
Elasto-Plastic Load Transfer in Bulk Metallic Glass Composites Containing Ductile Particles. 1787-1797A
Stress-State Dependence of Cavitation and Flow Behavior in Superplastic Aluminum Alloys. 2449-2463A
Fabrication of Ultrahigh Nitrogen Austenitic Steels by Nitrogen Gas Absorption into Solid Solution. 2591-2599A

Tension
Communication: Strength differential measurements in IN 718: effects of superimposed. 1736-1739A

Tension tests
Effects of indium on the mechanical properties of ternary Sn-In-Ag solders. 361-365A
Postnecking elastoplastic characterization: degree of approximation in the Bridgman method and properties of the flow-stress/true-stress ratio. 615-624A
Microstructural effects on moisture-induced embrittlement of isothermally forged TiAl-based intermetallic alloys. 645-655A
Deformation, residual stress, and constitutive relations for quenched W319 aluminum. 1483-1491A
Mechanical and Physical Properties of High Velocity Oxy-Fuel-Sprayed Iron Aluminide Coatings. 2223-2231A
Communication: The Effect of Stress State on Cavity Initiation during Hot Working of Ti-6Al-4V. 2397-2400A
The Influence of Precipitation on the Work-Hardening Behavior of the Aluminum Alloys AA6111 and AA7030. 2473-2481A
Fabrication of Ultrahigh Nitrogen Austenitic Steels by Nitrogen Gas Absorption into Solid Solution. 2591-2599A
Communication: Effects of Cooling Rate on Aging at 475 °C of an Oxide-Dispersion-Strengthened Ferritic Steel. 2681-2683A

Ternary systems, Phases (state of matter)
Phase equilibria of the ternary Al-Cu-Ni system and interfacial reactions of related systems at 800°C. 199-209A
Phase Equilibria and Thermodynamic Properties of the Cu_2O-CaO- Na_2O System in Equilibrium with Copper. 631-638B
Determination of Standard Gibbs Energies of Formation of $Fe_2Mo_3O_{12}$, $Fe_2Mo_3O_8$, Fe_2MoO_4, and $FeMoO_4$ of the Fe-Mo-O Ternary System and μ Phase of the Fe-Mo Binary System by Electromotive Force Measurement Using a Y_2O_3-Stabilized ZrO_2 Solid Electrolyte. 653-659B
Iron Intermetallic Phases in the Al Corner of the Al-Si-Fe System. 807-825A
Isothermal Section of the Ternary Sn-Cu-Ni System and Interfacial Reactions in the Sn-Cu/Ni Couples at 800 °C. 2281-2287A

Texture
The evolution of annealing textures in 90 pct drawn copper wire. 531-541A
Evolution of strain-induced microstructure and texture in commercial aluminum sheet under balanced biaxial stretching. 657-671A
Basal plane texture and flow pattern in friction stir weld of a magnesium alloy. 987-994A
Effect of rolling temperature on the deformation and recrystallization textures of warm-rolled steels. 1163-1174A
Effect of initial texture on texture evolution in 1050 Al alloys under simple shear. 1675-1681A
A Taylor Model Based Description of the Proof Stress of Magnesium AZ31 during Hot Working. 1799-1806A
Communication: Recrystallization Textures of Continuous Cast AA 3015 Alloy: Development of the P Orientation {111}<566>. 2029-2032A
Microstructure and Texture of Hot-Rolled Cb-Ti and V-Cb Microalloyed Steels with Differences in Formability and Toughness. 2341-2351A
The Effects of Cold Working on Sensitization and Intergranular Corrosion Behavior of AISI 304 Stainless Steel. 2441-2447A
On the Origin of Strain Softening during Deformation of Aluminum in Torsion to Large Strains. 2727-2736A
Hot Working and Recrystallization of As-Cast 317L. 3021-3041A

Thermal analysis
Effect of a Catalyst on Heterogeneous Nucleation in Pure Fe and Fe-Ni Alloys. 539-547B
Thermal Analysis of Twin-Channel Induction Furnaces. 679-684B

Thermal barriers
Communication: Residual stress distribution in electron beam-physical vapor deposited ZrO_2 thermal barrier coating layer by Raman spectroscopy. 1739-1741A
Processing and Characterization of Plasma-Sprayed Ceramic Coatings on Steel Substrate: Part I. On Coating Characteristics. 1909-1918A

Thermal barriers, Phase transformations
Observations and analysis of the influence of phase transformations on the instability of the thermally grown oxide in a thermal barrier system. 511-522A

Thermal barriers, Phases (state of matter)
Microstructural Characterization of a Platinum-Modified Diffusion Aluminide Bond Coat for Thermal Barrier Coatings. 2289-2299A

Thermal conductivity
Estimation and modeling of parameters for direct reduction in iron ore/coal composites: Part I. Physical parameters. 93-102B
The effect of grain refining on macrosegregation and dendrite arm spacing of direct chill cast AA5182. 1513-1523A
Communication: Thermal Conductivity of Cobalt-Base Alloys. 2026-2028A
Thermal Conductivities of Molten Iron, Cobalt, and Nickel by Laser Flash Method. 2801-2807A
Thermophysical Properties of Roll-Compacted Nickel Sheet for High-Density Infrared Sheet Fabrication. 3043-3054A

Thermal cycling
Delta-Ferrite Recovery Structures in Low-Carbon Steels. 495-501B
Resistance to shape refinement of precipitates in Al-(Si,Ge) alloys during thermal cycling. 543-551A
Microstructural Characterization of a Platinum-Modified Diffusion Aluminide Bond Coat for Thermal Barrier Coatings. 2289-2299A

Thermal diffusivity
Evaluation of a Rayleigh-number-based freckle criterion for Pb-Sn alloys and Ni-base superalloys. 1525-1536A
Thermal Conductivities of Molten Iron, Cobalt, and Nickel by Laser Flash Method. 2801-2807A

Thermal expansion
Measurement of the lattice misfit of the nickel-base superalloy SC16 by high-energy synchrotron radiation. 193-197A
Temperature Dependence of the Refractive Index of Al_2O_3-Na_2O- SiO_2 Melts: Role of Electronic Polarizability of Oxygon Controlled by Network Structure. 549-554B
Finite-element analysis of effects of the laser-processed bimaterial component size on stresses and distortion. 1133-1145A
Communication: Residual stress distribution in electron beam-physical vapor deposited ZrO_2 thermal barrier coating layer by Raman spectroscopy. 1739-1741A
Phase equilibria in prototype Nb-Pd-Hf-Al alloys 1771-1782A
Development and Elemental Powder Metallurgy of a Y-Containing Two-Phase TiAl Alloy. 2077-2087A
Mechanical and Physical Properties of High Velocity Oxy-Fuel-Sprayed Iron Aluminide Coatings. 2223-2231A
Structural Properties and Stability of Metastable Phases in the Zr-Nb System: Part II. Aging of Bcc (β) Alloys and Assessment of β-Zr. 2771-2779A

Thermal fatigue
Processing and Characterization of Plasma-Sprayed Ceramic Coatings on Steel Substrate: Part II. On Coating Performance. 1919-1930A

Thermal stability
Diffusion bonding of Si_3N_4-TiN composite with nickel-based interlayers. 1627-1636A
Work-Hardening and Recovery Mechanisms in Gamma-Based Titanium Aluminides. 2103-2111A

Thermal stresses
Thermal Analysis of Twin-Channel Induction Furnaces. 679-684B
Finite-element analysis of effects of the laser-processed bimaterial component size on stresses and distortion. 1133-1145A

Thermodynamics
Thermodynamics of carbon in liquid manganese and ferromanganese alloys. 51-59B
Solubility of alumina in cryolite melts: measurements and modeling at 1300 K. 235-242B
Communication: Nonisothermal growth and dissolution of inclusions in liquid steels. 267-269B
Simulation of Macroscopic Solidification with an Incorporated One-Dimensional Microsegregation Model Coupled to Thermodynamic Software. 411-419B
The Prediction and Representation of Phase Equilibria and Physicochemical Properties in Complex Slag Systems. 595-603B
Phase Equilibria and Thermodynamic Properties of the Cu_2O-CaO- Na_2O System in Equilibrium with Copper. 631-638B
Thermal Analysis of Twin-Channel Induction Furnaces. 679-684B
Communication: Activities of Phosphorus in Copper-Nickel Liquid Alloys Saturated with Solid Copper-Nickel Solid Solutions at 1573 K. 741-744B
The Interdisciplinary Nature of Hydrometallurgy. 757-767B
Thermodynamics of Nitrogen in Mn-Fe-C Melts. 853-859B
A Thermodynamic Study of Liquid Fe-Si-B Alloys; an Influence of Ternary Associates on a Liquid → Glass Transition. 887-898B
Communication: Evaluation of Evaporation Losses during Electron-Beam Melting of Ti-Al-V Alloys. 911-915B
Thermodynamic Calculations for Nb-Containing High-Speed Steels and White Cast-Iron Alloys. 1749-1758A
The Thermodynamics of Tetrataenite and Awaruite: A Review of the Fe-Ni Phase Diagram. 1759-1769A
Microstructure Evolution during Alpha-Beta Heat Treatment of Ti-6Al-4V. 2377-2386A
Effect of Surface Oxide Films on the Properties of Pulse Electric-Current Sintered Metal Powders. 2655-2661A
Structural Properties and Stability of Metastable Phases in the Zr-Nb System: Part II. Aging of Bcc (β) Alloys and Assessment of β-Zr. 2771-2779A
Thermodynamics of Stress-induced Interstitial Redistribution in Body-Centered Cubic Metals. 2819-2825A

Thermomechanical treatment
Influence of thermomechanical treatments on the microstructure and mechanical properties of HSLA-100 steel plates. 241-253A
Effect of prestrain and deformation temperature on the recrystallization behavior of steels microalloyed with niobium. 1237-1247A
Effect of deformation schedule on the microstructure and mechanical properties of a thermomechanically processed C-Mn-Si transformation-induced plasticity steel. 1599-1609A

Thickness
Evolution of strain-induced microstructure and texture in commercial aluminum sheet under balanced biaxial stretching. 657-671A

Thixoforming
Rapid compression of aluminum alloys and its relationship to thixoformability. 1545-1554A

Thixotropy
Response of semi-solid Sn-15 pct Pb to rapid shear-rate changes. 409-417A
Rapid compression of aluminum alloys and its relationship to thixoformability. 1545-1554A

Tin, Alloying elements
The role of tin in the hot-ductility deterioration of a low-carbon steel. 1611-1616A
A Mushy-Zone Rayleigh Number to Describe Interdendritic Convection during Directional Solidification of Hypoeutectic Pb-Sb and Pb-Sn Alloys. 2365-2376A

Tin, Diffusion
Communication: The Entropy Factor in Liquid Diffusion. 882-883A

Tin, Ternary systems
Isothermal Section of the Ternary Sn-Cu-Ni System and Interfacial Reactions in the Sn-Cu/Ni Couples at 800 °C. 2281-2287A

Tin base alloys, Crystal growth
Heat flow parameters affecting dendrite spacings during unsteady-state solidification of Sn-Pb and Al-Cu alloys. 995-1006A

Tin base alloys, Mechanical properties
Effects of indium on the mechanical properties of ternary Sn-In-Ag solders. 361-365A

Tin base alloys, Physical properties
Response of semi-solid Sn-15 pct Pb to rapid shear-rate changes. 409-417A

Titanium, Alloying additive
Improving the Fracture Toughness of Constituent Phases and Nb-Based In Situ Composites by a Computational Alloy Design Approach. 1833-1849A

Titanium, Brazing
Reaction Layers and Mechanisms for a Ti-Activated Braze on Sapphire. 2963-2972A

Titanium, Composite materials
Theoretical Design of Sedimentation Applied to the Fabrication of Functionally Graded Materials. 605-609B
Synthesis of ductile titanium-titanium boride (Ti-TiB) composites with a beta-titanium matrix: the nature of TiB formation and composite properties. 1371-1385A
Titanium-Titanium Boride (Ti-TiB) Functionally Graded Materials through Reaction Sintering: Synthesis, Microstructure, and Properties. 1993-2003A

Titanium, Crystal growth
Communication: On the Atomistic Theory of Solidification. 2683-2688A

Titanium, Extraction
Calciothermic reduction of titanium oxide in molten $CaCl_2$. 277-285B
Calciothermic reduction of titanium oxide and in-situ electrolysis in molten $CaCl_2$. 287-295B

Titanium, Powder technology
Dehydrogenation of Nanocrystalline TiH_2 and Consequent

Consolidation to Form Dense Ti. 2793-2799A

Titanium base alloys, Composite materials
Bridging mechanisms in a Tiβ21s/SCS-6 composite: in-situ scanning electron microscopy study. 1193-1202A
Strength of SCS-6 fibers in a Tiβ21s/SCS-6 composite before and after fatigue. 1203-1213A
Effects of oxidation on the fatigue crack growth resistance and the interfacial properties of a Ti-MMC laminate composite. 1705-1717A
Deformation Mechanisms in Ti-6Al-4V/TiC Composites. 1869-1877A

Titanium base alloys, Crystal lattices
An Energy Approach to the Formation of Twins in TiAl. 2827-2836A

Titanium base alloys, Directional solidification
Study of Microstructure and Solute Partitioning in a Cast Ti-48Al-2Cr-2Nb Alloy by Quenching during Directional Solidification Technique. 2139-2148A

Titanium base alloys, Heat treatment
Precipitation and recrystallization behavior of beta titanium alloys during continuous heat treatment. 147-158A
Improvement in fracture toughness of Ti-4.5Al-3V-2Mo-2Fe through microstructural optimization. 267-275A

Titanium base alloys, Mechanical properties
A microstructure-based fatigue-crack-initiation model. 43-57A
The influence of microstructure and strain rate on the compressive deformation behavior of Ti-6Al-4V. 295-306A
Tensile properties and creep behavior of a nεw Ti-Al-Nb intermetallic alloy with an O + α_2 microstructure. 633-643A
Microstructural effects on moisture-induced embrittlement of isothermally forged TiAl-based intermetallic alloys. 645-655A
Aging response of the young's modulus and mechanical properties of Ti-29Nb-13Ta-4.6Zr for biomedical applications. 1007-1012A
Improvement of hardness and wear resistance of (TiC,TiB)/Ti-6Al-4V surface-alloyed materials fabricated by high-energy electron-beam irradiation. 1461-1471A
Development and Elemental Powder Metallurgy of a Y-Containing Two-Phase TiAl Alloy. 2077-2087A
Microstructural Effects on the Tensile Properties and Deformation Behavior of a Ti-48Al Gamma Titanium Aluminide. 2113-2127A
High-Temperature Deformation Behavior of a Gamma TiAl Alloy- Microstructural Evolution and Mechanisms. 2165-2176A
Communication: The Effect of Stress State on Cavity Initiation during Hot Working of Ti-6Al-4V. 2397-2400A
Fatigue Crack Growth Mechanisms in Ti6242 Lamellar Microstructures: Influence of Loading Frequency and Temperature. 2565-2577A

Titanium base alloys, Melting
Mathematical Modeling of Aluminum Evaporation During Electron-Beam Cold-Hearth Melting of Ti-6Al-4V Ingots. 447-454B
Communication: Evaluation of Evaporation Losses during Electron-Beam Melting of Ti-Al-V Alloys. 911-915B

Titanium base alloys, Microstructure
Mechanisms of globularization of Ti-6Al-4V during static heat treatment. 691-698A
Communication: Effects of grain size and pressing speed on the deformation mode of commercially pure Ti during equal channel angular pressing. 1555-1558A
Theory of Interface Properties for Carbide Precipitates in TiAl. 2097-2101A
Creep Behavior of TiAl Alloys with Enhanced High-Temperature Capability. 2149-2164A
Primary Creep Behavior of Ti-48Al-2W as a Function of Stress and Lamellar Morphology. 2177-2190A
Microstructure Stability during Creep Deformation of Hard-Oriented Polysynthetically Twinned Crystal of TiAl Alloy. 2191-2198A
Mutual Effects of Hydrogenation and Deformation in Ti-Nb Alloys. 2199-2206A
A Method for Measuring Microstructural-Scale Strains Using a Scanning Electron Microscope: Applications to γ-Titanium Aluminides. 2301-2313A
Microstructure Evolution during Alpha-Beta Heat Treatment of Ti-6Al-4V. 2377-2386A
Effects of Microstructural Factors on Quasi-Static and Dynamic Deformation Behaviors of Ti-6Al-4V Alloys with Widmanstatten Structures. 2541-2548A

Titanium base alloys, Oxidation
Fundamental Considerations for the Development of Oxidation-Resistant Alloys and Coatings Based on γ-TiAl. 2247-2251A
Effect of Ion Implantation on the Oxidation Resistance of TiAl. 2253-2261A
Oxidation Behavior and Transmission Electron Microscope Characterization of Ti-44Al-xNb-2(Ta,Zr) Alloys. 2263-2271A

Titanium base alloys, Phase transformations
Constrained phase-transformation of a TiNi shape-memory alloy. 219-223A
Influence of Alloying Elements on the Kinetic of Massive Transformation in Gamma Titanium Aluminides. 2053-2066A
Influence of Oxygen on Phase Transformations in a Ti-48 At. Pct Al Alloy. 2067-2075A

Titanium base alloys, Phases (state of matter)
Communication: Discussion of "Synthesis of Ultrafine Particles of Intermetallic Compounds by the Vapor-Phase Magnesium Reduction of Chloride Mixtures: Part I. Titanium Aluminides". 738-740B
Communication: Authors' Reply. 741B

Titanium base alloys, Structural hardening
Work-Hardening and Recovery Mechanisms in Gamma-Based Titanium Aluminides. 2103-2111A
Precipitation Strengthening in K5-Series γ-TiAl Alloyed with Silicon and Carbon. 2129-2138A

Titanium base alloys, Welding
Computation and Validation of Weld Pool Dimensions and Temperature Profiles for Gamma TiAl. 2273-2279A
Residual Stresses in an Electron Beam Weld of Ti-834: Characterization and Numerical Modeling. 2935-2946A

Titanium carbide, Alloying additive
Improvement of hardness and wear resistance of (TiC,TiB)/Ti-6Al-4V surface-alloyed materials fabricated by high-energy electron-beam irradiation. 1461-1471A

Titanium carbide, Alloying elements
Synthesis mechanism of an Al-Ti-C grain refiner master alloy prepared by a new method. 1727-1733A

Titanium carbide, Coating
Effects of TiC composite coating on electrode degradation in microresistance welding of nickel-plated steel. 1501-1511A

Titanium carbide, Composite materials
Deformation Mechanisms in Ti-6Al-4V/TiC Composites. 1869-1877A

Titanium compounds, Composite materials
Synthesis of ductile titanium-titanium boride (Ti-TiB) composites with a beta-titanium matrix: the nature of TiB formation and composite properties. 1371-1385A

Titanium compounds, Crystal lattices
An Energy Approach to the Formation of Twins in TiAl. 2827-2836A

Titanium compounds, Mechanical properties
Development and Elemental Powder Metallurgy of a Y-Containing Two-Phase TiAl Alloy. 2077-2087A
Microstructural Effects on the Tensile Properties and Deformation Behavior of a Ti-48Al Gamma Titanium Aluminide. 2113-2127A
High-Temperature Deformation Behavior of a Gamma TiAl Alloy- Microstructural Evolution and Mechanisms. 2165-2176A

Titanium compounds, Microstructure
Precipitation of Heusler phase (Ni_2TiAl) from B2-TiNi in Ni-Ti-Al and Ni-Ti-Al-x (x = Hf, Zr) Alloys. 1221-1234A
Theory of Interface Properties for Carbide Precipitates in TiAl. 2097-2101A
Creep Behavior of TiAl Alloys with Enhanced High-Temperature Capability. 2149-2164A
Microstructure Stability during Creep Deformation of Hard-Oriented Polysynthetically Twinned Crystal of TiAl Alloy. 2191-2198A
A Method for Measuring Microstructural-Scale Strains Using a Scanning Electron Microscope: Applications to γ-Titanium Aluminides. 2301-2313A
Grain-Boundary Character Distribution in Recrystallized $L1_2$ Ordered Intermetallic Alloys. 2429-2439A

Titanium compounds, Oxidation
Fundamental Considerations for the Development of Oxidation-Resistant Alloys and Coatings Based on γ-TiAl. 2247-2251A
Effect of Ion Implantation on the Oxidation Resistance of TiAl. 2253-2261A

Titanium compounds, Phase transformations
Influence of Oxygen on Phase Transformations in a Ti-48 At. Pct Al Alloy. 2067-2075A
The Effect of Severe Marforming on Shape Memory Characteristics of a Ti-Rich NiTi Alloy Processed Using Equal Channel Angular Extrusion. 2527-2539A

Titanium compounds, Phases (state of matter)
Communication: Discussion of "Synthesis of Ultrafine Particles of Intermetallic Compounds by the Vapor-Phase Magnesium Reduction of Chloride Mixtures: Part I. Titanium Aluminides". 738-740B
Communication: Authors' Reply. 741B

Titanium compounds, Rolling
Properties of TiAl sheet pack-rolled at temperatures below 1000°C. 1329-1339A

Titanium compounds, Structural hardening
Work-Hardening and Recovery Mechanisms in Gamma-Based Titanium Aluminides. 2103-2111A
Precipitation Strengthening in K5-Series γ-TiAl Alloyed with Silicon and Carbon. 2129-2138A

Titanium compounds, Welding
Computation and Validation of Weld Pool Dimensions and Temperature Profiles for Gamma TiAl. 2273-2279A

Titanium diboride, Composite materials
Fatigue Crack Growth in a Particulate TiB_2-Reinforced Powder Metallurgy Iron-Based Composite. 2017-2024A

Titanium nitride, Bonding
Diffusion bonding of Si_3N_4-TiN composite with nickel-based interlayers. 1627-1636A

Titanium nitride, Composite materials
Emerging technologies in extraction and processing of metals. 137-152B

Topography
Evolution of strain-induced microstructure and texture in commercial aluminum sheet under balanced biaxial stretching. 657-671A

Torsion
Recrystallization of an AlMgSi Alloy after Different Modes of Hot Deformation. 2717-2726A
On the Origin of Strain Softening during Deformation of Aluminum in Torsion to Large Strains. 2727-2736A

Torsion tests
Large Strain Mechanical Behavior of 1018 Cold-Rolled Steel over a Wide Range of Strain Rates. 2873-2885A

Toughness
Influence of thermomechanical treatments on the microstructure and mechanical properties of HSLA-100 steel plates. 241-253A
Salient shear bands and second-phase addition interactions of bulk metallic glass matrix composite. 1147-1152A
Microstructural evolution and deformation of cryomilled nanocrystalline Al-Ti-Cu alloy. 1473-1481A
An Investigation of Contact Deformation, Fracture, and Fatigue Behavior in Bulk Metallic Glasses. 1851-1861A
Microstructure and Sliding Wear Behavior of Tungsten Reinforced W-Ni-Si Metal-Silicide In-Situ Composites. 2005-2015A
Microstructure and Texture of Hot-Rolled Cb-Ti and V-Cb

Microalloyed Steels with Differences in Formability and Toughness. 2341-2351A
Effect of Cooling Rate on the As-Quenched Microstructure and Mechanical Properties of HSLA-100 Steel Plates. 2493-2504A
Analysis of Different Acicular Ferrite Microstructures in Low-Carbon Steels by Electron Backscattered Diffraction. Study of Their Toughness Behavior. 2505-2516A
Toughness and Strength Characteristics of Nb-W-Si Ternary Alloys Prepared by Arc Melting. 2861-2871A

Transformation temperature
Constrained phase-transformation of a TiNi shape-memory alloy. 219-223A
Thermodynamic Calculations for Nb-Containing High-Speed Steels and White Cast-Iron Alloys. 1749-1758A
Stabilization of Thermosolutal Convective Instabilities in Ni-Based Single-Crystal Superalloys: Carbide Precipitation and Rayleigh Numbers. 1953-1967A

Transgranular fracture
Internal hydrogen embrittlement of ultrahigh-strength AERMET 100 steel. 327-344A
The low-cycle fatigue and fatigue-crack-growth behavior of HAYNES HR-120 alloy. 1451-1460A
Toughness and Strength Characteristics of Nb-W-Si Ternary Alloys Prepared by Arc Melting. 2861-2871A
Microstructural Effects on the Tensile and Fracture Behavior of Aluminum Casting Alloys A356/357. 2887-2899A

Transition joints, Microstructure
The microstructure and fracture behavior of the dissimilar alloy 690-SUS 304L joint with various Nb addition. 1097-1105A

Transmission electron microscopy
Communication: Focused ion beam milling: A practical method for preparing cast Al-Si alloy samples for transmission electron microscopy. 705-707A
On the analysis of grain size in bulk nanocrystalline materials via x-ray diffraction. 1349-1355A

Tribology
Processing and Characterization of Plasma-Sprayed Ceramic Coatings on Steel Substrate: Part I. On Coating Characteristics. 1909-1918A

TRIP steels, Microstructure
Effect of deformation schedule on the microstructure and mechanical properties of a thermomechanically processed C-Mn-Si transformation-induced plasticity steel. 1599-1609A

True stress
Postnecking elastoplastic characterization: degree of approximation in the Bridgman method and properties of the flow-stress/true-stress ratio. 615-624A

TTT curves
On the application of the additivity rule in pearlitic transformation in low alloy steels. 1259-1264A
Influence of Alloying Elements on the Kinetic of Massive Transformation in Gamma Titanium Aluminides. 2053-2066A

Tubular goods, Materials selection
Communication: Spray deposited metal-carbon fiber reinforced polymer hybrid structures. 421-424A

Tungsten, Alloying elements
Elasto-Plastic Load Transfer in Bulk Metallic Glass Composites Containing Ductile Particles. 1787-1797A

Tungsten, Composite materials
Salient shear bands and second-phase addition interactions of bulk metallic glass matrix composite. 1147-1152A
Microstructure and Sliding Wear Behavior of Tungsten Reinforced W-Ni-Si Metal-Silicide In-Situ Composites. 2005-2015A

Tungsten base alloys, Mechanical properties
X-ray photoelectron spectroscopy and scanning auger microprobe studies on oxidation-induced embrittlement mechanism of liquid-phase-sintered 95W-Ni-Fe alloy. 355-359A

Turbine blades, Crystal lattices
Measurement of the lattice misfit of the nickel-base superalloy SC16 by high-energy synchrotron radiation. 193-197A

Turbine blades, Materials selection
Communication: Thermal Conductivity of Cobalt-Base Alloys. 2026-2028A

Turbines, Coating
Communication: Residual stress distribution in electron beam-physical vapor deposited ZrO_2 thermal barrier coating layer by Raman spectroscopy. 1739-1741A

Turbulence
Mixing and Solid-Liquid Mass Transfer Rates in a Creusot Loire Uddeholm Vessel: A Water Model Case Study. 833-842B

Turbulent flow
Laminar-turbulent transition in an electromagnetically levitated droplet. 29-36B

Tuyeres
Mathematical model of COREX melter gasifier: Part I. Steady-state model. 103-114B
A cold model study of raceway hysteresis. 183-191B

Twinning
Detwinning in NiTi alloys. 5-13A
Resistance to shape refinement of precipitates in Al-(Si,Ge) alloys during thermal cycling. 543-551A
Communication: Effects of grain size and pressing speed on the deformation mode of commercially pure Ti during equal channel angular pressing. 1555-1558A
A Taylor Model Based Description of the Proof Stress of Magnesium AZ31 during Hot Working. 1799-1806A
The Role of Nitrogen on the Deformation Response of Hadfield Steel Single Crystals. 1821-1831A
Microstructural Effects on the Tensile Properties and Deformation Behavior of a Ti-48Al Gamma Titanium Aluminide. 2113-2127A
Creep Behavior of TiAl Alloys with Enhanced High-Temperature Capability. 2149-2164A
An Energy Approach to the Formation of Twins in TiAl. 2827-2836A

Ultrafines
Nanocrystalline Ni coatings strengthened with ultrafine particles. 673-683A
Communication: Effects of grain size and pressing speed on the deformation mode of commercially pure Ti during equal channel angular pressing. 1555-1558A
Influence of Oxygen on Phase Transformations in a Ti-48 At. Pct Al Alloy. 2067-2075A

Ultrafines, Heat treatment
Annealing behavior of submicrocrystalline oxide-bearing iron produced by mechanical alloying. 131-138A

Ultrasonic welding
Auger electron spectroscopy analysis at the ultrasonically welded interface between alumina and aluminum. 1107-1111A

Underground corrosion
Effect of Precyclic Loading on Stress-Corrosion-Cracking Initiation in An X-65 Pipeline Steel Exposed to Near-Neutral pH Soil Environment. 2601-2608A

Uniform attack (corrosion)
Corrosion of Co-Cr-W Alloy in Liquid Zinc. 881-886B
Effect of n addition on tensile and corrosion behaviors of CD4MCU cast duplex stainless steels. 1617-1625A

Uranium, Reactions (chemical)
Occlusion and ion exchange in the molten (lithium chloride + potassium chloride + alkaline-earth chloride) salt + zeolite 4A system with alkaline-earth chlorides of calcium and strontium and in the molten (lithium chloride + potassium chloride + actinide chloride) salt + zeolite 4A system with the actinide chloride of uranium. 201-208B

Vacuum annealing
Dehydrogenation of Nanocrystalline TiH_2 and Consequent Consolidation to Form Dense Ti. 2793-2799A

Vanadium, Alloying elements
Coarsening kinetics of multicomponent MC-type carbides in high-strength low-alloy steels. 1565-1573A

Vapor phases
Mathematical Modeling of Aluminum Evaporation During Electron-Beam Cold-Hearth Melting of Ti-6Al-4V Ingots. 447-454B

Vaporizing
Thermodynamic Investigation of the A2/B2 Region of the Fe-Al System by Knudsen Effusion Mass Spectrometry. 2409-2419A

Viscosity
Laminar-turbulent transition in an electromagnetically levitated droplet. 29-36B
Response of semi-solid Sn-15 pct Pb to rapid shear-rate changes. 409-417A
Viscosity of Blast Furnace Type Slags. 509-516B
From Viscosity and Surface Tension to Marangoni Flow in Melts. 517-523B
Physicochemical Aspects of Titanium Slag Production and Solidification. 581-588B
The Prediction and Representation of Phase Equilibria and Physicochemical Properties in Complex Slag Systems. 595-603B
Modeling Transient Slag-Layer Phenomena in the Shell/mold Gap in Continuous Casting of Steel. 707-725B
Entrainment of a Two-Layer Liquid through a Taphole. 821-832B
Rapid compression of aluminum alloys and its relationship to thixoformability. 1545-1554A
Modeling of Marangoni-Induced Droplet Motion and Melt Convection during Solidification of Hypermonotectic Alloys. 3009-3019A

Voids
Effect of material damage on forming limits of voided anisotropic sheet metals. 1283-1290A
Microstructural evolution and deformation of cryomilled nanocrystalline Al-Ti-Cu alloy. 1473-1481A
The shrinkage of grain-boundary voids under pressure. 1493-1500A

Volume fraction
Synthesis of ductile titanium-titanium boride (Ti-TiB) composites with a beta-titanium matrix: the nature of TiB formation and composite properties. 1371-1385A
Improving the Fracture Toughness of Constituent Phases and Nb-Based In Situ Composites by a Computational Alloy Design Approach. 1833-1849A

Warm rolling
Effect of rolling temperature on the deformation and recrystallization textures of warm-rolled steels. 1163-1174A

Water quenching
Improvement in fracture toughness of Ti-4.5Al-3V-2Mo-2Fe through microstructural optimization. 267-275A
Microstructure Evolution during Alpha-Beta Heat Treatment of Ti-6Al-4V. 2377-2386A
Effect of Cooling Rate on the As-Quenched Microstructure and Mechanical Properties of HSLA-100 Steel Plates. 2493-2504A

Wear mechanisms
Microstructure and Sliding Wear Behavior of Tungsten Reinforced W-Ni-Si Metal-Silicide In-Situ Composites. 2005-2015A
On the Wear of a Cobalt-Based Superalloy in Zinc Baths. 2387-2396A

Wear particles
On the Wear of a Cobalt-Based Superalloy in Zinc Baths. 2387-2396A

Wear resistance
Correlation of microstructure with hardness and wear resis-

tance of VC/steel surface-alloyed materials fabricated by high-energy electron-beam irradiation. 59-69A
Mechanical properties of 2014Al/SiC composites with oxidized SiC particles. 1361-1369A
Improvement of hardness and wear resistance of (TiC,TiB)/Ti-6Al-4V surface-alloyed materials fabricated by high-energy electron-beam irradiation. 1461-1471A
Processing and Characterization of Plasma-Sprayed Ceramic Coatings on Steel Substrate: Part I. On Coating Characteristics. 1909-1918A
Processing and Characterization of Plasma-Sprayed Ceramic Coatings on Steel Substrate: Part II. On Coating Performance. 1919-1930A
Microstructure and Sliding Wear Behavior of Tungsten Reinforced W-Ni-Si Metal-Silicide In-Situ Composites. 2005-2015A

Weibull modulus
Strength of SCS-6 fibers in a Tiβ21s/SCS-6 composite before and after fatigue. 1203-1213A
Analysis of fracture toughness in the transition-temperature region of an Mn-Mo-Ni low-alloy steel. 1275-1281A

Weight reduction
Communication: Spray deposited metal-carbon fiber reinforced polymer hybrid structures. 421-424A

Weld metal, Mechanical properties
The role of the slope out region on fatigue crack initiation in electron beam welded waspaloy. 1637-1645A

Weld metal, Microstructure
Investigation of Dendrite-Boundary Microchemistry in Alloy 182 using Auger Electron Spectroscopy Analysis. 1891-1899A

Weld metal pool
Nitrogen absorption by iron and stainless steels during CO_2 laser welding. 75-82B
Mechanism and Optimization of Oxide Fluxes for Deep Penetration in Gas Tungsten Arc Welding. 1901-1907A

Welded joints, Corrosion
Effect of microstructure on hydrogen embrittlement of weld-simulated HSLA-80 and HSLA-100 steels. 1297-1309A

Welded joints, Mechanical properties
Residual Stresses in an Electron Beam Weld of Ti-834: Characterization and Numerical Modeling. 2935-2946A

Welded joints, Physical properties
Diffusion bonding of Si_3N_4-TiN composite with nickel-based interlayers. 1627-1636A

Welding current
Active Solute Effects on Surface Ripples in Electron-Beam Welding Solidification. 421-432B
Computation and Validation of Weld Pool Dimensions and Temperature Profiles for Gamma TiAl. 2273-2279A

Welding fluxes
Mechanism and Optimization of Oxide Fluxes for Deep Penetration in Gas Tungsten Arc Welding. 1901-1907A

Welding parameters
Active Solute Effects on Surface Ripples in Electron-Beam Welding Solidification. 421-432B
Basal plane texture and flow pattern in friction stir weld of a magnesium alloy. 987-994A
Auger electron spectroscopy analysis at the ultrasonically welded interface between alumina and aluminum. 1107-1111A
Mechanism and Optimization of Oxide Fluxes for Deep Penetration in Gas Tungsten Arc Welding. 1901-1907A
Computation and Validation of Weld Pool Dimensions and Temperature Profiles for Gamma TiAl. 2273-2279A
Residual Stresses in an Electron Beam Weld of Ti-834: Characterization and Numerical Modeling. 2935-2946A
Simulation of Time-Dependent Pool Shape during Laser Spot Welding: Transient Effects. 2947-2961A
Susceptibility of Iron Castings to Heat Absorption from an Electric Arc and to Hardened-Layer Shaping. 2973-2984A

Weldments, Microstructure
Investigation of Dendrite-Boundary Microchemistry in Alloy 182 using Auger Electron Spectroscopy Analysis. 1891-1899A

Wetting
Studies of the wetting characteristics of liquid iron on dense alumina by the x-ray sessile drop technique. 193-199B
The Contact Angle between Liquid Iron and a Single Crystal, Alumina Substrate at 1873 K: Effects of Oxygen and Droplet Size. 503-508B
Reaction Layers and Mechanisms for a Ti-Activated Braze on Sapphire. 2963-2972A

Whisker composites, Mechanical properties
Titanium-Titanium Boride (Ti-TiB) Functionally Graded Materials through Reaction Sintering: Synthesis, Microstructure, and Properties. 1993-2003A

Whisker composites, Powder technology
Synthesis of ductile titanium-titanium boride (Ti-TiB) composites with a beta-titanium matrix: the nature of TiB formation and composite properties. 1371-1385A

White iron, Thermal properties
Thermodynamic Calculations for Nb-Containing High-Speed Steels and White Cast-Iron Alloys. 1749-1758A

Widmanstatten structure
The influence of microstructure and strain rate on the compressive deformation behavior of Ti-6Al-4V. 295-306A
Delta-Ferrite Recovery Structures in Low-Carbon Steels. 495-501B
Effects of Microstructural Factors on Quasi-Static and Dynamic Deformation Behaviors of Ti-6Al-4V Alloys with Widmanstatten Structures. 2541-2548A

Wire, Mechanical properties
Crack Initiation and Propagation in 50.9 At. pct Ni-Ti Pseudoelastic Shape-Memory Wires in Bending-Rotation Fatigue. 2847-2860A

Wire, Microstructure
The evolution of annealing textures in 90 pct drawn copper wire. 531-541A

X ray diffraction
On the analysis of grain size in bulk nanocrystalline materials via x-ray diffraction. 1349-1355A

Yield strength
A constitutive description of an aluminum-0.32 pct iron under hot-deformation conditions. 319-326A
Mechanical properties of an ultrafine-grained Al-7.5 Pct Mg alloy. 603-613A
Postnecking elastoplastic characterization: degree of approximation in the Bridgman method and properties of the flow-stress/true-stress ratio. 615-624A
A Composite Model for the Grain-Size Dependence of Yield Stress of Nanograined Materials. 765-772A
Static Strain Aging Phenomena in Cold-Rolled Dual-Phase Steels. 781-792A
Superheat Treatment of Al-7Si-0.55Mg Melt and Its Influences on the Solidification Structures and the Mechanical Properties. 799-806A
Communication: Influence of Coating an Thermal Response of Composites Reinforced with Anisotropic Fibers. 883-887A
Strengthening by high densities of nanometer-size precipitates: oxides in Ni. 935-949A
High-temperature deformation behavior of coarse- and fine-grained $MoSi_2$ with different silica contents. 1069-1088A
Communication: Strength differential measurements in IN 718: effects of superimposed. 1736-1739A
Microstructure and Sliding Wear Behavior of Tungsten Reinforced W-Ni-Si Metal-Silicide In-Situ Composites. 2005-2015A
Fatigue Crack Growth in a Particulate TiB_2-Reinforced Powder Metallurgy Iron-Based Composite. 2017-2024A
Development and Elemental Powder Metallurgy of a Y-Containing Two-Phase TiAl Alloy. 2077-2087A
Microstructure and Texture of Hot-Rolled Cb-Ti and V-Cb Microalloyed Steels with Differences in Formability and Toughness. 2341-2351A
A Planar Simple Shear Test and Flow Behavior in a Superplastic Al-Mg Alloy. 2465-2471A
The Influence of Precipitation on the Work-Hardening Behavior of the Aluminum Alloys AA6111 and AA7030. 2473-2481A
Effect of Cooling Rate on the As-Quenched Microstructure and Mechanical Properties of HSLA-100 Steel Plates. 2493-2504A
Microstructure and Fatigue Properties of Hydroformed Aluminum Alloys 6063 and 5754. 2549-2557A
Effect of Precyclic Loading on Stress-Corrosion-Cracking Initiation in An X-65 Pipeline Steel Exposed to Near-Neutral pH Soil Environment. 2601-2608A
Investigation of a Directionally Solidified NiAl/Cr(Mo) Composite Alloyed with Hf. 2663-2670A
On the Origin of Strain Softening during Deformation of Aluminum in Torsion to Large Strains. 2727-2736A
A Constitutive Description for Aluminum-0.1 Pct Magnesium Alloy under Hot Working Conditions. 2837-2846A
Toughness and Strength Characteristics of Nb-W-Si Ternary Alloys Prepared by Arc Melting. 2861-2871A
Microstructural Effects on the Tensile and Fracture Behavior of Aluminum Casting Alloys A356/357. 2887-2899A
Precipitation Strengthening of the Aluminum Alloy AA6111. 2913-2924A
Hot Working and Recrystallization of As-Cast 317L. 3021-3041A

Yttrium, Alloying elements
Development and Elemental Powder Metallurgy of a Y-Containing Two-Phase TiAl Alloy. 2077-2087A

Zeolites, Reactions (chemical)
Occlusion and ion exchange in the molten (lithium chloride + potassium chloride + alkaline-earth chloride) salt + zeolite 4A system with alkaline-earth chlorides of calcium and strontium and in the molten (lithium chloride + potassium chloride + actinide chloride) salt + zeolite 4A system with the actinide chloride of uranium. 201-208B

Zinc, Binary systems
The Dy-Zn Phase Diagram. 743-750A

Zinc, Environment
Corrosion of Co-Cr-W Alloy in Liquid Zinc. 881-866B

Zinc, Phases (state of matter)
Experimental Study of Phase Equilibria in the PbO-ZnO"Fe_2O_3"-(CaO + SiO_2) System in Air for the Lead and Zinc Blast Furnace Sinters (CaO/SiO_2 Weight Ratio of 0.933 and PbO/(CaO + SiO_2) Ratios of 2.0 and 3.2). 383-397B

Zinc base alloys, Coatings
Communication: Phase Transition in Galvanneal Coatings. 879-881A

Zinc base alloys, Mechanical properties
Prediction of Limit Strains in Superplastic Materials. 2559-2564A

Zircon, Coatings
Processing and Characterization of Plasma-Sprayed Ceramic Coatings on Steel Substrate: Part I. On Coating Characteristics. 1909-1918A
Processing and Characterization of Plasma-Sprayed Ceramic Coatings on Steel Substrate: Part II. On Coating Performance. 1919-1930A

Zirconium, Alloying additive
Oxidation Behavior and Transmission Electron Microscope Characterization of Ti-44Al-xNb-2(Ta,Zr) Alloys. 2263-2271A

Zirconium, Binary systems
Structural Properties and Stability of Metastable Phases in the Zr-Nb System: Part II. Aging of Bcc (β) Alloys and Assessment of β-Zr. 2771-2779A

Zirconium base alloys, Mechanical properties
Hydride embrittlement and irradiation effects on the hoop mechanical properties of pressurized water reactor (PWR) and boiling-water reactor (BWR) ZIRCALOY cladding tubes: Part I. Hydride embrittlement in stress-relieved, annealed, and recrystallized ZIRCALOYs at 20°C and 300°C. 553-566A
Hydride embrittlement and irradiation effects on the hoop mechanical properties of pressurized water reactor (PWR) and boiling-water reactor (BWR) ZIRCALOY cladding tubes: Part II. Morphology of hydrides investigated at different magnifications and their interaction with the processes of plastic deformation. 567-578A
Hydride embrittlement and irradiation effects on the hoop mechanical properties of pressurized water reactor (PWR) and boiling-water reactor (BWR) ZIRCALOY cladding tubes: Part III. Mechanical behavior of hydride in stress-relieved annealed and recrystallized ZIRCALOYs at 20°C and 300°C. 579-588A
Elasto-Plastic Load Transfer in Bulk Metallic Glass Composites Containing Ductile Particles. 1787-1797A
An Investigation of Contact Deformation, Fracture, and Fatigue Behavior in Bulk Metallic Glasses. 1851-1861A

Zirconium base alloys, Powder technology
Mechanically induced solid-state devitrifications of $Zr_{70}Pd_{20}Ni_{10}$ glassy alloy powders. 893-898A

Zirconium compounds, Composite materials
Salient shear bands and second-phase addition interactions of bulk metallic glass matrix composite. 1147-1152A

Zirconium dioxide, Composite materials
Reactive synthesis of in-situ $ZrAl_3$-Al_2O_3-Al composites. 1357-1360A
